OBJECTIVES

Mathematics is a key to success in the field of science and engineering. Mathematics plays an important role in the context of globalization of Indian economy, modern technology, and computer science and information technology. Today, students need a thorough knowledge of basic principles, methods, results and a clear perception of the power of mathematical ideas and tools to use them effectively in modeling, interpreting and solving the real world problems. The syllabus of this program is aimed at preparing the students with the latest developments and put them on the right track to fulfill the present requirements.

COMMENCEMENT OF THIS REGULATION

This regulation shall take effect from the academic year 2021 – 2022, i.e, for the students who are admitted to the first year of the course during the academic year 2021 – 2022 and thereafter.

ELIGIBILITY FOR ADMISSION

A Pass in the Higher Secondary Examination of Tamil Nadu Higher Secondary Board or some other Board accepted by the Syndicate as equivalent thereto with Mathematics (other than Business mathematics) as one of the subjects.

DEFINITIONS

Programme: Program means a course of study leading to the award of the degree in a discipline.

Course: Course refers to the subject offered under the degree programme.

SYLLABUS

The syllabus of the UG degree has been divided into the following five categories:

- **Part I**: Tamil/ Other Languages.
- **Part II**: English Language.
- **Part III**: Core Courses, Elective Courses and Allied Courses.
- **Part IV**: Skill Based Elective Courses, Non-Major Course, Environmental Studies and Value Education.
- **Part V**: Extension Activity.

- **Elective Course**: There are 2 Elective Courses offered for B.Sc. Mathematics students. One course from each set should be selected for each elective course.

- **Skill Based Elective Course**: This course aims to impart advanced and recent developments in the concerned discipline.

- **Non-Major Course**: Irrespective of the discipline the student can select papers that are offered by other disciplines as non-major course.

- **Extension Activity**: Participation in NSS / NCC / YRC / RRC / Sports or other co-circular activities are
considered for Extension activity.

CREDITS

Weightage given to each course of study is termed as credit.

CREDIT SYSTEM

The weightage of credits are spread over to different semester during the period of study and the cumulative credit point average shall be awarded based on the credits earned by the students. A total of 148 credits are prescribed for the under graduate programme.

DURATION OF THE COURSE

The candidates shall complete all the courses of the programme within 5 years from the date of admission. The programme of study shall consist of six semesters and a total period of three years with 148 credits. The programme of study will comprise the course according to the syllabus.

EXAMINATIONS

The course of study shall be based on semester pattern with Internal Assessment under Choice Based Credit System.

The examinations for all the papers consist of both Internal (Continuous Internal Assessment-CIA) and External (end semester) theory examination. The theory examination shall be conducted for three hours duration at the end of each semester. The candidates failing in any subjects(s) will be permitted to appear for the same in the subsequent semester examinations.

PROGRAMME OUTCOME

</tbody>
</table>
UNIFORMITY IN THE NUMBER OF UNITS IN EACH PAPER:
Each theory paper shall consist of five units. The Question paper shall consist of questions uniformly distributed among all the units.

1. QUESTION PAPER PATTERN FOR THE THEORY PAPERS
Duration: **Three Hours**  
Maximum Marks: **75**

**Part A: (15 X 1 = 15 marks)**
Answer ALL Questions
(Three Questions from Each Unit)

**Part B: (2 X 5 = 10 marks)**
Answer Any Two Questions
(One Question from Each Unit)

**Part C: (5 X 10 = 50 marks)**
Answer ALL Questions
(One Question from Each Unit with internal choice)

2. MARKS AND QUESTION PAPER PATTERN FOR PRACTICALS
MAXIMUM: **100 Marks**  
INTERNAL MARK: **40 marks**  
EXTERNAL MARK: **60 marks**
(Practical Exam -45 marks + Record - 15 marks)

**QUESTION PATTERN FOR THE PRACTICAL EXAM PAPERS**
Answer any THREE questions out of 5 questions (3 x 15 = 45 marks)

**PASSING MINIMUM**

i) The Candidates shall be **declared to have passed the examination if he/she secures not less than 40 marks in total (CIA mark + Theory Exam mark) with minimum of 30 marks in the Theory Exam conducted by the University.**

ii) The Candidates shall be **declared to have passed the examination if he/she secures not less than 40 marks in total (CIA mark + Practical Exam mark) with minimum of 18**
marks out of 45 marks in the Practical Exam conducted by the University.

Ci = Credits earned for course i in any semester
Gi = Grade Point obtained for course i in any semester
n = refers to the semester in which such course were credited

Grade point average (for a Semester):

Calculation of grade point average semester-wise and part-wise is as follows:

GRADE POINT AVERAGE [GPA] = Σi Ci Gi / Σi Ci

Sum of the multiplication of grade points by the credits of the courses offered under each part

GPA= ...........................................................................................................................................

Sum of the credits of the courses under each part in a semester

Calculation of Grade Point Average (CGPA) (for the entire programme):

A candidate who has passed all the examinations under different parts (Part-I to V) is eligible for the following part wise computed final grades based on the range of CGPA.

CUMULATIVE GRADE POINT AVERAGE [CGPA] = ΣnΣi Cni Gni / Σn Σi Cni

Sum of the multiplication of grade points by the credits of the entire programme under each part

CGPA= ...........................................................................................................................................

Sum of the credits of the courses of the entire programme under each part

</tbody>
</table>
Conferment of the Degree

No candidate shall be eligible for conferment of the Degree unless he/she

i. has undergone the prescribed course of study for a period of not less than six semesters in an institution approved by/affiliated to the University or has been exempted from in the manner prescribed and has passed the examinations as have been prescribed therefor.

ii. Has completed all the components prescribed under Parts I to Part V in the CBCS pattern to earn 140 credits.

iii. Has successfully completed the prescribed Field Work/Institutional Training as evidenced by certificate issued by the Principal of the College.

Ranking

A candidate who qualifies for the UG degree course passing all the examinations in the first attempt, within the minimum period prescribed for the course of study from the date of admission to the course and secures I or II class shall be eligible for ranking and such ranking shall be confined to 10% of the total number of candidates qualified in that particular branch of study, subject to a maximum of 10 ranks. The improved marks shall not be taken into consideration for ranking.

NOTE:

- All the Papers (including computer papers) specified in this syllabus should be handled and valued by faculty of Mathematics Department only.

- Both Internal and External Examiners for University Practical Examination should be appointed (including computer papers) from faculty of Mathematics only.
B.Sc., MATHEMATICS  
(Computer Applications)

SEMESTER I
CORE I - CLASSICAL ALGEBRA

Paper Code: 21UMA01 / 21UMACA01  Max. Marks: 75

COURSE OBJECTIVE
The course aims to
1. Gain knowledge about binomial series, exponential series, logarithmic series and matrices.
2. Develop the ability of solving different types of algebraic equations.
3. Develop the ability to reflect critically on the methods they have chosen to solve problems.

