PERIYAR UNIVERSITY

PERIYAR PALKALAI NAGAR

SALEM- 636011

DEGREE OF BACHELOR OF SCIENCE

CHOICE BASED CREDIT SYSTEM

Syllabus for B.Sc., Forensic Science

(SEMESTER PATTERN)

(For Candidates admitted in the College affiliated to Periyar University from 2023-2024 onwards)

B.Sc., Forensic Science Syllabus

REGULATIONS

1. Eligibility for Admission:

Candidate seeking admission to the first year degree of Bachelor of Science in Forensic Science shall be required to have passed the Higher Secondary Examination conducted by the Government of Tamilnadu or any other examination accepted by the syndicate of Periyar University, subject to such condition as, may be prescribed thereto, are permitted to appear and qualify for B.Sc, Degree of this University after a course of three academic years.

2. Eligibility for award of degree:

A Candidate shall be eligible for the award of degree only if he/she has undergone, the prescribed course of study in a college affiliated to the University for a period not less than three academic years, comprising six Semester and passed the examination prescribed and full filled such condition as have been prescribed there for

3. COURSEOFSTUDY ANDSCHEME OFEXAMINATION

The course of study shall comprise instruction in the following subjects according to the syllabus and books prescribed from time to time. The scheme of examination of the different semester shall be as follows;

Total Marks:	4400
Part I:	400
Part II:	400
Part III:	2300
Part IV:	1300
Total Credits:	140
Total Credits: Part I:	140 12
Part I:	12

Progra	mme Outcomes (POs)
On suc	cessful completion of the B.Sc. Forensic Science.
PO1	Exhibit good domain knowledge and completes the assigned responsibilities
	effectively and efficiently in par with the expected quality standards.
PO2	Apply analytical and critical thinking to identify, formulate, analyze, and solve
	complex problems in order to reach authenticated conclusions
PO3	Design and develop research based solutions for complex problems with
	specified needs through appropriate consideration for the public health, safety,
	cultural, societal, and environmental concerns.
PO4	Establish the ability to Listen, read, proficiently communicate and articulate
	complex ideas with respect to the needs and abilities of diverse audiences.
PO5	Deliver innovative ideas to instigate new business ventures and possess the
	qualities of a good entrepreneur
PO6	Acquire the qualities of a good leader and engage in efficient decision-making.
PO7	Graduates will be able to undertake any responsibility as an individual/member of
	multidisciplinary teams and have an understanding of team leadership
PO8	Function as socially responsible individual with ethical values and accountable to
	ethically validate any actions or decisions before proceeding and actively contribute
	to the societal concerns.
PO9	Identify and address own educational needs in a changing world in ways
	sufficient to maintain the competence and to allow them to contribute to the
	advancement of knowledge
PO10	Demonstrate knowledge and understanding of management principles and
	apply these to one own work to manage projects and in multidisciplinary
	environment.

- > To emphasize the importance of scientific methods in crime detection.
- > To disseminate information on the advancements in the field of forensic science.
- > To highlight the importance of forensic science for perseverance of the society.
- To generate talented human resource, commensurate with latest requirements of forensic science.
- > To review the steps necessary for achieving highest excellence in forensic science.
- To provide a platform for students and forensic scientists to exchange views, chalkout collaborative programs and work in a holistic manner for the advancement of forensic science.

Programme Educational Objectives (PEOs)

The B.Sc., Forensic Science program describe accomplishments that graduates are expected to attain within five to seven years after graduation.

PEO1	Expertise with the knowledge forensic activities.
PEO2	Handle forensic laboratory methodologies with respect to the examination and analysis of evidence.
PEO3	Develop oral communication skills for discussing the scientific method in a laboratory setting and effectively testifying in a court of law.
PEO4	To analytically educate the necessity to understand the impact of cybercrimes and threats with solutions in a global context.

Programm	Programme Specific Outcomes (PSOs)					
After the s expected to	uccessful completion of B.Sc forensic Science program the students are					
PSO1	Impart education with domain knowledge effectively and efficiently in par with the expected quality standards for forensic science professional.					
PSO2	Ability to apply the mathematical, technical and critical thinking skills in the forensic investigations.					
PSO3	Ability to involve in life-long learning and adopt fast changing technology to prepare for professional development.					
PSO4	Expose the students to learn the important of forensic science and criminology such as basic for forensic psychology, forensic chemistry, forensic toxicology, and forensic anthropology.					
PSO5	Inculcate effective communication skills combined with professional & ethical attitude.

