(Semester-wise)

PERIYAR UNIVERSITY, SALEM – 11.

BACHELOR OF SCIENCE BRANCH - STATISTICS

(The Revised Syllabus shall be Effective from the Academic Year 2023-2024 Onwards)

Introduction:

Programme Outcome, Programme Specific Outcome and Course Outcome

Statistics is the study of Data and extracting knowledge in the data using various methods and techniques, analyze and interpret data, taking data driven predictions and decisions. It also helps data collection through sampling techniques, that is to collect data focusing on problem solving, and presenting it with wider scope of application in science, social sciences, medical science, life sciences, country‘s official statistics etc. Statistical methods are used as research methodology in all most all domains. The key core areas of study in Statistics include Descriptive Statistics, Probability Theory, Sampling techniques, Matrix and Linear Algebra, Distribution Theory, Estimation Theory, Testing of Statistical hypotheses, Stochastic processes, Regression analysis, Design of Experiments, Demography and Official Statistics. The Bachelor‘s Degree B.Sc. Statistics is awarded to the students on the basis of knowledge, understanding, skills, attitudes, values and academic achievements expected to be acquired by learners at the end of the Programme. Learning outcomes of Statistics are aimed at facilitating the learners to acquire these attributes, keeping in view of their preferences and aspirations for gaining knowledge of Statistics.

Bachelor‘s degree in Statistics is the culmination of in-depth knowledge in both theoretical and practical methods and techniques of Statistics. This also leads to study of related areas like Computer science, Industrial Statistics, Mathematical Statistics, Business Statistics and many more. Thus, this programme helps learners in building a solid foundation for higher

studies in Statistics. The skills and knowledge gained have intrinsic aesthetics leading to proficiency in analytical reasoning. This can be utilized in Statistical modelling and solving real life problems.

Students completing this programme will be able to present Statistics clearly and precisely, make abstract ideas precise by formulating them in the language of Statistics, describe Statistical ideas from multiple perspectives and explain fundamental concepts of Statistics to those non-Statistics users.

This syllabus is aimed at preparing the students to cope with the latest developments and compete with students from other universities and put them on the right track. Along with this, students are equipped with skill enhancement courses like Research methodology, Statistical packages and R language.

❖ CARRIER IN STATISTICS

After the completion of undergraduate course, students can pursue higher education in the field of statistics, professional courses and research level studies.

Postgraduates	Professional Courses	Statistical Software	Competitive Exams
M. Sc Statistics	M. B. A	STATA	UPSC
M. Stat	M. C. A	SPSS	SSC
M. Sc Data Science/Data Analytics	C.A	Minitab	IAS
M. Sc Operations Research	I.C.W. A	R	IFS
M. Sc Actuarial Science	F. R. M	SAS	ISS
M. Sc in Library and Information Science	C. F. A	SAP	SSS
M. Sc in Quantitative Economics	C. C. A	ERP	CSO
M.A Economics		Python	NSSO
M. Pharm		MATLAB	IAMR
P.G Diploma in Statistical Methods with Applications		MaxStat.	ICMR

❖ JOB OPPURTUNITIES

Jobs opportunities in Statistics Field	Job opportunities in other fields
Statistician	Business Analyst
Statistics Investigator (TNPSC)	Chartered Accountant
Actuarial Analyst	Economist
Block Health Statistician (TNPSC)	Financial Manager
Data Scientist	Financial Trader
Data Analyst	Insurance Underwriter
Market Researcher	Machine Learning Engineer
Operational Researcher	Research Scientist (Maths)
Bio-Statistician	Python Developers
Meteorologist	Assistant Director (DPES)
Statistics Subject Matter Expert	Senior Manager – Research
Statistics at Upthink Expert (Tutor)	Civil Service Fast Streamer
Young professional (Statistics) in MOSPI	Project Technical Officer
Agriculture Statistical Officer	Banking Sectors
Field Officer (Statistics)	Trainee Data Analyst

LEARNING OUTCOMES-BASED CURRICULUM FRAMEWORK GUIDELINES BASED REGULATIONS FOR UNDER GRADUATE PROGRAMME	
Programme:	**U.G.**
Duration:	**3 years [UG]**
Programme Outcomes:	**PO1: Disciplinary knowledge:** Capable of demonstrating comprehensive knowledge and understanding of one or more disciplines that form a part of an undergraduate Programme of study **PO2: Communication Skills:** Ability to express thoughts and ideas effectively in writing and orally; Communicate with others using appropriate media; confidently share one's views and express herself/himself; demonstrate the ability to listen carefully, read and write analytically, and present complex information in a clear and concise manner to different groups. **PO3: Critical thinking:** Capability to apply analytic thought to a body of knowledge; analyse and evaluate evidence, arguments, claims, beliefs on the