Syllabus

UNIT – I
Chapter 2(Section 1, 2, 3), Chapter 3 (Section 1 & 2) & Chapter 4

UNIT – II
Chapter 6

UNIT – III
Theory of equations: Rational integral equation of the n\textsuperscript{th} degree, Fundamental theorem in the theory of equations (without proof) – Relation between the roots and coefficients of an equation – Imaginary and Irrational roots – Symmetric functions of the roots of an equation in terms of its coefficients.  
Chapter 7 (Sections 1 to 5)

UNIT – IV
Chapter 7 (Section 6 to 10)

UNIT – V
Descarte’s rule of signs – Descarte’s rule of signs for negative roots of an equation – Horner’s method for approximation of roots of a polynomial equation – Newton’s method of evaluating a real root correct to given decimal places.  
Chapter 7 (Section 11 to 14)

TEXT BOOK:
Algebra, Analytical Geometry & Trigonometry by Dr.P.R. Vittal & Malini, Margham Publications, Chennai – 17.

REFERENCE BOOKS:
**COURSE OUTCOME**

On completion of the course, students should be able to

<table>
<thead>
<tr>
<th>CO</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>CO 1</td>
<td>Gain knowledge about binomial, exponential and logarithmic series</td>
</tr>
<tr>
<td>CO 2</td>
<td>Examine the consistency of linear equations and application of Cayley-Hamilton theorem</td>
</tr>
<tr>
<td>CO 3</td>
<td>Know the application of relations between the roots and coefficients of an equation</td>
</tr>
<tr>
<td>CO 4</td>
<td>Analyse the method of solving reciprocal equations and diminishing the roots of an equation</td>
</tr>
<tr>

<td>Examine the existence of roots of an equation and determine the roots by using Newton’s and Horner’s methods</td>
</tr>
</tbody>
</table>
SEMESTER I
CORE II – CALCULUS

Paper Code: 21UMA02 / 21UMAC02 Max. Marks: 75

COURSE OBJECTIVE
To impart knowledge about curvatures, integrations and its geometrical applications. To enable the students to Differentiate and integrate any given functions, identify a special function and evaluate an Integral.

UNIT I
Curvature-radius of curvature in Cartesian and polar forms-evolutes and envelopes-pedal Equations, Chord of curvature.
Volume I: Chapter 10 (Section 2.1 - 2.7, 3.1)

UNIT II
Integration by parts, Reduction formulae, Bernoulli’s formula, Integration as summation. Geometrical applications of integration: Areas under plane curves, Areas of a closed curve, Areas in polar coordinates.
Volume II: Chapter 1 (Section 12, 13.1-13.10, 15.1, 15. 2) & Chapter 2 (Section 1.1, 1.2, 1.4)

UNIT III
Evaluation of double and triple integrals- applications to calculations of areas and volumes - areas in polar coordinates.
Volume II : Chapter 5 (Section 2.1, 2.2, 3.1, 3.2, 4,5.1, 6.3)

UNIT IV
Change of Variables – Jacobians – change of variables in double and triple integrals notion of improper integrals.
Volume II : Chapter 6 (Section 1.1, 1.2, 2.1-2.4) Chapter 7 (Section 1.1- 1.5)

UNIT V
Beta and Gamma integrals - their properties, relation between them- evaluation of multiple integrals using Beta and Gamma functions.
Volume II: Chapter 7 (Section 2.1 - 2.3, 3, 4, 5)

TEXT BOOK:
T.K. ManikavachagomPillay, S. Narayanan, Calculus –Volume I and Volume II

REFERENCE BOOKS:

COURSE OUTCOME
• Gain knowledge about curvature and envelopes.
• Gain knowledge about integration and its applications.
SEMESTER II

CORE III - ANALYTICAL GEOMETRY OF 2D & 3D

Paper Code: 21UMA03 / 21UMACA03  Max. Marks: 75

COURSE OBJECTIVE

To enable the students to be familiar with the ideas of polar equations and enhance the knowledge of three-dimensional geometry.

UNIT I
Chapter IX: Section 1 - 15

UNIT II
The Straight line: Symmetrical form – The plane and the straight line – Coplanar lines – Shortest distance between two given lines – The equation of two skew lines in a simplified form – problems.
Chapter III: Section 1 – 8.2

UNIT III
Sphere: Equation of the sphere – Plane Section of a sphere – equation of a circle on a sphere – equation of a sphere passing through a given circle – equation of the tangent plane to the sphere.
Chapter IV: Section 1 – 8

UNIT IV
Cone – Right circular cone – Intersection of a straight line and quadric cone – tangent plane and normal – condition for the plane to touch the quadric cone – Angle between the lines in which the plane cuts the cone.
Cylinder: The equation of the cylinder – equation of the right circular cylinder – enveloping cylinder.
Chapter V: Section 1 – 8.3

UNIT V
Central quadrics: Definition – The intersection of a line and a quadric – Tangents and tangent planes – condition for the plane to touch the conicoid.
Chapter V: Section 9 – 12

TEXT BOOK:

REFERENCE BOOK:

COURSE OUTCOME

| CO1 | To gain knowledge about Conic 2D |
| CO2 | Understand the concepts of coplanar lines and skew lines and find the shortest distance between them |
| CO3 | To gain the knowledge about sphere and identify the characteristics of sphere |
| CO4 | Enhance the fundamental concepts of cone and cylinder |
| CO5 | To develop the concepts of coincoides. |
COURSE OBJECTIVE
The course aims to
1. Acquire knowledge about the expansions of $\sin n\theta$, $\cos n\theta$, $\tan n\theta$, $\sin^n \theta$, $\cos^n \theta$, $\tan^n \theta$. Hyperbolic functions, Inverse hyperbolic functions and Logarithms of a complex quantities.
2. Understand the concepts of divergence, curl and integration of vector point functions.
3. Analyse the various integral theorems in Vector Analysis

TRIGONOMETRY

UNIT – I
Expansion of $\sin n\theta$, $\cos n\theta$, and $\tan n\theta$. Expansions for $\cos^n \theta$, $\sin^n \theta$. Expansions of $\sin \theta$ and $\cos \theta$ in ascending powers of $\theta$.
Chapter 14 (page no: 14.1 to 14.30)

UNIT – II
Hyperbolic functions and Logarithms of complex numbers.
Chapter 14 (page no: 14.31 to 14.75)

VECTOR ANALYSIS

UNIT – III
Gradient of a scalar point function and Divergence and curl of a vector point function.
Chapter II (section 2.1 to 2.7)

UNIT – IV
Integration of point functions: Line Integrals – Surface integrals and Volume integrals.
Chapter III (section 3.1 to 3.8)

UNIT – V
Integral theorems: Gauss divergence theorem – Green’s theorem – Stokes theorem
(statement only).
Chapter IV (section 4.1 to 4.8)

TEXT BOOK:
1. Dr P.R. Vittal (Allied Mathematics), Margham publications, Chennai (for unit I and II).
2. P. Duraipandian and Laxmi Duraipandian, Emerald publishers, Chennai (for Unit III, Unit IV and Unit V).

