**B.Sc., COMPUTER SCIENCE WITH  
ARTIFICIAL INTELLIGENCE**

**(SEMESTER PATTERN- CBCS)**

**(For Candidates admitted in the colleges affiliated to**

**Periyar university from 2023-2024 onwards)**

**TAMILNADU STATE COUNCIL FOR HIGHER EDUCATION**

**CHENNAI-600005**

# **1. Introduction**

## **B.Sc. Computer Science with Artificial Intelligence**

Artificial Intelligence or AI, is a branch of computer science that deals with building smart machines that are capable of performing complex tasks that normally require human interference and intelligence. It combines Data Science with real-life data to leverage machines and computers to imitate the decision-making and problem-solving capabilities that the human mind has. Many human mental activities such as writing computer programs, doing mathematics, engaging in common sense reasoning, understanding language, and even driving an automobile are said to demand “intelligence.” Most of the work on building such kinds of systems has taken place in the field called “Artificial Intelligence (AI).” This work has had an experimental and designing direction to a great extent. Drawing from a loosely structured but growing body of computational techniques, AI systems are developed, undergo experimentation, and are improved. This interaction has created and refined a few general AI standards of wide pertinence.

The course is enabled to include several interdisciplinary areas like: Machine Learning, Deep Learning, Natural Language Processing, Robotics, Artificial Intelligence in Business and Society and The Future of Artificial Intelligence, operating systems, databases, business intelligence, big data, probability and statistics, data optimization, statistical simulation and data analysis, management decision analysis, decision models and predictive analysis. Artificial Intelligence has gained paramount importance in the computer science domain. The need for scientists who understand data in all its aspects will continue to grow strongly. Students graduating from the program will have significantly more depth and breadth in the broad area of Data Science and receive all the information they need to work with various kinds of data and statistical data. The program is designed so that students have in-depth knowledge of the many approaches, aptitudes, methodologies, and instruments needed to deal with corporate data. Students receive instruction in the abilities needed to find the needed solutions and assist in making significant judgments.

AI is a vast field in itself. Not only does it covers an extensive range of topics, but it also has a lot of depth as the AI algorithms use a lot of advanced mathematics. Thus, the eligibility for an AI course can depend on the nature of the course. However, if the course is not getting into extreme levels of depth (regarding the exact functioning of various AI algorithms), then the typical eligibility would be working knowledge of analytics tools especially Python for Data Science, while candidates from different educational backgrounds can take up artificial intelligence courses, having knowledge of mathematical concepts such as Calculus can give one a slight edge in understanding the mathematical functioning of the algorithms, Knowledge of basic Data Science is required which includes data manipulation and statistical modelling.

<b>LEARNING OUTCOMES-BASED CURRICULUM FRAMEWORK GUIDELINES BASED REGULATIONS FOR UNDER GRADUATE PROGRAMME</b>	
<b>Programme:</b>	<b>U.G.</b>
<b>Programme Code:</b>	
<b>Duration:</b>	<b>3 years [UG]</b>
<b>Programme Outcomes:</b>	<p><b>PO1: Disciplinary knowledge:</b> Capable of demonstrating comprehensive knowledge and understanding of one or more disciplines that form a part of an undergraduate Programme of study</p> <p><b>PO2: Communication Skills:</b> Ability to express thoughts and ideas effectively in writing and orally; Communicate with others using appropriate media; confidently share one’s views and express herself/himself; demonstrate the ability to listen carefully, read and write analytically, and present complex information in a clear and concise manner to different groups.</p> <p><b>PO3: Critical thinking:</b> Capability to apply analytic thought to a body of knowledge; analyse and evaluate evidence, arguments, claims, beliefs on the basis of empirical evidence; identify relevant assumptions or implications; formulate coherent arguments; critically evaluate practices, policies and theories by following scientific approach to knowledge development.</p> <p><b>PO4: Problem solving: Capacity</b> to extrapolate from what one has learned and apply their competencies to solve different kinds of non-familiar problems, rather than replicate curriculum content knowledge; and apply one’s learning to real life situations.</p> <p><b>PO5: Analytical reasoning:</b> Ability to evaluate the reliability and relevance of evidence; identify logical flaws and holes in the arguments of others; analyze and synthesize data from a variety of sources; draw valid conclusions and support them with evidence and examples, and addressing opposing</p>

viewpoints.

**PO6: Research-related skills:** A sense of inquiry and capability for asking relevant/appropriate questions, problem arising, synthesising and articulating; Ability to recognise cause-and-effect relationships, define problems, formulate hypotheses, test hypotheses, analyse, interpret and draw conclusions from data, establish hypotheses, predict cause-and-effect relationships; ability to plan, execute and report the results of an experiment or investigation

**PO7: Cooperation/Team work:** Ability to work effectively and respectfully with diverse teams; facilitate cooperative or coordinated effort on the part of a group, and act together as a group or a team in the interests of a common cause and work efficiently as a member of a team

**PO8: Scientific reasoning:** Ability to analyse, interpret and draw conclusions from quantitative/qualitative data; and critically evaluate ideas, evidence and experiences from an open-minded and reasoned perspective.

**PO9: Reflective thinking:** Critical sensibility to lived experiences, with self awareness and reflexivity of both self and society.