		Total	30	21			

Note:

- 1. Skill enhancer: Internship 1 and 2student will be complete the internship in the summer vacation. The report should be submit as per format and review will be conducted the end of the third and fifth semester respectively.
- 2. Field visit: students to visit the crime investigation department and have to collect the investigation procedure and submit the report.

Core Elective: I (any one)

- 1. Anthropology
- 2. Criminal law and special law
- 3. Criminal procedure and evidence

Core Elective: II (any one)

- 1. Accident investigation
- 2. Contemporary Crimes
- 3. Technological methods in Forensic science

Core Elective: III (any one)

- 1. Forensic ballistics
- 2. Forensic Toxicology

SEMESTER – II

Course Code	23UFS03	FORENSIC PSYCHOLOGY	L	Т	Р	C
Core/elective/Su	upportive	Core: 3	5	1	0	5
Pre - requ	isite	• Basic concepts of psychology and its scope				
		Course Objectives				
• The basic co	ncepts of Psych	nology and its scope				
• The various	perspectives of	Psychology				
• The element	s of brain and n	nervous system				
		Expected Course Outcomes				
1 To describe	key concepts, p	principles and overarching themes in Psychol	ogy			K3
2 To develop	a working know	wledge of Psychology's content domains				K5
3 To describe	applications of	Psychology				K3
		ncepts of brain and its components				K2
		erstand K3 – apply K4- Analyze K5 – eval	uate	K6- (Create	
UNIT – I		BASIC OF PSYCHOLOGY			12 H	Iours
Definition, goals an	d scope of Psy	chology. Role of psychologist in society. Pe	erspe	ctives	- Biol	ogica
Psychodynamic, Be	haviouristic, H	Iumanistic, Evolutionary and Cognitive. Su	bfiel	ds of	Psych	ology
Scope of Forensic P	sychology. Dut	ties and responsibilities of Forensic Psycholog	gist.			
UNIT II		NERVOUS SYSTEM			12 H	Iours
Nervous system- In	troduction, Cla	ssification. Structure of brain and its parts. S	Signi	ficanc	e of le	eft an
right brain. Structu	re and psychol	logical importance in thought and languag	e. N	euron	s- Stri	ucture
Neural impulse gene	eration and tran	smission, neurotransmitters and their function	n.			
UNIT-III		COGNITION			12 F	Iours
	nition. Sensatio	on- Processes in sensation, types- receptors i	nvol	ved in		
C		ditory, gustatory, olfactory, tactile and other				
Sensory threshold, A					, aaap	
UNIT -						
IV		ATTENTION			12 H	Iours
Attention- Introduc	ction, definitio	n, characteristics, selective and divided	atter	ntion.	Perce	eption
		Descrete of managering Douth managering	con	stance	1 mou	emen
Introduction, definit	tion, Gestalt lav	ws. Process of perception- Depth perception,	COIL	stancy	, mov	

percept	ion.	
UNIT	V THINKING & INTELLIGENCE	12 Hours
Thinki	ng- Introduction, definition, theories- information processing theory, SR theory	ry, cognitive
theory,	simulation models. Types- free association, imaginal thought, reasoning, prob	lem solving,
decisio	n-making, creative thinking, concept formation, language. Intelligence- Introductio	n, definition,
theorie	s- factor theories, cognitive models of intelligence. Intelligence tests characteristic	cs and types.
Externa	al and internal influences.

Сог	re/elective/	/Supportive	Core:12	0	0	5	8						
	Pre - requisite Students should have the strong knowledge in forensic evidence data collection, examine procedures.												
	Course Objectives												
1. Pro	1. Provide an in-depth exploration of a topic of special interest.												
2. Ac	2. Acquire knowledge on the chosen topic and apply the knowledge, experience, and skills learned												
in the	in the Law and Justice programme to the chosen topic.												
		1 0	L	ackno	wledg	the	m in						
3. Apply various research techniques, find suitable sources of information, and acknowledge them in the research project.													
	1 .	5	cative skills to present research on Law and Justic	e Issi	les.								
	<u> </u>		Expected Course Outcomes										
On th	ne successf	ul completion o	of the course, student will be able to:										
1			lent research on Law and Justice Topics.				K2						
2	Create a v	arious investig	ation ideas to finding the evidence				K6						
3	Apply the	students vario	us angle on the crime cases.				K3						
4	Effectivel	y present and d	lefend your research orally.				K5						
5 Produce a thesis of publishable quality. K5													
	K1 – Rem	ember K2 – U	Inderstand K3 – apply K4- Analyze K5 – evalu	ate K	6- Cr	eate							
			ased on a research topic in Forensic Science/Cri				opic						
will be assigned in consultation with police and forensic science establishments, giving due													
cons	sideration	to the problem	areas faced by these institutions. The students	will	be ex	pecte	d to						

undertake extensive fieldwork, in collaboration with mobile police laboratories. The students will undertake certain projects pertaining to Digital and Cyber Forensics and DNA Analysis. The projects will be assigned in consultation with respective departments experts.