REFERENCE BOOK:
## COURSE OUTCOME

On completion of the course, students should be able to

<table>
<thead>
<tr>
<th>CO</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>

SEMESTER – III  
CORE V – PROGRAMMING IN C  
Paper Code: 21UMACA05  
Max. Marks: 75  

COURSE OBJECTIVE  
The course aims to  
1. understand about the structured programming languages  
2. acquire knowledge about I/O functions, syntax of several constructs and arrays in C-language  
3. know about user-defined function, pointers and file operations  

UNIT – I  
Introduction – Basic structure of C Programs – Character Set – Keywords and Identifiers – Constants – Variables – Data types – declaration of variables – Assigning values to variables – defining symbolic constants, (Sections operators and expressions.  
(Sections 1.8 to 1.10:2.1 to 2.8, 2.10, 2.11, 3.2 to 3.7, 3.9, 3.10, 3.11.)  

UNIT - II  
(Sections 4.1 to 4.5, 5.2 to 5.9, 6.2 to 6.5)  

UNIT - III  
Arrays: Introduction – One Dimensional array – Declaration of one and two dimensional arrays -Initiating of one and two dimensional arrays - Declaring and initializing string variables – Reading strings from terminal – writing string on the screen– Arithmetic operations on characters - string handling functions – simple problems.  
(Sections 7.1 to 7.6, 8.1 to 8.8)  

UNIT –IV  
(Sections 9.1 to 9.16, 10.1 to 10.7, 10.12, 10.13)  

UNIT –V  
(Sections 11.1 to 11.5, 12.1 to 12.7)
TEXT BOOK:

REFERENCE BOOKS:

COURSE OUTCOME

Acquire knowledge about the structured programming languages.
SEMESTER III
Core VI – DIFFERENTIAL EQUATIONS

Paper Code: 21UMA06 / 21UMACA06  Max. Marks: 75

COURSE OBJECTIVE
- To learn about formation differential equations, first order and first-degree differential equations.
- To learn the second order differential equation with constant coefficient and variable coefficients.
- To learn the partial differential equations, solution of equations standard types.

UNIT – I

UNIT - II
Second Order Differential Equations with Constant Co-efficient- Particular Integrals of the form ‘V’, where V is of the form, X, X^2, sin ax, cos ax, X sin ax and X cos ax.

UNIT – III

UNIT – IV

UNIT – V
Solution of equation of Standard types f(p,q)=0, f(X,p,q)=0, f(Y,p,q)=0, f(Z,p,q)=0, f_1(x,p)=f_2(y,q) Clairaut’s form- Lagrange’s equation Pp+Qq=R.

TEXT BOOK:
1. S.Narayanan and T.K. Manickavachagam Pillay.

REFERENCE BOOKS:
COURSE OUTCOME

- Students will be able to classify the differential equations with respect to order and linearity.

- Students will be able to solve the second order differential equations, linear equations, linear differential equations with constant coefficients.

- Students will be able to understand the basic properties of standard PDE’s and solve the problem in Clairaut’s form.
SEMESTER III
SBEC I – FINANCIAL MATHEMATICS

Paper Code: 21UMAS01 / 21UMACAS01    Max. Marks: 75

COURSE OBJECTIVE

In this course, the students are on posed to
- The basic concepts of Probability theory, The Central limit theorem.
- The concepts of Geometric Brownian motion, Option pricing.
- The derivatives of Blackschole formula and its applications.
- The concept of call option on Dividend paying securities, estimating the volatility parameter.
- The limitations of Arbitrage pricing, the portfolio selection problem.

UNIT-I
Probabilities and Events-Conditional Probability- Random Variables and Expected Values-Covariance and Correlation-Continuous Random Variables-Normal Random Variables –Properties of Normal Random Variables- The Central Limit Theorem-Simple Problems. Section (1.1 - 1.4, 2.1 - 2.4)

UNIT-II
Geometric Brownian Motion-Geometric Brownian Motion as a limit of Simple Models-Brownian Motion-Simple Problems- Interest Rates – Present Value Analysis- Rate of Return-Continuously Varying Interest Rates-An example of option Pricing –Other example of Pricing via Arbitrage. Section (3.1 - 3.3, 4.1 - 4.4, 5.1, 5.2)

UNIT-III

UNIT-IV
Additional results on options- Call option on Divided Paying Securities-Pricing American Put Options-Adding Jumps to Geometric Brownian Motion-Estimating the Volatility Parameter- Simple Problems. Section (8.2 - 8.5)

UNIT-V

COURSE OUTCOME

After completing the course the students will be able to
- To understand the basic concepts of Financial Mathematics.
- To understand and prove theorems.
- To understand the method to solve the problems by applying principles and concepts of Financial Mathematics.
COURSE OBJECTIVE

The course aims are to

1. Work with objects, controls, tool box and VB modules
2. Designing user interface, connecting a data base and building internet applications

UNIT – I
Introduction – Data Access – Developing for the interest, new control, VB’s Control set building controls in VB, IDE and VB – Development environment, Event – Driven programming working with objects and controls – Tool Box, VB Modules, Event Driven code, designing a form.

UNIT – II
Designing user interface – Visual elements of VB – Menus toolbars an tab strips actives another controls – Status bars on Animation and timer events, Aligning controls, Setting focus and tab order : Right mouse button support working with printer, common dialog, Drivers, folders and files. Adding graphic and multimedia.

UNIT – III

UNIT – IV
Building Internet Application: Internet Basics with VB, HTML Basics, IIS and Active Server Pages, WEB Class Designer.

UNIT – V
IIS Object model – Building DHTML Applications – DHTML Page designer Building the interface.

TEXT BOOK:

REFERENCE BOOKS:

COURSE OUTCOME

Acquire knowledge about IIS object models and web class designing
SEMESTER IV

CORE VIII – OFFICE AUTOMATION – PRACTICALS

Paper Code: 21UMACA08 Max. Marks: 75

COURSE OBJECTIVE
The course aims are to

1. Get the practical knowledge of MS Word, Ms Excel
2. Acquire practical knowledge about MS Power Point, MS Access and some applications

LIST OF PRACTICALS

MS Word
- Preparation of word document (Typing, aligning, Font Style, Font Size, Text editing, colorings, Spacing, Margins)
- Creating and Editing a table (Select no of rows, Select no of columns, row heading, column heading, column width, row width, row height, spacing text editing)
- Formatting a table (insert rows/columns, delete rows/columns, cell merging/splitting, Cell alignment)
- Preparation of letters using mail merge.
- Demonstration of Find, Replace, Cut, Copy and paste texts in a word document.

MS Excel
- Preparation of a Table using Excel.
- Creation of Charts, Graphs and Diagrams

MS Power Point
- Preparation of slides in power point.
- Creation of Animation Pictures.