**PO10 Information/digital literacy:** Capability to use ICT in a variety of learning situations, demonstrate ability to access, evaluate, and use a variety of relevant information sources; and use appropriate software for analysis of data.

**PO 11 Self-directed learning:** Ability to work independently, identify appropriate resources required for a project, and manage a project through to completion.

**PO 12 Multicultural competence:** Possess knowledge of the values and beliefs of multiple cultures and a global perspective; and capability to effectively engage in a multicultural society and interact respectfully with diverse groups.

**PO 13: Moral and ethical awareness/reasoning:** Ability to embrace moral/ethical values in conducting one's life, formulate a position/argument about an ethical issue from multiple perspectives, and use ethical practices in all work. Capable of demonstrating the ability to identify ethical issues related to one's work, avoid unethical behaviour such as fabrication, falsification or misrepresentation of data or committing plagiarism, not adhering to intellectual property rights; appreciating environmental and sustainability issues; and adopting objective, unbiased and truthful actions in all aspects of work.

**PO 14: Leadership readiness/qualities:** Capability for mapping out the tasks of a team or an organization, and setting direction, formulating an inspiring vision, building a team who can help achieve the vision, motivating and inspiring team members to engage with that vision, and using management skills to guide people to the right destination, in a smooth and efficient way.

**PO 15: Lifelong learning:** Ability to acquire knowledge and skills, including „learning how to learn“, that are necessary for participating in learning activities throughout life, through self-paced and self-directed learning aimed at personal development, meeting economic, social and cultural objectives, and adapting to

	changing trades and demands of work place through knowledge/skill development/rescaling.
<b>Programme Specific Outcomes:</b>	<p><b>PSO1:</b> To enable students to apply basic microeconomic, macroeconomic and monetary concepts and theories in real life and decision making.</p> <p><b>PSO 2:</b> To sensitize students to various economic issues related to Development, Growth, International Economics, Sustainable Development and Environment.</p> <p><b>PSO 3:</b> To familiarize students to the concepts and theories related to Finance, Investments and Modern Marketing.</p> <p><b>PSO 4:</b> Evaluate various social and economic problems in the society and develop answer to the problems as global citizens.</p> <p><b>PSO 5:</b> Enhance skills of analytical and critical thinking to analyze effectiveness of economic policies.</p>

	PO 1	PO2	PO3	PO4	PO5	PO6	PO7	PO8

<b>PSO 4</b>	Y	Y	Y	Y	Y	Y	Y	Y
<b>PSO 5</b>	Y	Y	Y	Y	Y	Y	Y	Y

**3 – Strong, 2- Medium, 1- Low**

#### **Highlights of the Revamped Curriculum:**

- Student-centric, meeting the demands of industry & society, incorporating industrial components, hands-on training, skill enhancement modules, industrial project, project with viva-voce, exposure to entrepreneurial skills, training for competitive examinations, sustaining the quality of the core components and incorporating application oriented content wherever required.
- The Core subjects include latest developments in the education and scientific front, advanced programming packages allied with the discipline topics, practical training, devising mathematical models and algorithms for providing solutions to industry / real life situations. The curriculum also facilitates peer learning with advanced mathematical topics in the final semester, catering to the needs of stakeholders with research aptitude.
- The General Studies and Mathematics based problem solving skills are included as mandatory components in the ‘Training for Competitive Examinations’ course at the final semester, a first of its kind.

- The curriculum is designed so as to strengthen the Industry-Academia interface and provide more job opportunities for the students.
- The Industrial Statistics course is newly introduced in the fourth semester, to expose the students to real life problems and train the students on designing a mathematical model to provide solutions to the industrial problems.
- The Internship during the second year vacation will help the students gain valuable work experience, that connects classroom knowledge to real world experience and to narrow down and focus on the career path.
- Project with viva-voce component in the fifth semester enables the student, application of conceptual knowledge to practical situations. The state of art technologies in conducting a Explain in a scientific and systematic way and arriving at a precise solution is ensured. Such innovative provisions of the industrial training, project and internships will give students an edge over the counterparts in the job market.
- State-of Art techniques from the streams of multi-disciplinary, cross disciplinary and inter disciplinary nature are incorporated as Elective courses, covering conventional topics to the latest - Artificial Intelligence.

**Value additions in the Revamped Curriculum:**

Semester	Newly introduced Components	Outcome / Benefits
I	<b>Foundation Course</b> To ease the transition of learning from higher secondary to higher education, providing an overview of the pedagogy of learning Literature and analysing the world through the literary lens gives rise to a new perspective.	<ul style="list-style-type: none"> <li>➤ Instill confidence among students</li> <li>➤ Create interest for the subject</li> </ul>
I, II, III, IV	<b>Skill Enhancement papers</b> (Discipline centric / Generic / Entrepreneurial)	<ul style="list-style-type: none"> <li>➤ Industry ready graduates Skilled human resource</li> <li>➤ Students are equipped with essential skills to make them employable</li> <li>➤ Training on language and communication skills enable the students gain knowledge and exposure in the competitive world.</li> <li>➤ Discipline centric skill will improve the technical knowhow of solving real life problems.</li> </ul>