Aim of the project work

1. The aim of the project work is to acquire practical knowledge on the implementation of the forensic concepts studied.

2. Examining evidence from a crime scene using strictly scientific knowledge and principles in order to find facts about a criminal case.

3. Each student should carry out individually one project work and it may be a work using the cyber forensic software packages or DNA typing or Serology, etc.

4. That they have learned, the implementation of concepts from the papers studied, or implementation of any innovative idea focusing on application oriented concepts.

Viva Voce

1. Viva-Voce will be conducted at the end of the year by both Internal (Respective Guides) and External Examiners, after duly verifying the Annexure Report available in the College, for a total of

200 marks at the last day of the practical session.

2. Out of 200 marks, 160 marks for project report and 40 marks for Viva Voce.

			nent and role of forensic odontology in mass		-	-				
and the	eir compa	arative anatomy	. Estimation of age from teeth Bite marks-	Intro	oducti	on, Fo	orensic			
signific	cance of l	bite marks. Coll	ection, preservation and photography of bite	mark	as evid	dence.	Legal			
aspects	of bite m	narks.								
UNIT-			PERSONAL IDENTIFICATION				Hours			
Person	al Identif	ication – Somat	oscopy. Somatoscopy – observation of hair or	n hea	ud, for	ehead	, eyes,			
root of	f nose, 1	nasal bridge, na	asal tip, chin, Darwin's tubercle, ear lobes	, su	pra-or	bital	ridges,			
physio	gnomic ea	ar breadth, circui	nference of head. Scar marks and occupational	mar	ks					
UNIT	-IV	PERSON	NAL IDENTIFICATION SOMATOMETRY			13 I	Iours			
Somato	ometry –	measurements of	of head, face, nose, cheek, ear, hand and foot	, bo	dy we	eight,	neight.			
		c index, nasal in	dex, cranial index, upper facial index.							
UNIT			FACIAL RECONSTRUCTION				Iours			
Facial	Reconstru	uction - Portrait	Parle/ Bertillon system. Photo fit / identikit.	Faci	al sup	erimp	osition			

techniques. Cranio facial super imposition techniques – photographic super imposition, video superimposition, Roentgen graphic superimposition. Use of somatoscopic and craniometrics methods in reconstruction. Importance of tissue depth in facial reconstruction. Genetic and congenital anomalies – causes, types, identification and their forensic significance

Course	Code	23UFSSE07	FIELD VISIT :- CRIME INVESTIGATION WITH POLICE DEPARTMENT	L	Т	Р	C
Core/	elective	/Supportive	Supportive	-	-	-	2
F	Pre – re	quisite	• Basic skills about the crime scene				•
			Course Objectives			•	
• T	'o under	stand real scenar	rio of the crime.				
• T	'o know	the investigation	n procedure.				
			•				
			Expected Course Outcomes				
1 L	Jndersta	and the crime sce	ene procedure to collect the evidence.				K3
2 E	Evaluate	the evidence fo	und from the crime spot.				K5
3 A	Analyze	the evidence wi	th various methodologies and procedures.				K4
4 0	Create a	questionnaire as	per the crime and evidence				K6
K1	– Rem	ember K2 – Un	derstand K3 – apply K4- Analyze K5 – eval	uate	K6- (Create	

AIM OF THE COURSE

The purpose of this field visit (core paper) is to bridge the theoretical fundamentals with that of actual practice and to inculcate a spirit of inquiry & research rigor to investigate the shades that go into the working place. Apart from adapting as team investigation, students are expected to gather, filter the required information and prepare the report in a standardized format of the case.

PROCESS

Colleges are encouraged to institute MoU/ collaborative initiative with firms organization/ government agencies in their juristic / state to get the consent and to make the crime spot visit more purposeful. Every student should do the file visit in a group manner not exceeding five, shall undergo a 2 hours per a week in any police station [city, location to be specified by the respective college] of his/her choice during 6th semester. In case of insufficient hours, college level adjustments can be made to facilitate the student's on training. Prior permission may be obtained from the organization in advance by the students concerned and information shall be passed onto the colleges thus enabling the training supervision by the concerned faculties authorized by the college. Monthly electronic reporting should be obtained to ensure coherent and comprehensive in the progression of the field visit.