	basis of empirical evidence; identify relevant assumptions or implications; formulate coherent arguments; critically evaluate practices, policies and theories by following scientific approach to knowledge development. **PO4: Problem solving: Capacity** to extrapolate from what one has learned and apply their competencies to solve different kinds of non-familiar problems, rather than replicate curriculum content knowledge; and apply one's learning to real life situations. **PO5: Analytical reasoning**: Ability to evaluate the reliability and relevance of evidence; identify logical flaws and holes in the arguments of others; analyze and synthesize data from a variety of sources; draw valid conclusions and support them with evidence and examples and addressing opposing viewpoints. **PO6: Research-related skills**: A sense of inquiry and capability for asking relevant/appropriate questions, problem arising, synthesizing and articulating; Ability to recognize cause-and-effect relationships, define problems, formulate hypotheses, test hypotheses, analyze, interpret and draw conclusions from data, establish hypotheses, predict cause-and-effect relationships; ability to plan, execute and report the results of an experiment or investigation **PO7: Cooperation/Team work:** Ability to work effectively and respectfully with diverse teams; facilitate cooperative or coordinated effort on the part of a group, and act together as a group or a team in the interests of a common cause and work efficiently as a member of a team **PO8: Scientific reasoning**: Ability to analyze, interpret and draw conclusions from quantitative/qualitative data; and critically evaluate ideas, evidence and experiences from an open-minded and reasoned perspective. **PO9: Reflective thinking**: Critical sensibility to lived experiences, with self awareness and reflexivity of both self and society. **PO10: Information/digital literacy:** Capability to use ICT in a variety of learning situations, demonstrate ability to access, evaluate, and use a variety of relevant information sources; and use appropriate software for analysis of data. **PO11: Self-directed learning**: Ability to work independently, identify appropriate resources required for a project, and manage a project through to completion.

	PO12: Multicultural competence: Possess knowledge of the values and beliefs of multiple cultures and a global perspective; and capability to effectively engage in a multicultural society and interact respectfully with diverse groups. **PO13: Moral and ethical awareness/reasoning**: Ability to embrace moral/ethical values in conducting one‘s life, formulate a position/argument about an ethical issue from multiple perspectives, and use ethical practices in all work. Capable of demon starting the ability to identify ethical issues related to one‘s work, avoid unethical behavior such as fabrication, falsification or misrepresentation of data or committing plagiarism, not adhering to intellectual property rights; appreciating environmental and sustainability issues; and adopting objective, unbiased and truthful actions in all aspects of work. **PO14: Leadership readiness/qualities:** Capability for mapping out the tasks of a team or an organization, and setting direction, formulating an inspiring vision, building a team who can help achieve the vision, motivating and inspiring team members to engage with that vision, and using management skills to guide people to the right destination, in a smooth and efficient way. **PO15: Lifelong learning:** Ability to acquire knowledge and skills, including learning how to learn‟, that are necessary for participating in learning activities throughout life, through self-paced and self-directed learning aimed at personal development, meeting economic, social and cultural objectives, and adapting to changing trades and demands of work place through knowledge/skill development/reskilling.
Programme Specific Outcomes:	**PSO1**: To enable students to apply basic microeconomic, macroeconomic and monetary concepts and theories in real life and decision making. **PSO2**: To sensitize students to various economic issues related to Development, Growth, International Economics, Sustainable Development and Environment. **PSO3**: To familiarize students to the concepts and theories related to Finance, Investments and Modern Marketing. **PSO4**: Evaluate various social and economic problems in the society and develop answer to the problems as global citizens. **PSO5:** Enhance skills of analytical and critical thinking to analyze effectiveness of economic policies.

	PO 1	PO2	PO3	PO4	PO5	PO6	PO7	PO8
PSO 1	Y	Y	Y	Y	Y	Y	Y	Y
PSO 2	Y	Y	Y	Y	Y	Y	Y	Y
PSO3	Y	Y	Y	Y	Y	Y	Y	Y
PSO 4	Y	Y	Y	Y	Y	Y	Y	Y
PSO 5	Y	Y	Y	Y	Y	Y	Y	Y

3 – Strong, 2- Medium, 1- Low

❖ **Highlights of the Revamped Curriculum**:

- Student-centric, meeting the demands of industry & society, incorporating industrial components, hands-on training, skill enhancement modules, industrial project, project with viva-voce, exposure to entrepreneurial skills, training for competitive examinations, sustaining the quality of the core components and incorporating application oriented content wherever required.
- The Core subjects include latest developments in the education and scientific front, advanced programming packages allied with the discipline topics, practical training, devising mathematical models and algorithms for providing solutions to industry / real life situations. The curriculum also facilitates peer learning with advanced mathematical topics in the final semester, catering to the needs of stakeholders with research aptitude.
- The General Studies and Mathematics based problem solving skills are included as mandatory components in the _Training for Competitive Examinations‘ course at the final semester, a first of its kind.
- The curriculum is designed so as to strengthen the Industry-Academia interface and provide more job opportunities for the students.
- The Industrial Statistics course is newly introduced in the fourth semester, to expose the students to real life problems and train the students on designing a mathematical model to provide solutions to the industrial problems.
- The Internship during the second year vacation will help the students gain valuable work experience, that connects classroom knowledge to real world experience and to narrow down and focus on the career path.
- Project with viva-voce component in the fifth semester enables the student, application of conceptual knowledge to practical situations. The state of art technologies in

conducting a Explain in a scientific and systematic way and arriving at a precise solution is ensured. Such innovative provisions of the industrial training, project and internships will give students an edge over the counterparts in the job market.