<p><b>III, IV, V &amp; VI</b></p>	<p>Elective papers</p>	<ul style="list-style-type: none"> <li>➤ Strengthening the domain knowledge</li> <li>➤ Introducing the stakeholder to the State-of Art techniques from the streams of multi-disciplinary, cross disciplinary and inter disciplinary nature</li> <li>➤ Emerging topics in higher education/industry/ communication network / health sector etc. are introduced with hands-on-training.</li> </ul>
<p><b>IV</b></p>	<p>Elective Papers</p>	<ul style="list-style-type: none"> <li>➤ Exposure to industry moulds students into solution providers</li> <li>➤ Generates Industry ready graduates</li> <li>➤ Employment opportunities enhanced</li> </ul>
<p><b>V</b></p>	<p>Elective papers</p>	<ul style="list-style-type: none"> <li>➤ Self-learning is enhanced</li> <li>➤ Application of the concept to real situation is conceived resulting in tangible outcome</li> </ul>
<p><b>VI</b></p>	<p>Elective papers</p>	<ul style="list-style-type: none"> <li>➤ Enriches the study beyond the course.</li> <li>➤ Developing a research framework and Presenting their independent and Intellectual ideas effectively.</li> </ul>
<p><b>Extra Credits: For Advanced Learners / Honors degree</b></p>		<ul style="list-style-type: none"> <li>➤ To cater to the needs of peer learners / research aspirants</li> </ul>
<p><b>Skills acquired from the Courses</b></p>		<p>Knowledge, Problem Solving, Analytical ability, Professional Competency, Professional Communication and Transferrable Skill</p>

### **C PROGRAMMING PRACTICAL**

Subject Code	L	T	P	S	Credits	Inst. Hours	Marks			
							CIA	External	Total	
<b>CCII</b>	0	0	4	I	4	5	<b>25</b>	<b>75</b>	<b>100</b>	
<b>Learning Objectives</b>										
<b>LO1</b>	The Course aims to provide exposure to problem-solving through C programming									
<b>LO2</b>	It aims to train the student to the basic concepts of the C -Programming language									
<b>LO3</b>	Apply different concepts of C language to solve the problem									
<b>Prerequisites:</b>										
<b>Contents</b>										
1. Programs using Input/ Output functions 2. Programs on conditional structures 3. Command Line Arguments 4. Programs using Arrays 5. String Manipulations 6. Programs using Functions 7. Recursive Functions 8. Programs using Pointers 9. Files 10. Programs using Structures & Unions										
								<b>TOTAL</b>	<b>60</b>	
<b>CO</b>	<b>Course Outcomes</b>									
CO1	Demonstrate the understanding of syntax and semantics of C programs.									
CO2	Identify the problem and solve using C programming techniques.									
CO3	Identify suitable programming constructs for problem solving.									
CO4	Analyze various concepts of C language to solve the problem in an efficient way.									
CO5	Develop a C program for a given problem and test for its correctness.									

<b>CO/PSO</b>	<b>PSO 1</b>	<b>PSO 2</b>	<b>PSO 3</b>	<b>PSO 4</b>	<b>PSO 5</b>	<b>PSO 6</b>

Subject Code	Subject Name	Category	L	T	P	S	Credits	Marks		
								CIA	External	Total
	<b>PROBLEM SOLVING TECHNIQUES</b>	FC	2	-	-	I	2	25	75	100
<b>Learning Objectives</b>										
LO1	Familiarize with writing of algorithms, fundamentals of C and philosophy of problem solving.									
LO2	Implement different programming constructs and decomposition of problems into functions.									
LO3	Use data flow diagram, Pseudo code to implement solutions.									
LO4	Define and use of arrays with simple applications									
LO5	Understand about operating system and their uses									
UNIT	Contents							No. Of. Hours		
I	<b>Introduction:</b> History, characteristics and limitations of Computer. <b>Hardware/Anatomy of Computer:</b> CPU, Memory, Secondary storage devices, Input Devices and Output devices. <b>Types of Computers:</b> PC, Workstation, Minicomputer, Main frame and Supercomputer. <b>Software:</b> System software and Application software. <b>Programming Languages:</b> Machine language, Assembly language, High-level language, 4GL and 5GL-Features of good programming language. <b>Translators:</b> Interpreters and Compilers.							<b>6</b>		
II	<b>Data:</b> Data types, Input, Processing of data, Arithmetic Operators, Hierarchy of operations and Output. Different phases in Program Development Cycle (PDC). <b>Structured Programming: Algorithm:</b> Features of good algorithm, Benefits and drawbacks of algorithm. <b>Flowcharts:</b> Advantages and limitations of flowcharts, when to use flowcharts, flowchart symbols and types of flowcharts.							<b>6</b>		