MS Access
- Creation of simple reports using MS Access.

General
- Export a given graph from Excel to word.
- Sending an Email.
- Download a document from internet.
- Import a picture from internet to word document.
- Create a Power point presentation when a word document is given.
TEXT BOOK:

REFERENCE BOOKS:

COURSE OUTCOME
Acquire practical knowledge about MS-Word, MS-Excel, MS-PowerPoint and Ms-Access.

Note:
❖ This paper should be handled and valued by the faculty of Mathematics only.
❖ Both Internal and External Examiners for University Practical Examination should be appointed from faculty of Mathematics Department only
SEMESTER – IV
SBEC II – VISUAL BASIC PRACTICAL

Paper Code: 21UMACASP02  Max. Marks: 75

COURSE OBJECTIVE

The course aims are to
1. Get the practical knowledge of using command buttons, combo box, scroll bar and menu boxes
2. Acquire practical knowledge about factorial of a given number, smallest of given N numbers and other important problems in VB.

1. In VB, Create a project that displays the current data and time. Use VB Variable now and the format Library functions.

2. Write a program for the following List of Practical’s.
   o i) To enter and display text, using text box and command button.
   o To Convert temperature in Fahrenheit to Centigrade or Vice – Versa.
   o To Select any one from a list, U combo box to display choices.
   o To Calculate factorial of a given number.
   o To Illustrate the use of Timer control
   o To Illustrate the Usage of Scroll bars.
   o To Illustrate the Usage of Dropdown menus.
   o To Illustrate the Usage of Menu enhancement
   o To Illustrate the Usage of Pop – Up menu
   o To Illustrate the Usage of Input boxes
   o To find smallest of n numbers
   o To find the sine of angle
   o To Sort list of numbers in ascending/descending order.
   o To determine sum and average of given numbers.

COURSE OUTCOME

Acquire practical knowledge about the object oriented programming language (VB)
SEMESTER V
CORE IX – MODERN ALGEBRA

Paper Code: 21UMA09 / 21UMACA09  Max. Marks: 75

COURSE OBJECTIVE

1. Acquire knowledge about various groups.
2. Gain knowledge about Rings, Euclidean Rings and some special classes of Rings

UNIT - I
Group theory - Subgroups - A counting principle - Normal subgroups and Quotient groups.
Chapter 2 (sections 2.4, 2.5, and 2.6)

UNIT - II
Group theory - Homomorphisms – Automorphisms - Cayley’s theorem and Permutation groups.
Chapter 2 (sections 2.7, 2.8, 2.9 and 2.10)

UNIT – III
Ring theory - Definition and examples of Rings - Some special classes of Rings - Homomorphisms - Ideals and Quotient Rings - More ideals and Quotient Rings.
Chapter 3 (sections 3.1, 3.2, 3.3, 3.4 and 3.5)

UNIT – IV
Ring theory - The field of Quotients of an Integral Domain - Euclidean Rings - A particular Euclidean Ring.
Chapter 3 (sections 3.6, 3.7 & 3.8)

UNIT – V
Ring theory - Polynomial Rings - Polynomials over the Rational field - Polynomial Rings over commutative Rings.
Chapter 3 (sections 3.9 to 3.11)

TEXT BOOK:

REFERENCE BOOKS:
1. Dr. U.S. Rana, Mathematics for Degree students (B.Sc 3rd years), S.Chand 2012.

COURSE OUTCOME
On completion of the course, students should be able to

| CO 1 | Understand the concepts of various Subgroups and its applications |
| CO 2 | Acquire Knowledge about the concepts of homomorphisms, isomorphisms and automorphisms |
| CO 3 | Gain knowledge about the concepts of Rings and Quotient Rings |
| CO 4 | Analyse the concept of Field and Euclidean Ring |
| CO 5 | Analyse and demonstrate the properties of Polynomial Rings |
SEMESTER V
CORE X – REAL ANALYSIS - I

Paper Code: 21UMA10 / 21UMACA10
Max. Marks: 75

COURSE OBJECTIVE

Upon Completion of this course, the students will be able to know

- The concepts of Countability, least upper bound axiom.
- The concept of Convergence of Sequence.
- Basic concepts of series and tests for absolute convergence of the series.
- The concept of metric spaces and examples.
- Basic principles of continuous functions on a metric space.

UNIT – I

Section(1.4-1.7,2.1-2.4)

UNIT – II

Section(2.5-2.10)

UNIT – III

Section(3.1-3.4,3.6)

UNIT – IV
Series whose terms form a non increasing sequences-Summation by Parts-The class $l^2$-Limit of a function on a real line-Metric Spaces.

Section(3.7-3.10,4.1,4.2)

UNIT – V
Limits in Metric Spaces-Functions continuous at a point on the real line-Reformulation-Functions Continuous on a Metric Spaces-Open sets.

Section(4.3,5.1-5.4)

### COURSE OUTCOME

After completing the course the students are expected to know

- Understand basic concepts of sequence and series.
- Understand and prove various theorems.
- Understand the method to solve simple problems by applying concepts of Analysis.
SEMESTER V
CORE XI: OPERATIONS RESEARCH

Paper Code: 21UMA11 / 21UMACA11
Max. Marks: 75

COURSE OBJECTIVE
The main objective of the course is to enable the students to apply Mathematics in everyday situations and develop model of decision making problems that involve constraints and linear programs.

UNIT I: LINEAR PROGRAMMING PROBLEM
   Chapter 1: Sections 1.1 to 1.2, 1.9, Chapter 2: Sections 2.1 to 2.3, 2.5, 2.6 &
   Chapter 3: Sections 3.1, 3.3

UNIT II: LINEAR PROGRAMMING PROBLEM
   Chapter 3: Section 3.5 & Chapter 4: Sections 4.1 to 4.2, 4.5 to 4.7

UNIT III: TRANSPORTATION AND ASSIGNMENT PROBLEM
   Chapter 6: Sections 6.1 to 6.9 & Chapter 7: Sections 7.1 to 7.3

UNIT IV GAMES AND STRATEGIES
Introduction - Two person zero sum games-The Maximin-Minimax Principle - Games without saddle points- mixed strategies-Graphical solution of 2xn and m×2games-Dominance property
   Chapter 9: Sections 9.1 to 9.7

UNIT V SEQUENCING PROBLEMS
Sequencing problems – Introduction – Basic assumptions – problem with n jobs and2 machines – problems with n jobs with 3 machines – n jobs to be operated on m machines – problems with two jobs on m machines (graphical method)
   Chapter 10: Sections 10.1 to 10.5

TEXT BOOK:
REFERENCE BOOKS:
1. S.Kalavathy – OPERATIONS RESEARCH – Second edition, year of publication 2002, Vikas publishing house, New Delhi,

COURSE OUTCOME
- On successful completion of this course students will be able to
- Formulate simple reasoning and learning optimization problems.
- Analyze a problem and can select a suitable strategy.
- Apply an appropriate method to obtain the solution to a problem.
- Manipulate the basic mathematical structures underlying these methods.
- Evaluate analytically the limitations of these methods.
SEMESTER V
CORE XII - MECHANICS

Paper Code: 21UMA12 / 21UMACA12

Max. Marks: 75

COURSE OBJECTIVE

To enable the students to know about the concepts of types of forces, moments, friction, projectiles, impulsive forces and collision of elastic bodies and simple harmonic motion.