- State-of Art techniques from the streams of multi-disciplinary, cross disciplinary and inter disciplinary nature are incorporated as Elective courses, covering conventional topics to the latest - Artificial Intelligence.

Value additions in the Revamped Curriculum:

Semester	Newly introduced Components	Outcome / Benefits
I	**Foundation Course** To ease the transition of learning from higher secondary to higher education, providing an overview of the pedagogy of learning Literature and analysing the world through the literary lens gives rise to a new perspective.	➢ Instill confidence among students ➢ Create interest for the subject
I, II, III, IV	**Skill Enhancement papers** (Discipline centric / Generic / Entrepreneurial)	➢ Industry ready graduates ➢ Skilled human resource ➢ Students are equipped with essential skills to make them employable
		➢ Training on language and communication skills enable the students gain knowledge and exposure in the competitive world.
		➢ Discipline centric skill will improve the Technical knowhow of solving real life problems.
III, IV, V & VI	**Elective papers**	➢ Strengthening the domain knowledge ➢ Introducing the stakeholders to the State-of Art techniques from the streams of multi- disciplinary, cross disciplinary and inter disciplinary nature ➢ Emerging topics in higher education/ industry/ communication network / health sector etc. are introduced with hands-on-training.
IV	Elective Papers	➢ Exposure to industry moulds students into solution providers ➢ Generates Industry ready graduates ➢ Employment opportunities enhanced

V	Elective papers	➢ Self-learning is enhanced ➢ Application of the concept to real situation is conceived resulting in tangible outcome
VI	Elective papers	➢ Enriches the study beyond the course. ➢ Developing a research frame work and presenting their independent andintellectual ideas effectively.
Extra Credits: **For Advanced Learners / Honors degree**		➢ To cater to the needs of peer learners /research aspirants
Skills acquired from the Courses		Knowledge, Problem Solving, Analytical ability, Professional Competency, Professional Communication and Transferrable Skill

Methods of Evaluation		
Internal Evaluation	Continuous Internal Assessment Test	25 Marks
	Assignments	
	Seminars	
	Attendance and Class Participation	
External Evaluation	End Semester Examination	75 Marks
	Total	100 Marks
Methods of Assessment		
Recall (K1)	Simple definitions, MCQ, Recall steps, Concept definitions	
Understand/ Comprehend (K2)	MCQ, True/False, Short essays, Concept explanations, Short summary or Overview	
Application (K3)	Suggest idea/concept with examples, Suggest formulae, Solve problems, Observe, Explain	
Analyze (K4)	Problem-solving questions, Finish a procedure in many steps, Differentiate	
	between various ideas, Map knowledge	
Evaluate (K5)	Longer essay/ Evaluation essay, Critique or justify with pros and cons	
Create (K6)	Check knowledge in specific or offbeat situations, Discussion, Debating or Presentations	

❖ ELIGIBILITY CONDITION FOR ADMISSION

Candidates who seek admission to the Degree of Bachelor of Science in Statistics are required to have passed the Higher Secondary Examinations (Academic or Vocational Stream) conducted by the Government of Tamil Nadu or an examination accepted as equivalent thereto by the Periyar University, with Statistics/ Mathematics/Business Mathematics as one of the subjects.

❖ DURATION OF THE COURSE

a) Each academic year will be divided into two semesters. The first academic year will comprise the first and second semester, the second academic year - the third and fourth semester and the third academic year – the fifth and sixth semester.

b) The odd semesters consist of the duration from June to November of each year and the even semesters consist of the duration from December to April of each year. There won‘t be less than 90 working days for each semester.

❖ COURSE OF STUDY

In the following subjects, the course of study will comprise instruction according to the syllabus and books, prescribed from time to time.

❖EXAMINATIONS

During semester examination for each theory examination three hours is allotted. For practical examination also three hours is allotted. It will be conducted at the end of each the year. The candidate who has failed in any subject will be permitted to attend the arrear subject(s) along with the subsequent examination.

❖ PROJECT

The aim of the course is to initiate students to write and present a statistical report, under the supervision of a faculty, on some area of social interest. The project work will provide hands on training to the students to deal with data emanating from some real – life situation and propel them to do well on so theory or relate it to some theoretical concepts. The project should be prepared based on the own idea and interpretation of the student. It should not be copied from anywhere. A student must consult his/her supervisor for the preparation of the project.

While writing a project, a student must present two seminars before the faculties/ supervisor from the department.