	<b>Pseudocode:</b> Writing a pseudocode. Coding, documenting and testing a program: Comment lines and types of errors. <b>Program design:</b> Modular Programming.	
III	<b>Selection Structures:</b> Relational and Logical Operators - Selecting from Several Alternatives – Applications of Selection Structures. <b>Repetition Structures:</b> Counter Controlled Loops –Nested Loops– Applications of Repetition Structures.	6
IV	<b>Data:</b> Numeric Data and Character Based Data. <b>Arrays:</b> One Dimensional Array - Two Dimensional Arrays – Strings as Arrays of Characters.	6
V	<b>Data Flow Diagrams:</b> Definition, DFD symbols and types of DFDs. <b>Program Modules:</b> Subprograms-Value and Reference parameters- Scope of a variable - Functions – Recursion. <b>Files:</b> File Basics-Creating and reading a sequential file- Modifying Sequential Files.	6
<b>TOTAL HOURS</b>		<b>30</b>
<b>Course Outcomes</b>		<b>Programme Outcomes</b>
CO	On completion of this course, students will	
CO1	Study the basic knowledge of Computers. Analyze the programming languages.	PO1, PO2, PO3, PO4, PO5, PO6
CO2	Study the data types and arithmetic operations. Know about the algorithms. Develop program using flow chart and pseudocode.	PO1, PO2, PO3, PO4, PO5, PO6
CO3	Determine the various operators. Explain about the structures. Illustrate the concept of Loops	PO1, PO2, PO3, PO4, PO5, PO6
CO4	Study about Numeric data and character-based data. Analyze about Arrays.	PO1, PO2, PO3, PO4, PO5, PO6
CO5	Explain about DFD Illustrate program modules. Creating and reading Files	PO1, PO2, PO3, PO4, PO5, PO6

## Objectives

To predict the performance of different algorithms in order to guide design decisions, provide theoretical estimation for the required resources of an algorithm to solve a specific computational problem

## LIST OF PROGRAMS

1. Write a Program to find Simple Interest and Compound Interest.
2. Write a Program to demonstrate the working of following Loops: While, Do While, For, If-Else, switch
3. Write a Program to find greatest of three numbers.
4. Write a Program to add and subtract two matrices.
- 5 Write a Program to display elements of an array.
- 6 Write a Program to calculate Sum and Average of an array.
7. Write a Program to sort elements of an array using Bubble sort.
8. Write a Program to calculate Factorial of a number.
9. Write a Program to generate Fibonacci series.
10. Write a Program to show function Overloading.
11. Write a Program to create a class and access member function of a class
12. Write a program to show Constructor and Destructor in a class
13. Write a program to convert the temperature in Fahrenheit to Celsius and vice-a-verse

**TOTAL HOURS : 60**

Course Outcomes	
CO	On completion of this course, students will
CO1	To understand basics of Object Oriented Programming
CO2	To understand Token Expressions & Control Structures
CO3	To apply Functions in C++, Classes & Objects.
CO4	To analyze Constructors & Destructors, Operator Overloading, Inheritance
CO5	To know the applications of Pointers,

### SECOND YEAR –SEMESTER- III

Subject Code	Subject Name	Category	L	T	P	S	Credits	Marks		
								CIA	External	Total
	<b>DATA STRUCTURES AND ALGORITHMS</b>	<b>CC V</b>	5	-	-	III	4	25	75	100
<b>Learning Objectives</b>										
LO1	Understand the meaning asymptotic time complexity analysis and various data structures									
LO2	To enhancing the problem solving skills and thinking skills									
LO3	To write efficient algorithms and Programs									
LO4	To make the students learn best practices in PYTHON programming									
LO5	To understand how to handle the files in Data Structure									
UNIT	Contents									No. Of. Hours
I	<b>Arrays and ordered Lists</b> Abstract data types – asymptotic notations – complexity analysis- Linked lists: Singly linked list – doubly linked lists - Circular linked list, General lists- stacks – Queues – Circular Queues – Evaluation of expressions									<b>15</b>
II	<b>Trees and Graphs</b> Trees – Binary Trees – Binary Tree Traversal – Binary Tree Representations – Binary Search Trees - threaded Binary Trees - Application of trees (Sets). Representation of Graphs – Graph implementation – graph Traversals - Minimum Cost Spanning Trees – Shortest Path Problems-Application of graphs									<b>15</b>
III	<b>Searching and Sorting</b> Sorting – Bubble Sort, Insertion Sort, Quick Sort, Merge Sort, Selection Sort. Searching – Linear search, Binary search									<b>15</b>
IV	<b>Greedy Method and Dynamic programming</b> Greedy Method: Knapsack problem– Job Sequencing with deadlines – Optimal storage on tapes. General method – Multistage Graph Forward									<b>15</b>

	Method– All pairs shortest path – Single source shortest path – Search Techniques for Graphs – DFS – Connected Components – Bi-Connected Components	
V	<b>Backtracking</b> General Method – 8-Queen’s – Sum Of Subsets – Graph Colouring – Hamiltonian Cycles – Branch And Bound: General Method – Travelling Sales Person Problem	<b>15</b>
<b>TOTAL HOURS</b>		<b>75</b>
<b>Course Outcomes</b>		<b>Programme Outcomes</b>
CO	On completion of this course, students will	
CO1	To understand the asymptotic notations and analysis of time and space complexity To understand the concepts of Linked List, Stack and Queue.	PO1, PO2, PO3, PO4, PO5, PO6
CO2	To understand the Concepts of Trees and Graphs Perform traversal operations on Trees and Graphs. To enable the applications of Trees and Graphs.	PO1, PO2, PO3, PO4, PO5, PO6
CO3	To apply searching and sorting techniques	PO1, PO2, PO3, PO4, PO5, PO6
CO4	To understand the concepts of Greedy Method To apply searching techniques.	PO1, PO2, PO3, PO4, PO5, PO6
CO5	Usage of File handlings in python, Concept of reading and writing files, Do programs using files.	PO1, PO2, PO3, PO4, PO5, PO6