A final report [Field Visit Record – FVR] contains the following things.

- 1. Crime basic details [person details, location mention in xxxxx, yyyy format]
- 2. Evidence [which found in the crime spot]
- 3. Methodology [procedure adopting to prove the evidence]
- 4. Questionnaire preparation [for investigation]

The report shall be prepared not exceeding 30 [A4] pages [pre-printed record designed for this purpose].

INTERNAL PROCEDURE

• Compliance of the procedure (permission seeking from college and police station, informing in advance, monthly reporting and FVR submission) 15 marks

• Structure and Monthly review of FVR 10 marks

EVALUATION PROCEDURE

- There shall be a university-approved comprehensive viva-voce examination at the end of fifth semester. Students shall maintain a [Field Visit Record ITR] individually for the purpose of the oral examinations.
- FVR shall also be evaluated jointly internal with an external examiner during the viva- voce examination.
- The total mark of 50 for the skill enhancing field visit (core subjects)shall be divided between internal and external evaluations and it is 25 and 25 marks respectively.

ELECTIVE – II

Cours	se Code	23UFSE08	ACCIDENT INVESTIGATION	L	Т	I		С
Cor	re/electiv	ve/Supportive	ELECTIVE II – A	5	1	()	3
	Pre - 1	requisite	• Basic knowledge about crime and law					
			Course Objectives	<u>.</u>				
•	To lear	n about the accide	nt investigation procedure and tools to carry ov	er th	e inve	estiga	atior	18.
			Expected Course Outcomes					
1	unders	tanding of accider	at investigation					K2
2	Readil	y applicable accid	ent investigation procedures					K4
3	Learn a	about the evidence	e collect, analyze and communicate data					K3
4	Unders	stand the tachograp	ph related data for the accident					K3
]	K1 – Re	member K2 – Ur	iderstand K3 – apply K4- Analyze K5 – evalu	ıate	K6- (Crea	te	
UNIT	' – I		MOTOR VEHICLE ACCIDENTS			12	Но	urs
Accide	ent scen	e. Sources of for	ensic information. Eyewitness accounts. Exte	nt o	f vehi	icle	dam	lage.
Visibi	lity cond	litions. Photograpl	ns of accident site. Estimation of speed. Tire m	arks	, skid	mar	ks, s	scuff
marks	. Mainter	nance of vehicles.	Abandoned vehicles. Importance of air bags. R	ailw	ay acc	ciden	its	
UNIT	T II		ACCIDENT ANALYSIS			12	Но	urs
Pre-cra	ash mov	ement. Post-crash	movement. Collision model. Gauging driver'	s rea	action	. Oc	cupa	ant's
kinem	atics. T	ypes of injuries	resulting from accident. Biomechanics of	injur	ries. 1	Hit	and	run
investi	igations.	Trace evidence at	accident sites.					
UNIT			TACHOGRAPHS					ours
Forens	sic signif	ficance of tachogra	aph data. Tachograph charts. Principles of char	t ana	lysis.	Acc	urac	y of
speed	record. 7	Fire slip effects. Fa	alsification and diagnostic signals. Route tracing	g.				
UNIT	Г -IV	II	NVESTIGATION KIT AND PROCEDURES	;		12	Но	urs
Tools	and Spe	ecial Equipment f	for the Investigator, Scene Investigation, Veh	icle	Exteri	iors,	Vel	nicle
Interio	ors, Rest	raining Systems,	Vehicle and Occupant Investigation Forms	, Int	erviev	w fo	orms	for
victim	s and wi	tnesses.						
UNIT	- V		MOTOR VEHICLES ACT			12	Но	urs

Salient features of the active applications of the act in investigations of accident cases, Drunken

Driving, breathalyzer, alcohol level in the blood, sweat, urine.

	Course Code 23UFSPC07			RESEARCH METHODOLOGY LAB					L	Т	Р	C
Core/elective/Supportive			e	Professional Competency Skill					-	-	2	2
Pre - requisite				Basic knowledge in research methodology								
				Cou	rse Object	ives						
		se aims at earch meth				c concep	ots used i	n rese	earch	n and	to scie	entifi
				then uppic	den.							
				Expected	Course O	utcomes	5					
1 U	Jndersta	nd the basi	c of rese	arch								K2
2 A	Apply various idea in the research area										K3	
3 A	Analyze	the data wh	ich is gi	ven to the	research w	ork						K4
4 0	Create a various ideas to apply in the research work									K6		
K 1	1 – Rem	ember K2	– Unde	rstand K3	– apply K	4- Anal	yze K5 –	evalu	ate	K6- (Create