Internal – 25 Marks

Project Viva – Voce – 75 marks

Total – 100 Marks

- **INTERNSHIP**

Students should undergo the internship for a duration of fifteen days at the end of the fourth semester. The eligible agencies to undergo internship shall be reputed multinational companies, Banking organizations, State/ Central government governing agencies. A faculty in- charge from the department will be allotted to such students. The internship result will be declared in the fifth semester mark sheet. The internship programme does not carry any marks. The mark sheet will be showing the report of the guide after the viva-voce examination as Commended or Highly Commended.

❖ SCHEME OF EXAMINATIONS

The scheme of examination for different semesters shall be as follows:

Course structure under OBE (Semester-wise Details)

❖ QUESTION PAPER PATTERN AND EVALUATION FOR ALL COURSES

a. Evaluation of Continuous Internal Assessment (CIA):

S.NO	INTERNAL ASSESSMENT	DISTRIBUTION OF MARKS
1	Test	15 Marks
2	Assignments	5 Marks
3	Attendance	5 Marks
TOTAL		**25 Marks**

b. Question Paper Pattern for Core /Elective/SEC Papers (Theory):

Time: Three hours **Maximum Marks: 75**

Part - A (15 x 1 = 15)
Answer ALL questions
(Three Questions from Each Unit)

Part - B (2 x 5 = 10)
Answer any TWO questions
(One Question from Each Unit)

Part - C (5 x 10 = 50)
Answer ALL questions
(One Question from Each Unit with Internal Choice)

c. Distribution of Marks for Core & SEC Practical:

EXAMINATIONS	MARKS
CIA (Continuous Internal Assessment) Including Practical Record	40 Marks
UE (University Examinations)	60 Marks
TOTAL	**100 Marks**

d. Distribution of Marks for Computer Based SEC Software Practical:

University Examinations	Distribution of Marks	
	Written Practical	**Total Marks**
Algorithm	10 Marks	60 Marks
Writing the Program in the Main Answer Book	20 Marks	
Run the Program	20 Marks	
Display the Correct Output	10 Marks	
CIA (Including Practical Record)		40 Marks
Total		**100 Marks**

e. Evaluation of Continuous Internal Assessment (CIA) for Core and Practical:

S.NO	INTERNAL ASSESSMENT	DISTRIBUTION OF MARKS
1	Record	25 Marks
2	Test	10 Marks
3	Attendance	5 Marks
TOTAL		**40 Marks**

f. Question Paper Pattern for Core and SEC Practical:

Time: Three hours **Maximum Marks: 60**

Part - A (3 x 20 = 60)
Answer Any THREE questions out of FIVE

(One question from each unit)

a) (i) PASSING MINIMUM - Theory

The candidate shall be declared to have passed the examination if the candidate **secures not less than 40 marks** put together out of 100 **(CIA+EA). Minimum 40% should be secured (30 out of 75) in EA** of each theory paper.

(ii) PASSING MINIMUM - Practical

The candidate shall be declared to have passed the examination if the candidate **secures not less than 40 marks** put together out of 100 **(CIA+EA). Minimum 40% should be secured (24 out of 60) in EA** of each Practical paper.

The CIA of each practical paper includes evaluation of record. However submission of record for the University Practical Examination is mandatory.

Examinations	**Maximum Marks**		
	CIA	**UE**	**Total**
Theory Paper	25	75	100
Practical Paper	40	60	100

CLASSIFICATION OF SUCCESSFUL CANDIDATES

Candidates who secure not less than 60% of the aggregate marks in the whole examination shall be declared to have passed the examination in the First Class.

All other successful candidates shall be declared to have passed in the Second Class. Candidates who obtained 75% of the marks in the aggregate shall be deemed to have passed the examination in First Class with Distinction provided they pass all the examinations prescribed for the course at the first appearance. Candidates who pass all the examinations prescribed for the course in the first instance and within a period of three academic years from the year of admission to the course only are eligible for University Ranking.

1. **Passing Minimum** is 40% of the **ESE** and 40% of the minimum of the paper/course.
2. **Minimum Credits to be Earned:**

   For THREE - year Programme: Best 140 Credits

   Part I and II **:** Languages
   Part III **:** Major, Elective
   Part IV **:** Soft Skills
   Part V **:** Extension Activities

3. **Marks and Grades:**

   The following table gives the marks, grade points, letter grades and classification to indicate the performance of the candidate.