	<b>RELATIONAL DATABASE MANAGEMENT SYSTEM</b>	<b>CC IX</b>	6	-	-	V	4	25	75	100
<b>Learning Objectives</b>										
LO1	To understand the different issues involved in the design and implementation of a database system.									
LO2	To study the physical and logical database designs, database modeling, relational, hierarchical, and network models									
LO3	To understand and use data manipulation language to query, update, and manage a database									
LO4	To develop an understanding of essential DBMS concepts such as: database security, integrity, concurrency,									
LO5	To design and build a simple database system and demonstrate competence with the fundamental tasks involved with modeling, designing, and implementing a DBMS.									
UNIT	Contents								No. Of. Hours	
I	<b>Introduction:</b> Database System-Characteristics of Database Management Systems- Architecture of Database Management Systems-Database Models-System Development Life Cycle-Entity Relationship Model.								<b>18</b>	
II	<b>Relational Database Model:</b> Structure of Relational Model-Types of keys. Relational Algebra: Unary operations-Set operations-Join operations. Normalization: Functional Dependency- First Normal form-Second Normal Form-Third Normal form- Boyce-Codd Normal Form-Fourth Normal Form.								<b>18</b>	
III	<b>SQL:</b> Introduction. Data Definition Language: Create, alter, drop, rename and truncate statements. Data Manipulation Language: Insert, Update and Delete Statements. Data Retrieval Language: Select statement. Transaction Control Language: Commit, Rollback and Savepoint statements. Single row functions using dual: Date, Numeric and Character functions. Group/Aggregate functions: count, max, min, avg and sum functions. Set Functions: Union, union all, intersect and minus. Subquery: Scalar, Multiple and Correlated subquery. Joins: Inner and Outer joins.Defining Constraints: Primary Key, Foreign Key, Unique, Check, Not Null.								<b>18</b>	

IV	<b>PL/SQL:</b> Introduction-PL/SQL Basic-Character Set-PL/SQL Structure-SQL Cursor-Subprograms-Functions-Procedures.	<b>18</b>
V	<b>Exception Handling:</b> Introduction-Predefined Exception-User Defined Exception-Triggers-Implicit and Explicit Cursors-Loops in Explicit Cursor.	<b>18</b>
<b>TOTAL HOURS</b>		<b>90</b>
<b>Course Outcomes</b>		<b>Programme Outcomes</b>
CO	On completion of this course, students will	
CO1	To demonstrate the characteristics of Database Management Systems. To study about the concepts and models of database. To impart the concepts of System Development Life Cycle and E-R Model.	PO1, PO2, PO3, PO4, PO5, PO6
CO2	To classify the keys and the concepts of Relational Algebra. To impart the applications of various Normal Forms Classification of Dependency.	PO1, PO2, PO3, PO4, PO5, PO6
CO3	To elaborate the different types of Functions and Joins and their applications. Introduction of Views, Sequence, Index and Procedure.	PO1, PO2, PO3, PO4, PO5, PO6
CO4	Representation of PL-SQL Structure. To impart the knowledge of Sub Programs, Functions and Procedures.	PO1, PO2, PO3, PO4, PO5, PO6
CO5	Representation of Exception and Pre-Defined Exception. To Point out the Importance of Triggers, Implicit and Explicit Cursors.	PO1, PO2, PO3, PO4, PO5, PO6

	<b>IOT AND CLOUD TECHNOLOGIES</b>	<b>CC XIII</b>	6	-	-	VI	4	25	75	100
<b>Learning Objectives</b>										
LO1	Learn basic concepts of Cloud Computing.									
LO2	To get an overview of Map Reduce Concepts.									
LO3	To learn about infrastructure security, Data Security and Privacy.									
LO4	To understand access based on access management in data security									
LO5	To generate security and privacy access for the end user									
UNIT	Contents									No. Of Hours
I	<b>IoT Introduction:</b> Introduction to IoT – IoT definition – Characteristics – IoT Complete Architectural Stack – IoT enabling Technologies – IoT Challenges. Sensors and Hardware for IoT – Hardware Platforms – Arduino, Raspberry Pi, Node MCU - Protocols for IoT.									<b>18</b>
II	<b>Introduction to Cloud Computing</b> Cloud Computing – Definition – SPI Framework – Software Model – Cloud Services Delivery Model – Deployment Models – Key drivers – Impact on Users – Governance in the cloud – Barriers to Cloud Computing Adoption in the enterprise. Examples of Cloud Service Providers: Amazon Web services – Google – Microsoft Azure Services Platform – Sun Open Cloud Platform.									<b>18</b>
III	<b>Virtual Machines Provisioning and Migration Services</b> Introduction and Inspiration -Background and Related Work- Virtual Machines Provisioning and Manageability-Virtual Machine Migration Services-									<b>18</b>

	VM Provisioning and Migration in Action -Provisioning in the Cloud Context - Future Research Directions- The Anatomy of Cloud Infrastructures -Distributed Management of Virtual Infrastructures-Scheduling Techniques for Advance Reservation of Capacity- Capacity Management to meet SLA Commitments.	
IV	<b>Data Security, Identity and Access Management Data security and storage:</b> Aspects of Data Security -Data Security Mitigation -Provider Data and Its Security. Identity and Access Management: Trust Boundaries and IAM -Why IAM? - IAM Challenges- IAM Definitions-IAM Architecture and Practice-Getting Ready for the Cloud - Relevant IAM Standards and Protocols for Cloud Services - IAM Practices in the Cloud-Cloud Authorization Management- Cloud Service Provider IAM Practice.	<b>18</b>
V	<b>Security and Privacy Security Management: Standards</b> – Security Management in the Cloud – Availability Management – Access Control. Privacy: What is Privacy – Data Life Cycle – Key Privacy Concerns – Who is responsible for protecting Privacy – Privacy Risk Management – Legal and Regulatory Implications. IoT and Cloud Integration: IoT applications in home, infrastructures, buildings, security, Industries, Home appliances, other IoT electronic equipment.	<b>18</b>