UNIT I

Chapter II: sections 1 to 9, Chapter III: sections 1 to 12.

UNIT II

Chapter VII: section 1 to 12.

UNIT III

Projectiles: Definitions – Two fundamental principles – The path of a projectile is a parabola – Characteristics of the motion of a projectile – Range on an inclined plane.

Chapter VI: Sections 6.1 to 6.8, 6.12 to 6.16

UNIT IV

Chapter – VII Sections 7.1 to 7.6, Chapter – VIII Sections 8.1 to 8.9

UNIT V

Chapter – X Sections 10.1 to 10.5, 10.11 – 10.16
TEXT BOOK:

REFERENCE BOOK:

COURSE OUTCOME

<table>
<thead>
<tr>
<th>CO1</th>
<th>To recollect the basic concept of forces and understand the Varignon’s theorem.</th>
</tr>
</thead>
<tbody>
<tr>
<td>CO2</td>
<td>To understand the laws of friction and equilibrium of a particle on a rough inclined plane under a force</td>
</tr>
<tr>
<td>CO3</td>
<td>To understand the path of a projectile is a parabola and to apply the concept of projectile.</td>
</tr>
<tr>
<td>CO4</td>
<td>To understand the impulse and impulsive force and to gain knowledge about collision of elastic bodies.</td>
</tr>
<tr>
<td>CO5</td>
<td>To understand the geometrical representation of simple harmonic motion and solve the problems on the seconds pendulum.</td>
</tr>
</tbody>
</table>
SEMESTER V
SBEC III – QUANTITATIVE APTITUDE
Paper Code: 21UMACAS03 Max. Marks: 75

COURSE OBJECTIVE

- To enhance the problem-solving skills.
- To improve the basic mathematical skills to help students who are preparing for any type of competitive examinations.
- To develop knowledge in practicing quantitative aptitude objective type question and answer in individual for competitive exams, entrance exams and interviews.

UNIT- I

UNIT- II
Square Roots and Cube Roots, Averages.

UNIT- III
Percentages, Ratio and proportion.

UNIT- IV
Time and Distance, Problems on Train, Boat and Stream.

UNIT- V
Height and Distance, Odd Man out and Series.

TEXT BOOK:
1. Dr. R.S. Aggarwal, Quantitative Aptitude, S. Chand and Company Ltd., NewDelhi, Reprint 2013.

REFERENCE BOOK:

COURSE OUTCOME

After completion of this course, students will be able to
- Make sense of problems, develop strategies to find solutions and persevere in solving them.
- Use appropriate technology in a given context.
- Solving the problem on time and work, time and distance, boat and stream.
- Solving the problem on height and distance, odd man out.
EMESTER VI
CORE XIII: LINEAR ALGEBRA

Paper Code: 21UMA13 / 21UMACA13

Max. Marks: 75

COURSE OBJECTIVE

- To learn about Linear dependence, Bases and Dimension.
- To provide basic knowledge of Linear Transformations and Matrix representation.
- To introduce Inner product Spaces.

UNIT – I
(Chapter 1: Sections 1.1 - 1.6)

UNIT – II
Linear Transformations and Matrices: Linear Transformations, Null spaces and Ranges – The Matrix representation of a Linear Transformation – Composition of Linear Transformations and Matrix Multiplication – Invertibility and Isomorphisms
(Chapter 2: Sections 2.1 - 2.4)

UNIT – III
(Chapter 3: Sections 3.1 - 3.3)

UNIT – IV
(Chapter 6: Sections 6.1 - 6.3)

UNIT – V
Normal and Self adjoint operators – Unitary and Orthogonal operators and their Matrices (Excluding orthogonal operators on \( \mathbb{R}^2 \))-Orthogonal Projections and The Spectral theorem.
(Chapter 6: Sections 6.4 - 6.6)

TEXT BOOK:

REFERENCE BOOKS:

COURSE OUTCOME

After completion of the course, the students will be able to

| CO 1 | Find the linear dependence and independence, dimension of spaces. |
| CO 2 | Know the concepts of null spaces, range and Matrix representation of a linear transformation. |
| CO 3 | Solve System of Linear equations by using Rank. |
| CO 4 | Understand about Inner Product Spaces. |
| CO 5 | Compute the orthogonal projection of a vector. |
COURSE OBJECTIVE

On Successful Completion of the course, the students will be able to

- Understand closed sets, Connected sets totally bounded sets.
- Understand the concepts of Complete, Compact metric spaces and uniform continuity.
- Understand the classical theory of Riemann Integration.
- To know how to apply Rolle’s Theorem, Fundamental theorem of calculus.
- Understand the basic concepts of Uniform convergence and its applications.

UNIT – I
Closed Sets - Discontinuous functions on $\mathbb{R}^1$-More about Open sets-Connected sets-
Bounded sets & Totally bounded sets.
Section (5.5, 5.6, 6.1-6.3)

UNIT – II
Complete Metric spaces - Compact Metric spaces- Continuous functions on Compact
Metric spaces - Continuity of the inverse functions - Uniform Continuity.
Section (6.4 - 6.8).

UNIT – III
Sets of Measure Zero - Definition of the Riemann Integral-Existence of the Riemann
Integral -Properties of the Riemann Integral - Derivatives.
Section (7.1 - 7.5)

UNIT – IV
Rolle’s theorem- The law of the mean-Fundamental theorems of calculus-Improper
integral- Improper integral (continued).
Section (7.6-7.10)

UNIT – V
Point wise convergence of sequences of functions-Uniform convergence of sequences
of functions- Consequences of Uniform convergence- Convergence and Uniform convergence
of Series of functions-Integration and differentiation of series of functions
Section (9.1 - 9.5)

COURSE OUTCOME

After completing the course the students will be able to

- Understand concepts of connectedness, completeness and compactness of metric spaces.
- Understand basic concepts of Riemann Integration and solving simple problems.
- Solving problems by using theorems on derivatives.
SEMESTER VI
CORE XV: COMPLEX ANALYSIS

Paper Code: 21UMA15 / 21UMACA15 Max. Marks: 75

COURSE OBJECTIVE
- To enable the students to identify Analytic functions
- To enrich the knowledge on Cauchy Integral formula and Fundamental theorems.
- To introduce the concepts of Singularities and Residues.

UNIT-I

(Chapter 1: Sections 12,15 to 19,21 to26).

UNIT-II

(Chapter 4: Sections 39 to 41,46 to 51,53).

UNIT-III

(Chapter 5: Sections 55 to 62)

UNIT-IV

(Chapter 6 :Sections 68 to 76).