❖ **Conversion of Marks to Grade Points and Letter Grade (Performance in a Course/Paper)**

RANGE OF MARKS	GRADE POINTS	LETTER GRADE	DESCRIPTION
90 –100	9.0 - 10.0	O	**Outstanding**
80–89	8.0 - 8.9	D+	**Excellent**
75–79	7.5 - 7.9	D	**Distinction**
70–74	7.0 - 7.4	A+	**Very Good**
60–69	6.0 - 6.9	A	**Good**
50–59	5.0 - 5.9	B	**Average**
40–49	4.0 - 4.9	C	**Satisfactory**
00–39	0.0	U	**Re-appear**
ABSENT	0.0	AAA	**ABSENT**

CALCULATION OF GPA AND CGPA

$$GPA = \frac{Sum\ of\ t\ \ e\ Multiplication\ of\ Grade\ Points\ by\ t\ \ e\ Credits\ of\ t\ \ e\ Courses}{Sum\ of\ t\ \ e\ Credits\ of\ t\ \ e\ Courses\ in\ a\ semester}$$

$$Grade\ Point\ Average\ (GPA) = \frac{\sum_i C_i G_i}{\sum_i C_i}$$

For the Entire Programme:

$$CGPA = \frac{Sum\ of\ t\ \ e\ Multiplication\ of\ Grade\ Points\ by\ t\ \ e\ Credits\ of\ t\ \ e\ Entire\ Programme}{Sum\ of\ t\ \ e\ Credits\ of\ t\ \ e\ Courses\ of\ t\ \ e\ Entire\ Programme}$$

C_i = Credits earned for course ‗i' in any semester
G_i= Grade Point obtained for course ‗i' in any semester
N refers to the semester in which such courses were credited

CGPA	GRADE	CLASSIFICATION OF FINAL RESULT
9.5-10.0	O+	First Class with Exemplary*
9.0 and above but below 9.5	O	
8.5 and above but below 9.0	D++	First Class with Distinction*
8.0 and above but below 8.5	D+	
7.5 and above but below 8.0	D	
7.0 and above but below 7.5	A++	First Class
6.5 and above but below 7.0	A+	
6.0 and above but below 6.5	A	
5.5 and above but below 6.0	B+	Second Class
5.0 and above but below 5.5	B	
4.5 and above but below 5.0	C+	Third Class
4.0 and above but below 4.5	C	
0.0 and above but below 4.0	U	Re-appear

*The candidates who have passed in the first appearance and within the prescribed Semester of the UG Programme (Major, Allied and Elective Courses Alone) are eligible.

DIFFERENT TYPES OF COURSES

Core Courses CC

S. No.	Course No.	Title of the course
1	I	Descriptive Statistics
2	II	Probability Theory
3	III	Matrix and Linear Algebra
4	IV	Distribution Theory
5	V	Estimation Theory
6	VI	Sampling Techniques
7	VII	Testing of Statistical Hypothesis
8	VIII	Actuarial Statistics
9	IX	Stochastic Processes
10	X	Regression Analysis
11	XI	Practical – IV
12	XII	Project (Core with Viva Voce)
13	XIII	Design of Experiments
14	XIV	Demography
15	XV	Practical – V

Elective Courses EC

Elective Course No.	Title of the course
I	Mathematics for Statistics
II	Real Analysis
III	Numerical Methods
IV	Economic & Official Statistics
V	Operations Research
VI*	a) Econometrics
	b) Population Studies
VII	Statistical Quality Control
VIII**	a) Time Series
	b) Index Numbers

***Elective VI to be chosen as either (a) or (b) for Semester V**
****Elective VIII to be chosen as either (a) or (b) for Semester VI**

Skill Enhancement Courses (SEC)

S. No.	Course No.	Title of the course
1	I	Practical – I
2	II	Database Management System
3	III	Practical – II
4	IV	Practical – III
5	V	Biostatistics

OTHER COURSES

Foundation course: Elementary Statistics

Professional Competency Skill**
a) Introduction to R language
b) Introduction to Python programming

**Either (a) or (b) to be chosen in Semester VI

COMMENCEMENT OF THIS REGULATION

The OBE regulations shall take effect from the academic year 2023 – 2024 (i.e.) for the students who are admitted in the first year of the course during the academic year 2023 – 2024 and thereafter.

TRANSITARY PROVISION

Candidates who were admitted to the UG course of study prior to 2023-2024 will be permitted to appear for the examination under those regulations for a period of three years (i.e.) up to and inclusive of the examinations of April/May 2026. Thereafter they will be permitted to appear for the examination based on the regulations then in force.

❖ LIST OF COURSES:

<table>
<tr><td colspan="8">(For the candidates admitted from the academic year 2023 -2024 onwards)</td></tr>
<tr><td colspan="2">Title of the Course</td><td colspan="6">Descriptive Statistics</td></tr>
<tr><td colspan="2">Paper Number</td><td colspan="6">CORE I</td></tr>
<tr><td rowspan="2">Category</td><td rowspan="2">Core</td><td>Year</td><td>I</td><td rowspan="2">Credits</td><td rowspan="2">5</td><td rowspan="2">Course Code</td><td rowspan="2">23USTCT01</td></tr>
<tr><td>Semester</td><td>I</td></tr>
<tr><td colspan="2" rowspan="2">Instructional Hours per week</td><td>Lecture</td><td colspan="2">Tutorial</td><td colspan="2">Lab Practice</td><td>Total</td></tr>
<tr><td>4</td><td colspan="2">1</td><td colspan="2">--</td><td>5</td></tr>
<tr><td colspan="2">Pre-requisite</td><td colspan="6">Basic arithmetic</td></tr>
<tr><td colspan="2">Objectives of the Course</td><td colspan="6">The main objectives of this course are:
1. It explains the important concepts of statistics and statistical data.
2. It provides to formulate the visualization of frequency distribution.
3. Also they measure the averages, dispersions, lack of symmetry, moments, and relationship among variables.
4. Estimate and predict the unknown and future values.
5. Study of non-linear and consistency of the data.</td></tr>
<tr><td colspan="2" rowspan="5">Course Outline</td><td colspan="6">Unit-I Statistics
Introduction - Definition – Collection of Data: Primary and secondary data - Methods of collecting primary data - Sources of secondary data. Sampling: Census and Sample methods. Classification-Types - Formation of frequency distribution-Tabulation - parts of a Table - Types. Diagrammatic representation – Types. Graphical representation - Graphs of frequency distributions. Merits and Limitations of diagrams and graphs.</td></tr>
<tr><td colspan="6">Unit-II Measures of Central tendency
Introduction - Definitions - Types - Mean-Median-Mode-Geometric mean-Harmonic Mean-Weighted mean - Merits and Demerits-Measures of Dispersion: Introduction – Definition – Types – Range - Quartile deviation - Mean deviation - Standard deviation - Co-efficient of variation.</td></tr>
<tr><td colspan="6">Unit-III Skewness
Introduction-Definition-Types-Karl Pearson‘s – Bowley‘s - Kelly‘s methods – Their merits and demerits. Kurtosis: Introduction-Definition-Types-Its merits and demerits. Moments: Introduction - Definition-Types - Raw, Central moments and their relations.</td></tr>
<tr><td colspan="6">Unit-IV Correlation analysis
Introduction - Definition - Types – Ungrouped and Grouped data – Probable error – properties - Rank correlation –Regression analysis: Introduction - Definition – Regression Equations -Multiple regression.</td></tr>
<tr><td colspan="6">Unit-V Theory of Attributes
Introduction – Definition-Classes and Class frequencies-Consistency of data-Independence of attributes- Association of attributes-Yule‘s coefficient and -Coefficient of Colligation.</td></tr>
</table>

Extended Professional Component (is a part of internal component only, not to be included in the External Examination question paper)	Questions related to the above topics, from various competitive examinations UPSC / TRB / NET / UGC – CSIR / GATE / TNPSC /others to be solved (To be discussed during the Tutorial hour)
Skills acquired from this Course	Knowledge, Problem Solving, Analytical ability, Professional Competency, Professional Communication and Transferrable Skill
Recommended Text	1. Gupta, S.P. (2017): Statistical Methods, Sultan Chand & Sons Pvt Ltd, New Delhi, 35th Revised Edition. 2. Gupta S. C and Kapoor, V. K. (2002). Fundamentals of Mathematical Statistics, Sultan Chand & Sons Pvt. Ltd., New Delhi

Website and e-Learning Source	e-books, tutorials on MOOC/SWAYAM courses on the subject https://en.wikipedia.org/wiki/Statistics https://en.wikipedia.org/wiki/Descriptive_statistics https://socialresearchmethods.net/kb/statdesc.php http://onlinestatbook.com/2/introduction/descriptive.html

Course Learning Outcome (for Mapping with POs and PSOs)

Students will be able to

CLO-1: Describe the scope, functions, applications and limitations of Statistics.

CLO-2: Also to explain the statistical survey, collection of data, sampling and presentation of data.

CLO-3: Discuss the importance and uses of central values and dispersions for the various types of data.

CLO-4: Also to measure the various measures of averages and scatteredness of the mass of data in a series.

CLO-5: Explain about the lack of symmetry, r^{th} moments and peakedness of the frequency distributions.

CLO-6: Ability to apply in data

Course Learning Outcome (for Mapping with POs and PSOs)

Students will be able to

CLO-1: Understand concepts of probability and identify the different approaches of probability theory

CLO-2: Define the random variable and its respective probability values and to compare a discrete and continuous random variable.

CLO-3: Calculate the expected value of a random variable variance, covariance, moments and find the conditional expectation and variance of bi-variate random variable.

CLO-4: Estimate the measures of central values, Dispersions, Skewness and Kurtosis through the generating function

CLO-5: Understand bivariate random variables and its distributions

CLO-6: Application of probability theory in real life

Course Learning Outcome (for Mapping with POs and PSOs)

Students will be able to

CLO-1 estimate population parameters

CLO-2 identify good estimators and its properties

CLO-3 derive interval estimators of a parameter

CLO-4 estimate parameters using various estimation methods and identify the best among the estimators

CLO-5 handle data and can estimate population parameters

CLO-6 realize the application of different types of estimators

Title of the Course		Practical – V (Statistical software using Python)					
Paper Number		Core XV					
Category	Core	Year	III	Credits	4	Course Code	23USTCP05
		Semester	VI				
Instructional Hours per week		Lecture	Tutorial	Lab Practice	Total		
		1	1	4	6		

Objectives:

The main objectives of this course are:

1. Apply the theoretical concepts and solve the problems based on one missing observation and two missing observations in RBD and LSD.
2. Analyse and interpret data for 2^2, 2^3 and factorial experiments by using Yates Algorithm.
3. Apply the methods of estimating net migration rates.
4. Execute the various fertility measures sources of demographic data.