	<b>IOT AND CLOUD TECHNOLOGIES LAB</b>	<b>CC XIV</b>	-	-	5	VI	4	25	75	100

### Objectives

To improve efficiency and bringing important information to the surface more quickly than a system depending on human intervention, provide easy, scalable access to computing resources and IT services.

### LIST OF PROGRAMS

1. Familiarization with Arduino/Raspberry Pi and perform necessary software installation.

2. To interface LED/Buzzer with Arduino/Raspberry Pi and write a program to turn ON LED for 1 sec after every 2 seconds.
3. To interface Push button/Digital sensor (IR/LDR) with Arduino/Raspberry Pi and write a program to turn ON LED when push button is pressed or at sensor detection.
4. To interface DHT11 sensor with Arduino/Raspberry Pi and write a program to print temperature and humidity readings.
5. To interface motor using relay with Arduino/Raspberry Pi and write a program to turn ON motor when push button is pressed.
6. To interface OLED with Arduino/Raspberry Pi and write a program to print temperature and humidity readings on it.
7. To interface Bluetooth with Arduino/Raspberry Pi and write a program to send sensor data to smart phone using Bluetooth.
8. To interface Bluetooth with Arduino/Raspberry Pi and write a program to turn LED ON/OFF when “1”/”0” is received from smart phone using Bluetooth.
9. Write a program on Arduino/Raspberry Pi to upload temperature and humidity data to thing speak cloud.
10. Write a program on Arduino/Raspberry Pi to retrieve temperature and humidity data from thing speak cloud.
11. To install MySQL database on Raspberry Pi and perform basic SQL queries.
12. Write a program on Arduino/Raspberry Pi to publish temperature data to MQTT broker.
13. Write a program on Arduino/Raspberry Pi to subscribe to MQTT broker for temperature data and print it.
14. Write a program to create TCP server on Arduino/Raspberry Pi and respond with humidity data to TCP client when requested.
15. Write a program to create UDP server on Arduino/Raspberry Pi and respond with humidity data to UDP client when requested.

**TOTAL HOURS: 75**

<b>Course Outcomes</b>	
CO	On completion of this course, students will
CO1	Design an IoT system with cloud infrastructure.
CO2	Implement the M2M Communication protocols in a prototype
CO3	Understand the basic concepts of the main sensors used in electromechanical systems
CO4	Understand/implement computer models of common engineering information types.
CO5	Understand storage mechanisms / analysis algorithms for data management in distributed & data intensive applications

	<b>ARTIFICIAL INTELLIGENCE</b>	CC XV	5	-	-	VI	4	25	75	100	
<b>Learning Objectives</b>											
<b>LO1</b>	Describe the concepts of Artificial Intelligence										
<b>LO2</b>	Understand the method of solving problems using Artificial Intelligence										
<b>LO3</b>	Understand natural language processing										
<b>LO4</b>	Introduce the concept of Expert system, Fuzzy logic										
<b>LO5</b>	Understand about operating system and their uses										
<b>UNIT</b>	<b>Contents</b>								<b>No. Of. Hours</b>		
I	<b>Introduction to Artificial Intelligence</b> What is Artificial Intelligence? AI Technique, Representation of a problem as State space search, production systems, Problem characteristics, Production System characteristics – Issues in the design of search programs, Heuristic Search Techniques - Generate & Test Hill Climbing, Best First search, Problem reduction, Constraint satisfaction, Means-End Analysis								<b>15</b>		