UNIT-V

(Chapter 8: Sections 90 to 94, Chapter 9: Sections 101 to 103).

TEXT BOOK

</table>
SEMESTER VI
CORE XVI: GRAPH THEORY

Paper Code: 21UMA16 / 21UMACA16

Max. Marks: 75

COURSE OBJECTIVE
- To understand the basic concepts of graph theory, vertex connectivity and edge connectivity in graph.
- To understand the concept of Euler Graphs and Hamilton Graphs.
- To understand the concept of trees and matrices in Graphs like incidence matrix, adjacency matrix etc.,
- To understand the concept of directed graphs, directed paths and Euler Digraphs.

UNIT – I
Introduction - Definition - Application of Graphs- Finite and Infinite Graphs- Incidence and Degree- Isolated Vertex- Pendant vertex- Null Graph. Paths and circuits- Isomorphism- Sub graphs- A puzzle with multicolored Cubes -Walks, Paths and Circuits.
Chapter 1: Sections: 1-2, 1-3, 1-4 and 1-5.
Chapter 2: Sections: 2-1, 2-2, 2-3.

UNIT – II
Chapter 2: Sections: 2-4, 2-5, 2-6, 2-7, 2-8, 2-9 and 2-10.

UNIT – III
Chapter 3: Sections: 3-1, 3-2, 3-3, 3-4, 3-5, 3-6, 3-7 and 3-8.

UNIT – IV
Chapter 7: Sections: 7-1, 7-2, 7-3 and 7-4, 7-8, 7-9.

UNIT – V
Directed Graphs: Definitions- Types of Digraphs- Digraph and Binary Relations- Directed Paths and Connectedness- Euler Digraphs- Trees with Directed Edges.

TEXT BOOK:
1. Narasingh Deo, Graph Theory with application to Engineering and Computer Science, Prentice – Hall of India Private Limited, New Delhi.
REFERENCE BOOK:

3. John Clark, A First Look at Graph Theory, Allied Publication Ltd, Madras

COURSE OUTCOME

After completing the course, Students will be able to

- Formally understand and prove theorems and lemmas.
- Apply theoretical knowledge acquired to solve realistic problems in real life.
- Apply principles and concepts of graph theory in practical situations and to improve the proof writing skills.
SEMESTER – VI
SBEC – IV: LATEX PRACTICALS

Paper Code: 21UMACASP04 Max. Marks: 75

COURSE OBJECTIVE

The course aims are to

1. Acquire practical knowledge about left, right, centre and justify.
2. Write latex programs like typing a given article, question paper. Mathematical expressions, own Bio data etc

LIST OF PRACTICALS

Write Latex program for the following

1. Type a Document in different alignments (Left, Right, Center and Justify).
2. Type a Letter for applying a job.
3. Type your own Bio – Data.
4. Draw a Table structure.
5. Type a given Mathematical expression using Differentiation, Integration and Trigonometry.
6. Type a given Mathematical expression using all expression.
7. Type a given expression using all inequalities.
8. Type of given Article.
10. Type a given Question paper
11. Convert one Latex file into power point presentation.

TEXT BOOKS

REFERENCE BOOKS

COURSE OUTCOME

After completion of the course, the students will be able to

CO 1 Make different Alignments in a document and an Application for a job.
CO 2 Generate Bio-Data, and Table Structures.
CO 3 Create Mathematical Statements using LaTex.
CO 4 Prepare Articles and Inserting Pictures.
CO 5 Prepare Question paper and PowerPoint presentation in LaTeX format.

Note:

- This paper should be handled and valued by the faculty of Mathematics only.
- Both Internal and External Examiners for University Practical Examination should be appointed from faculty of Mathematics only.
ELECTIVE COURSE – I
GROUP A
ELECTIVE – DISCRETE MATHEMATICS
Paper Code: 21UMAE01 Max. Marks: 75

COURSE OBJECTIVE
The course aims to
1. gain knowledge about the concepts of Mathematical logic and algebraic structures.
2. know about the relations, functions and axioms related to natural numbers.
3. understand the concepts of Lattices and Boolean Algebra.

UNIT – I
Chapter 1 (sections 1.1, 1.2.1 to 1.2.4, 1.2.6 to 1.2.8)

UNIT – II
Chapter 1 (sections 1.3.1 to 1.3.5, 1.4.1, 1.4.2)

UNIT – III
Chapter 2 (sections 2.3.1, 2.3.2, 2.3.8, 2.3.9, 2.4.1 to 2.4.3, 2.5.1)

UNIT – IV
Algebraic systems: Definition and examples – Semi-groups and Monoids: Definition and examples – Homomorphism of Semi-groups and Monoids – Sub semi-groups and Submonoids.
Chapter 3 (sections 3.1.1, 3.2.1, 3.2.2 and 3.2.3)

UNIT – V
Lattices as partially ordered sets: Definition and examples – Some properties of Lattices – Sub lattices, direct product and Homomorphism – Boolean Algebra: Definition and examples – Sub Algebra, Direct product and Homomorphism.
Chapter 4 (sections 4.1.1, 4.1.2, 4.1.4, 4.2.1, 4.2.2)

TEXT BOOK:

REFERENCE BOOKS:
1. Dr.M.K. Sen and Dr. B.C. Charraborthy, Introduction to Discrete Mathematics, Arunabha Sen Books & allied Pvt.Ltd, 8/1, Chintamoni Das Lane, Kolkatta – 700 009.
**COURSE OUTCOME**

On completion of the course, students should be able to

<table>
<thead>
<tr>
<th>CO 1</th>
<th>Recall the various concepts of Mathematical Logic</th>
</tr>
</thead>
<tbody>
<tr>
<td>CO 2</td>
<td>Understand the concepts of different types of normal forms</td>
</tr>

GROUP A
ELECTIVE – ASTRONOMY

Paper Code: 21UMAE02
Max. Marks: 75

COURSE OBJECTIVE
This paper focuses on enabling the students to learn about the solar system, its components and interesting facts about the solar system.

UNIT – I
Chapter 16 Sections: 316-326. Pg.No : 455 –467

UNIT - II
Chapter 16 Sections: 327-329. Pg.No : 467 –472

UNIT – III
Chapter 17 Sections: 339–345. Pg.No : 481-489

UNIT – IV
The Milky Way: Introduction - Seasonal changes in the night sky - The winter Constellations - The spring Constellations.
Chapter 17 Sections: 346–347. Pg.No : 489 –497

UNIT – V
Constellations: Introduction - The summer Constellations - The autumn Constellations.
Chapter 17Sections:347. Pg.No : 497 –504

TEXT BOOK:

REFERENCE BOOK:

COURSE OUTCOME
• Gain knowledge about solar system.
• Gain knowledge about double & multiple stars.
GROUP A
ELECTIVE – JAVA PROGRAMMING

Paper Code: 21UMAE03
Max. Marks: 75

COURSE OBJECTIVE

- Programming in the JAVA Programming language.
- Knowledge of object – oriented paradigm in the JAVA Programming language.
- The use of JAVA in a variety of technologies and on different platforms.