Programming Exercises :

1. One Way ANOVA in Python – Loading and preparing data , Conducting python functions,Interpreting the results & Visualizing one way ANOVA.
2. Two Way ANOVA in Python – Preparing data, performing two way ANOVA using libraries, Interpreting main effects , Conducting post-hoc tests for factorial design – Visualizing two way ANOVA with results.
3. Repeated Measures ANOVA in Python – Understanding repeated measures designs, preparing and analyzing data with repeated measures in Python & Interpreting and visualizing repeated measures ANVOA results.
4. Missing plot techniques – Estimating One missing observation, Two missing observations in LSD.
5. Estimating One missing observation, Two missing observations in RBD.
6. Factorial Experiments - Analysis of 2^2 factorial experiments using Yates algorithm.
7. Analysis of 2^3 factorial experiments using Yates algorithm.
8. Analysis of 3^2 factorial experiments.
9. Measures of Population size, growth and composition.
10. Age – sex distribution analysis
11. Fertility and mortality analysis
12. Demographic Modeling Using Life tables, modeling fertility and mortality rates.

Note:

Question Paper Setting:

5 questions are to be set without omitting any unit. All questions carry equal marks.
Any 3 questions are to be answered in 3 hours duration.

Course Learning Outcome (for Mapping with POs and PSOs)

Students will be able to

CLO-1 Distinguish between proper and improper fractions. Express an algebraic fraction as the sum of its partial fractions.

CLO-2 Demonstrate the knowledge to determine the sums, expansion and approximation of series including binomial, exponential, logarithmic.

CLO-3 Solve problems about polynomials with real coefficients, imaginary and irrational roots.

CLO-4 Calculate limits of a function.

CLO-5 Obtain the nth derivative in successive differentiation.

CLO-6 Obtain the mathematical knowledge and skills for the better understanding of statistics as a mathematical science

Course Learning Outcome (for Mapping with POs and PSOs)

Students will be able to

CLO-1 :understand Indian official statistics and offices related to it
CLO-2 understand Indian surveys for collecting official statistics
CLO-3 know uses of index numbers
CLO-4 know demand analysis and its need
CLO-5 to understand economic India by knowing agricultural and economic surveys
CLO-6 to know the time series and prediction

Course Learning Outcome (for Mapping with POs and PSOs)

Students will be able to

CLO-1 Distinguish between proper and improper fractions. Express an algebraic fraction as the sum of its partial fractions.

CLO-2 Demonstrate the knowledge to determine the sums, expansion and approximation of series including binomial, exponential, logarithmic and fourier.

CLO-3 Solve problems about polynomials with real coefficients, imaginary and irrational roots. Explain the relationship between the derivative of a function as a function and the notion of the derivative.

CLO-4 Calculate limits of a function.

CLO-5 Obtain the nth derivative in successive differentiation. Apply Euler‘s theorem on homogenous function

CLO-6 Obtain the mathematical knowledge and skills for the better understanding of statistics as a mathematical science

Course Learning Outcome (for Mapping with POs and PSOs)

Students will be able to

CLO-1 Understand the time series concept

CLO-2 estimate the trend values using various methods

CLO-3 concept and purposes of index numbers

CLO-4 understand the notation and formulae concerning the use.

CLO-5 understand time series data its components and its application in various fields.

Course Learning Outcome (for Mapping with POs and PSOs)

Students will be able to

CLO-1 : Describe the rule that definition, relations and functions of set theory.

CLO-2 : To develop the skill of computation with real sequences and series.

CLO-3 : Students should be able to determine the number of outcomes in a problem.

CLO-4 : Students should be able to apply the fundamental principle of counting to find out the total number of outcomes in problem.

CLO-5 : Understand of data and its relevance in business and develop an understanding of quantitative techniques.

CLO-6 : Ability to apply in data.

Title of the Course		Practical I (Data Analysis Using MS – Excel)					
Paper Number		SEC III					
Category	Core	Year	I	Credits	2	Course Code	23USTCP01
		Semester	II				
Instructional Hours per week		Lecture	Tutorial	Lab Practice	Total		
		-	-	2	2		

Objectives:

1. To enable the students to gain computer practical knowledge about the concepts of statistics.
2. To apply the measures of descriptive statistics and probability in real life situations using MS excel
3. To provide practical knowledge in random variables, probability distributions, expectation, moment generating function, matrices, Rank of matrices.