II	<b>Knowledge Representation</b> Approaches and issues in knowledge representation –Using Predicate Logic – Representing simple facts in logic – Representing Instance and ISA relationship – Computable functions and predicates – resolution – Natural deduction - Representing knowledge using rules –Procedural versus declarative knowledge – Logic programming - Forward versus backward reasoning – Matching – Control Knowledge - Symbolic reasoning under uncertainty - Logics for Nonmonotonic reasoning – Implementation Issues – Augmenting a problem solver – Implementation: Depth first search, Breadth first search	<b>15</b>
III	<b>Statistical Reasoning</b> Probability and Bayes' Theorem - Certainty factors and rule-based systems- Bayesian networks – Dempster - Shafer Theory - Weak slot-filler structure - Semantic nets – frames. Strong slot-filler structure- Conceptual dependency – Scripts – CYC – Syntactic – Semantic spectrum of Representation – Logic and slot-and-filler structure – Other representational Techniques	<b>15</b>
IV	<b>Game Playing, Planning &amp; NLP</b> Minimax search procedure-Adding alpha-beta cutoffs- Additional Refinements – Iterative Deepening – Reference on specific games Planning - Components of a Planning system – Goal stack planning – Nonlinear planning using constraint posting- Hierarchical planning – Reactive systems.Natural Language Processing - Syntactic Analysis, Semantic Analysis, Discusses and Pragmatic Processing – Statistical Natural Language processing	<b>15</b>
V	<b>Learning &amp; Advanced Topics in AI</b> What is learning? – Rote learning – Learning by taking advice – Learning in problem solving – Learning from examples: Induction – Explanation based learning – Discovery – Analogy – Formal learning theory - Neural Net learning and Genetic learning - Expert System: Representation-Expert System shells-Knowledge Acquisition. Fuzzy logic system – Crisp sets – Fuzzy sets – Fuzzy terminology – Fuzzy logic control – Sugeno style of Fuzzy inference processing – Fuzzy Hedges – Neuro Fuzzy systems.	<b>15</b>
<b>TOTAL HOURS</b>		<b>75</b>
<b>Course Outcomes</b>		<b>Programme Outcomes</b>
CO	On completion of this course, students will	
CO1	Design user interfaces to improve human–AI interaction and real-time decision-making. Evaluate the advantages, disadvantages, challenges, and ramifications of human–AI augmentation.	PO1, PO2, PO3, PO4, PO5, PO6
CO2	Apply basic principles of AI in solutions that require problem solving, inference, perception, knowledge representation, and learning	PO1, PO2, PO3, PO4, PO5, PO6
CO3	Demonstrate awareness and a fundamental understanding of various applications of AI techniques in intelligent agents, expert systems, artificial neural networks and other machine learning	PO1, PO2, PO3, PO4, PO5, PO6

	models.	
CO4	Extract information from text automatically using concepts and methods from natural language processing (NLP), including stemming, n-grams, POS tagging, and parsing	PO1, PO2, PO3, PO4, PO5, PO6
CO5	Develop robotic process automation to manage business processes and to increase and monitor their efficiency and effectiveness. Determine the framework in which artificial intelligence and the Internet of things may function, including interactions with people, enterprise functions, and environments.	PO1, PO2, PO3, PO4, PO5, PO6

	PYTHON PROGRAMMING	CC VII	5	-	-	IV	4	25	75	100
<b>Learning Objectives</b>										
LO1	To make students understand the concepts of Python programming.									
LO2	To apply the OOPs concept in PYTHON programming.									

<b>LO3</b>	To impart knowledge on demand and supply concepts	
<b>LO4</b>	To make the students learn best practices in PYTHON programming	
<b>LO5</b>	To know the costs and profit maximization	
<b>UNIT</b>	<b>Contents</b>	<b>No. of Hours</b>
I	<b>Basics of Python Programming:</b> History of Python-Features of Python-Literal-Constants-Variables - Identifiers–Keywords-Built-in Data Types-Output Statements – Input Statements-Comments – Indentation- Operators-Expressions-Type conversions. <b>Python Arrays:</b> Defining and Processing Arrays – Array methods.	<b>15</b>
II	<b>Control Statements:</b> Selection/Conditional Branching statements: if, if-else, nested if and if-elif-else statements. Iterative Statements: while loop, for loop, else suite in loop and nested loops. <b>Jump Statements:</b> break, continue and pass statements.	<b>15</b>
III	<b>Functions:</b> Function Definition – Function Call – Variable Scope and its Lifetime-Return Statement. <b>Function Arguments:</b> Required Arguments, Keyword Arguments, Default Arguments and Variable Length Arguments- Recursion. <b>Python Strings:</b> String operations- Immutable Strings - Built-in String Methods and Functions - String Comparison. <b>Modules:</b> import statement- The Python module – dir() function – Modules and Namespace – Defining our own modules.	<b>15</b>
IV	<b>Lists:</b> Creating a list -Access values in List-Updating values in Lists- Nested lists -Basic list operations-List Methods. <b>Tuples:</b> Creating, Accessing, Updating and Deleting Elements in a tuple – Nested tuples– Difference between lists and tuples. <b>Dictionaries:</b> Creating, Accessing, Updating and Deleting Elements in a Dictionary – Dictionary Functions and Methods - Difference between Lists and Dictionaries.	<b>15</b>
V	<b>Python File Handling:</b> Types of files in Python - Opening and Closing files-Reading and Writing files: write() and writelines() methods- append() method – read() and readlines() methods – with keyword – Splitting words – File methods - File Positions- Renaming and deleting files.	<b>15</b>
<b>TOTAL HOURS</b>		<b>75</b>
<b>Course Outcomes</b>		<b>Programme Outcomes</b>
CO	On completion of this course, students will	
CO1	Learn the basics of python, Do simple programs on python, Learn how to use an array.	PO1, PO2, PO3, PO4, PO5, PO6

CO2	Develop program using selection statement, Work with Looping and jump statements, Do programs on Loops and jump statements.	PO1, PO2, PO3, PO4, PO5, PO6
CO3	Concept of function, function arguments, Implementing the concept strings in various application, Significance of Modules, Work with functions, Strings and modules.	PO1, PO2, PO3, PO4, PO5, PO6
CO4	Work with List, tuples and dictionary, Write program using list, tuples and dictionary.	PO1, PO2, PO3, PO4, PO5, PO6
CO5	Usage of File handlings in python, Concept of reading and writing files, Do programs using files.	PO1, PO2, PO3, PO4, PO5, PO6

	PYTHON LAB	CCVIII	-	-	4	I	4	25	75	100

**Course Objectives:**

1. Be able to design and program Python applications.
2. Be able to create loops and decision statements in Python.
3. Be able to work with functions and pass arguments in Python.
4. Be able to build and package Python modules for reusability.
5. Be able to read and write files in Python.