UNIT – I

UNIT – II

UNIT – III
Classes – Objects and Methods – Arrays – Strings – Interfaces – Multiple inheritance.

UNIT – IV
Packages – Multi-threaded Programming – Managing Errors and Exceptions.

UNIT – V

TEXT BOOK

REFERENCE BOOKS

COURSE OUTCOME

- Understand fundamentals of programming such as Variables, Conditional and iterative execution, methods etc.

- Understand fundamentals of object–oriented Programming in JAVA, including defining classes, invoking methods, using class libraries, utilities in applets etc.

- Be aware of the important topics and principles of software development.

- Have the ability to write a computer program to solve specified problems.

- Be able to use the JAVA SDK environment to create, debug and run simple JAVA programs.

NOTE:

- This paper should be handled and valued by the faculty of Mathematics only.

- Both Internal and External Examiners for University Practical Examination should be appointed from faculty of Mathematics only.
ELECTIVE COURSE – II
GROUP B
ELECTIVE – FUZZY SETS AND FUZZY LOGIC
Paper Code: 21UMAE04 Max. Marks: 75

COURSE OBJECTIVE

- To understand uncertainty
- Fuzzy logic attempts to emulate reasoning and decision making in an uncertain environment
- Knowledge in set theory

UNIT – I

Chapter 1: 1.1 – 1.5 & Chapter 2: 2.1 – 2.3

UNIT – II

Chapter 3: 3.1 – 3.6

UNIT – III

Chapter 4: 4.1 – 4.6

UNIT – IV

Chapter 5: 5.1 – 5.10

UNIT – V

Chapter 8: 8.1 – 8.8

GROUP B
ELECTIVE – Formal Languages and Automata Theory

Paper Code: 21UMAE05
Max. Marks: 75

COURSE OBJECTIVE

- This course will give an introduction to formal languages and automata theory. Automata and formal languages appear (possibly in various disguises) in almost every branch of computer science.
- The purpose of this course is to acquaint the student with an overview of the theoretical foundations of computer science from the perspective of formal languages.

UNIT – I
Fundamentals: Strings, Alphabet, Language, Operations, Finite state machine, definitions, finite automaton model, acceptance of strings, and languages, deterministic finite automaton and non-deterministic finite automaton, transition diagrams and Language recognizers.

Finite Automata: NFA with Î transitions - Significance, acceptance of languages. Conversions and Equivalence: Equivalence between NFA with and without Î transitions, NFA to DFA conversion, minimisation of FSM, equivalence between two FSM’s, Finite Automata with output- Moore and Melay machines.

UNIT – II
Regular Languages: Regular sets, regular expressions, identity rules, Constructing finite Automata for a given regular expressions, Conversion of Finite Automata to Regular expressions. Pumping lemma of regular sets, closure properties of regular sets (proofs not required).

Grammar Formalism: Regular grammars-right linear and left linear grammars, equivalence between regular linear grammar and FA, inter conversion, Context free grammar, derivation trees, sentential forms. Rightmost and leftmost derivation of strings.

UNIT – III

Push Down Automata : Push down automata, definition, model, acceptance of CFL, Acceptance by final state and acceptance by empty state and its equivalence. Equivalence of CFL and PDA, interconversion. (Proofs not required). Introduction to DCFL and DPDA.

UNIT – IV
Turing Machine: Turing Machine, definition, model, design of TM, Computable functions, recursively enumerable languages. Church’s hypothesis, counter machine, types of Turing machines (proofs not required).

UNIT – V
Computability Theory: Chomsky hierarchy of languages, linear bounded automata and context sensitive language, LR(0) grammar, decidability of, problems, Universal Turing Machine, undecidability of posts. Correspondence problem, Turing reducibility, Definition of P and NP problems, NP complete and NP hard problems.
TEXT BOOKS

REFERENCE BOOK

   (https://www.ucursos.cl/ingenieria/2010/2/CC3102/1/material_docente/bajar?id_material=322214)

COURSE OUTCOME

- Gain knowledge about the Grammars, Languages and Automata Theory.
- Understanding the features of Turning Machine and Computability Theory
GROUP B
ELECTIVE – C++ PROGRAMMING

Paper Code: 21UMAE06
Max. Mark: 75

COURSE OBJECTIVE

The Course aims are to

1. Understanding about object-oriented programming
2. Create and process data in files using I/O functions
3. Understand about constructors which are special type of functions.

UNIT- I

Chapter 1: Sec.1.5, Chapter 3: Sec 3.1 – 3.24
Chapter 4: Sec 4.1- 4.11

UNIT- II
Classes & Objects.
Chapter 5: Sec.5.1 – 5.16

UNIT- III
Constructors & Destructors.
Chapter 6: Sec 6.1 – 6.11

UNIT- IV
Operator Overloading – Type Conversions.
Chapter 7: Sec.7.1 – 7.8

UNIT- V
Inheritance & Extending classes – Pointers, Virtual Functions and Polymorphism.

Chapter 8: Sec.8.1 – 8.12, Chapter 9: Sec.9.1 – 9.3, 9.5 – 9.7

TEXT BOOK:

COURSE OUTCOME

- Understand the Basic concepts of object-oriented programme, Expressions, control structures, Classes and objects.

- Understand dynamic memory management techniques using constructors, destructors, etc.

- Understand the concept of function overloading, operator overloading, virtual functions and polymorphism.

- Demonstrate the use of various OOPs concepts with the help of programs.
ALLIED MATHEMATICS
(For B.Sc. PHYSICS / B.SC COMPUTER SCIENCE / B.SC. CHEMISTRY)

SEMESTER - I / III
ALLIED MATHEMATICS – I
ALGEBRA AND CALCULUS

Paper Code: 21UMAA01 Max. Marks: 75

COURSE OBJECTIVE

• To learn the basic concepts and problem solving in Theory of equations.

• Develop the ability of solving the Integrals.

UNIT – I: Theory of Equations:

- Imaginary roots - Irrational roots - Formation of equations - Solution of equations - Diminishing the roots of an equation & solutions - Removal of the second term of an equation & solutions - Descarte’s rule of sign - Problems only.

UNIT – II: Matrices:

- Definition of Characteristic equation of a matrix - Characteristic roots of a matrix - Eigen values and the corresponding Eigen vectors of matrix — Cayley Hamilton theorem (Statement only) — Verifications of Cayley Hamilton Theorem — Problems only.

UNIT – III: Radius of Curvature:

- Formula of Radius of Curvature in Cartesian coordinates, Parametric coordinates and Polar coordinates (no proof for formulae) - Problems only.

UNIT – IV: Partial Differential Equations:

- Formation of Partial Differential Equations by eliminating the arbitrary constant and arbitrary functions - Lagrange’s Linear Partial Differential Equations - Problems only.