Practical Exercises:

1. Computation of Measures of Central Tendency for discrete data using MS Excel (Mean, Median, Mode, Geometric Mean, Harmonic Mean)
2. Computation of Measures of Central Tendency for Continuous data using MS Excel (Mean, Median, Mode, Geometric Mean, Harmonic Mean)
3. Computation of Measures of dispersion for discrete data using MS Excel ()
4. Computation of Measures of dispersion for Continuous data using MS Excel ()
5. Graphical Presentation of data (Histogram, Frequency Polygon, Ogives) Using MS Excel.
6. Computation of Co-efficient of Skewness and Kurtosis – Karl Pearson‘s and Bowley‘s data using MS Excel
7. Fitting of Binomial distribution – Direct Method using MS Excel.
8. Fitting of Poisson distribution – Direct Method using MS Excel.
9. Fitting of Exponential distribution – Direct Method using MS Excel.
10. Problems based on univariate probability distributions.
11. Problems based on probability.
12. Calculating Inverse matrix in Excel.
13. Calculating Transpose matrix in Excel.
14. Calculating Rank matrix in Excel.

Note:

Question Paper Setting:

5 questions are to be set without omitting any unit. All questions carry equal marks.
Any 3 questions are to be answered in 3 hours duration out of 5.

Examinations Distribution of Marks

University Examinations (Written Practical)	60 Marks
CIA (Including Practical Record)	40 Marks
Total	100 Marks

Title of the Course		Practical – III (Statistical Software Using R)					
Paper Number		SEC – VI					
Category	Core	Year	II	Credits	2	Course Code	23USTCP03
		Semester	IV				
Instructional Hours per week		Lecture	Tutorial	Lab Practice	Total		
		-	-	2	2		

Objectives:

The main objectives of this course are:

1. To enable the students to gain practical knowledge of test of significance in large and small samples.
2. To provide practical application of hypothesis testing based on single sample and two samples, using averages and proportions.
3. To provide practical application knowledge of the life insurance environment.
4. Understand the methods of computing assurance benefits and premiums of various insurance plans and to apply the various methods in framing mortality tables.

Programming Exercises :

1. Large Sample tests for means, proportions
2. Large Sample tests for standard deviations and correlation coefficient.
3. Small sample tests for single mean.
4. Small sample tests for difference of means and correlation coefficient.
5. Paired t –test.
6. Chi – square test for goodness of independence of attributes.
7. Non parametric test for single and related samples
a. Sign Test , b. Wilcoxon signed rank test
8. Non parametric test for two independent samples
a. Median test, b. Wilcoxon Mann Whitney U – test
9. Creating an Actuarial table to input interest rate.
10. Creating functions Increasing and Decreasing life insurances.
11. Increaing and decreasing annuities both due and immediate.
12. Calculates the values of risk free rate.

Note:

Question Paper Setting:

5 questions are to be set without omitting any unit. All questions carry equal marks.
Any 3 questions are to be answered in 3 hours duration.

Course Learning Outcome (for Mapping with Pos and PSOs)

Students will be able to

CLO-1 Students will able to install, code and use basic Python
CLO-2 Describe key terminologies, concepts and techniques employed in statistical analysis
CLO-3 Understand how to write simple coding
CLO-4 Compile and run the program
CLO-5 Interpret the result

	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6	PSO7	PSO8	PSO9

Course Learning Outcome (for Mapping with POs and PSOs)

Students will be able to

CLO-1 Understand the random experiments in real life situations

CLO-2 Understand the axioms of probability in real life situations.

CLO-3 Compute Bernoulli trials and understand the rare case population

CLO-4 Learn the usage of central tendencies, dispersion and skewness.

CLO-5 Obtain the relationship between two random variables.

Course Learning Outcome (for Mapping with POs and PSOs)

Students will be able to

CLO-1 Understand the concept of random variables and expected average

CLO-2 Compute Bernoulli trials and understand the rare case population.

CLO-3 Learn the usage of normal curve and curve fitting by using the method of least squares.

CLO-4 Learn about the large samples

CLO-5 Learn the basic concepts of theory of attributes.

Course Learning Outcome (for Mapping with POs and PSOs)

Students will be able to

CLO -1 Distinguish between population and sample.

CLO-2 Know the concepts of random sampling and non – sampling

CLO-3 Frame a questionnaire and collect primary and secondary data.

CLO-4 Easy to understand the basic concepts.

CLO-5 Analyze statistical data and draw graphs, histograms, frequency polygons and Ogives.

CLO-6 Obtain the mathematical knowledge and skills for the better understanding of statistics.

Course Learning Outcome (for Mapping with POs and PSOs)

Students will be able to

CLO-1 Analyze statistical data using measures of central tendency.
CLO- 2 Analyze statistical data using measures of central dispersion.
CLO-3 Understand and compute various statistical measures of correlation.
CLO-4 Gain knowledge about the sources of time series
CLO-5 Gain knowledge about the sources of measure secular trend.
CLO-6 understand the concepts of index numbers, optimum tests and its construction.