UNIT – V: Integration:

- Definite Integral: Simple properties of definite Integrals - Bernoulli’s Formula - Integration by parts - Simple problems; Reduction formula for \( \int_0^\pi \sin^n x \, dx, \int_0^\pi \cos^n x \, dx, \int_0^\infty e^{-x} \, dx, \int x^n e^{ax} \, dx \) simple problems

TEXT BOOK:

1. Dr P R .Vittal ,Allied Mathematics, Margham publication, Chennai-17, Reprint 2012
REFERENCE BOOK:

COURSE OUTCOME

On completion of the course, students should be able to

| CO 1 | Know the application of relations between the roots and coefficients of an equation and diminishing the roots of an equation |
| CO 2 | Ability to solve the consistency of linear equations and application of Cayley-Hamilton theorem |
| CO 3 | Understanding the concepts of Cartesian co-ordinates, parametric co-ordinates and polar co-ordinates. |
| CO 4 | Understand the basic properties of PDE. |
| CO 5 | Gain the skill to solve problems. |
SEMESTER II/IV

ALLIED MATHEMATICS – II

DIFFERENTIAL EQUATIONS AND LAPLACE TRANSFORMS

Paper Code: 21UMAA02

Max. Marks: 75

COURSE OBJECTIVE

- Develop the basic concepts of Maxima and Minima of two variables and Numerical methods problems.
- To learn the second order differential equation with constant coefficients.
- To learn the basic concepts of Laplace Transforms, Inverse Laplace Transforms & Applications.

UNIT – I

Jacobian and Maxima & Minima: Jacobian of two variables and three variables - Maxima and Minima of functions of two variables - Problems only.

UNIT – II

Finite Differences: First difference - Higher differences - Construction of difference table - Interpolation of missing value-Newton's Forward and Newton's Backward difference formula (no proof)-Lagrange's Interpolation formula (no proof)- simple problems only.

UNIT – III

Second Order Differential Equations: Second Order Differential Equations with constant coefficients- Complementary function-particular Integral and Solution of the type: $e^{ax}$, $x^n$, $\cos ax$ (or) $\sin ax$, $e^{as}x^{bs}$, $e^{as}\sin bx$, $e^{as}\cos bx$ - only

UNIT – IV

UNIT – V

Inverse Laplace Transforms: Standard formula - Elementary theorems (no proof) - Applications to solutions of second order differential equations with constant coefficients - Simple problems.

SEMESTER - II / IV

ALLIED MATHEMATICS - III – PRACTICALS

COURSE OBJECTIVE

- Acquire knowledge about Matrices and Cayley-Hamilton Theorem.
- Understand the concepts of differentiation and Vector point functions.

UNIT I: Matrices:

Rank of Matrix – Problems upto (3x3) Matrix - Characteristic equation of a Matrix - Cayley Hamilton Theorem (statement only)-Problems to verify Cayley Hamilton Theorem.

UNIT II: Leibnitz formula for $n^{th}$ derivative:

Leibnitz formula (without proof) for $n^{th}$ derivative- Problems (Page no. 8.23 to 8.39 of the Text Book).

UNIT III: Partial Differentiation:

Euler's theorem on homogeneous function (without proof)- Problems to verify Euler's theorem-Partial derivative - problems (Page no. 9.1 to 9.13 and 9.18 to 9.27 of the Text Book).

UNIT IV: Scalar and Vector point functions:

Scalar point functions -Gradient of scalar point functions - Vector point functions - Problems only.

UNIT V: Divergence and Curl of Vector point functions:

Divergence of vector point functions - Curl of vector point functions -Solinoideal of vector - Irrotational of vector - Problems only.

TEXT BOOK:

1. Dr.P.R.Vittal, Allied Mathematics, Margham publication, Chennai-17, Reprint 2012

REFERENCE BOOK:

1. S.G.Venkatatalapathe, Allied Mathematics, Margham publication, Chennai-17, Reprint 2011.

COURSE OUTCOME

- Gain the skill to solve the problems in Matrices.
- Gain knowledge to solve the problems in partial differentiation.
- Gain knowledge on the concept of divergence, curl and integration of vector point functions
NOTE:

1) University Examination will be conducted at the end of Second Semester/Fourth Semester,

2) **Two Teaching Hours** for Unit – I, II and III in the First Semester/Third Semester and **two Hours** for Unit
   – IV and V in the Second Semester/Fourth Semester.
SEMESTER III
NON MAJOR ELECTIVE COURSE – I
QUANTITATIVE APTITUDE- I

Paper Code: 21UMAN01
Max. Marks: 75

COURSE OBJECTIVE

- To enhance the problem-solving skills.
- To improve the basic mathematical skills to help students who are preparing for any type of competitive examinations.
- To develop knowledge in practicing quantitative aptitude objective type question and answer in individual for competitive exams, entrance exams and interviews.

UNIT – I

UNIT – II
Decimal Fractions,
Square Roots and Cube Roots.

UNIT – III
Averages and Problems on Ages.

UNIT – IV
Surds and Indices, Percentages

UNIT – V
Ratio and proportion, Chain Rule.

TEXT BOOK:

1. Dr. R.S. Aggarwal, Quantitative Aptitude, S. Chand and Company Ltd., New Delhi, Reprint 2013.

REFERENCE BOOK:

COURSE OUTCOME

After completion of this course, Students will be able to

2. Make sense of problems, develop strategies to find solutions and persevere in solving them.

3. Use appropriate technology in a given context.

4. Critique and evaluate quantitative arguments that utilize mathematics, statistical and quantitative information.

5. Solve problems in numbers, decimal fractions, square root and cube roots.
SEMESTER IV
NON MAJOR ELECTIVE COURSE – II
QUANTITATIVE APTITUDE – II
Paper Code: 21UMAN02 Max. Marks: 75

COURSE OBJECTIVE

1. To enhance the problem-solving skills.
2. To improve the basic mathematical skills to help students who are preparing for any type of competitive examinations.
3. To develop knowledge in practicing quantitative aptitude objective type question and answer in individual for competitive exams, entrance exams and interviews.

UNIT – I
Time and Work, Time and Distance.

UNIT – II
Problems on trains, Boat and streams.

UNIT – III
Alligation or mixture, Logarithms

UNIT – IV
Volume and Surface Areas, Calendar, Clocks.

UNIT – V
Height and Distances, Odd Man Out and Series.

TEXT BOOK:

1. Dr. R.S. Aggarwal, Quantitative Aptitude, S. Chand and Company Ltd., New Delhi, Reprint 2013.

REFERENCE BOOK:

COURSE OUTCOME

After completion of this course, Students will be able to,

- Make sense of problems, develop strategies to find solutions and persevere in solving them.
- Use appropriate technology in a given context.
- Solving the problem on time and work, time and distance, boat and stream.
- Solving the problem on logarithms, volume and surface area, height and distance, odd man out.