<b>LAB EXERCISES</b>	<b>Required Hours</b>
<ol style="list-style-type: none"> <li>1. Program using variables, constants, I/O statements in Python.</li> <li>2. Program using Operators in Python.</li> <li>3. Program using Conditional Statements.</li> <li>4. Program using Loops.</li> <li>5. Program using Jump Statements.</li> <li>6. Program using Functions.</li> <li>7. Program using Recursion.</li> <li>8. Program using Arrays.</li> <li>9. Program using Strings.</li> <li>10. Program using Modules.</li> <li>11. Program using Lists.</li> <li>12. Program using Tuples.</li> <li>13. Program using Dictionaries.</li> <li>14. Program for File Handling.</li> </ol>	<b>60</b>

**Course Outcomes**

On completion of this course, students will

CO1	Demonstrate the understanding of syntax and semantics of
CO2	Identify the problem and solve using PYTHON programming techniques.
	Identify suitable programming constructs for problem solving.

CO3	
CO4	Analyze various concepts of PYTHON language to solve the problem in an efficient way.
CO5	Develop a PYTHON program for a given problem and test for its correctness.

	<b>DATA SCIENCE</b>	CC	5	-	-	-	4	25	75	100
<b>Learning Objectives</b>										
LO1	To understand the basic concepts of Data Science									
LO2	To understand the principles of algorithms, flowchart and source code									
LO3	To acquire a solid foundation in Python.									
LO4	To visualize data using plots in python									
LO5	To understand and handle database and visualize.									
UNIT	Contents								No. Of. Hours	
I	<b>Introduction to Data Science</b> Introduction: Data Science - Big Data and Data Science hype – getting past the hype - Datafication - Current landscape of perspectives - Skill sets needed - Statistical Inference - Exploratory Data Analysis and the Data Science Process - Basic tools (plots, graphs and summary statistics) of EDA – Applications of Data Science - Data Science in Business - Business Intelligence vs Data Science – Data Analytics Life Cycle - Machine Learning								<b>15</b>	
II	<b>Introduction to Python</b> Features of Python - How to Run Python – Identifiers- Reserved Keywords- Variables - Comments in Python -								<b>15</b>	

	Indentation in Python - Multi-Line Statements- Input, Output and Import Functions- Operators. Data Types and Operations: Numbers -Strings -List - Tuple - Set -Dictionary - Mutable and Immutable Objects - Data Type Conversion. Flow Control: Decision Making-Loops-Nested Loops-Control Statements- Types of Loops-List Comprehensions-Set Comprehensions-Dictionary Comprehensions-Nested Dictionaries.	
III	<b>Functions</b> Function Definition - Function Calling - Function Arguments - Anonymous Functions (Lambda Functions) - Recursive Functions - Modules and Packages: Built-in Modules - Creating Modules - import Statement- Namespaces and Scope - The dir() function - The reload() function -Packages in Python - Date and Time Modules – Numpy Libraries and Data Manipulation Using Pandas	<b>15</b>
IV	<b>File Handling and Object Oriented Programming</b> Opening a File- Closing a File - Writing to a File - Reading from a File - File Methods - Renaming a File - Deleting a File - Directories in Python. Regular Expressions. Class Definition - Creating Objects - Built-in Attribute Methods - Built-in Class Attributes - Destructors in Python - Encapsulation - Data Hiding – Inheritance-Method Overriding – Polymorphism - Exception Handling	<b>15</b>
V	<b>Database Programming and Visualizations</b> Connecting to a Database - Creating Tables - INSERT Operation - UPDATE Operation - DELETE Operation - READ Operation - Transaction Control -Disconnecting from a Database - Exception Handling in Databases - GUI Programming - CGI Programming- Data Visualizations using Matplotlib – histograms, bar charts, pie charts.	<b>15</b>
<b>TOTAL HOURS</b>		<b>75</b>
<b>Course Outcomes</b>		<b>Programme Outcomes</b>
CO	On completion of this course, students will	
CO1	To explain the basic concepts of data science and its application	PO1, PO2, PO3, PO4, PO5, PO6
CO2	To explain the Features of Python To demonstrate Control Statements and Looping Statements	PO1, PO2, PO3, PO4, PO5, PO6
CO3	To understand Python Functions To create and illustrate Numpy Libraries To perform Data Manipulation using Pandas.	PO1, PO2, PO3, PO4, PO5, PO6
CO4	To understand the File Concepts Apply Exception Handling Techniques	PO1, PO2, PO3, PO4, PO5, PO6
CO5	To Create and manipulate Database To create Data Visualization using Mat plot lib	PO1, PO2, PO3, PO4, PO5, PO6

	<b>DATA SCIENCE LAB</b>	CC	-	-	4	-	4	25	75	100

**OBJECTIVES:**

To build websites and software, automate tasks, and conduct data analysis. Open Source and Community Development.

Required Hours
----------------

**LIST OF PROGRAMS**

1. Demonstrate the working of “id” and “type” functions.
2. Find all prime numbers within a given range.
3. Print n terms of Fibonacci series using iteration.
4. Demonstrate use of slicing in string.
5. Compute the frequency of the words from the input. The output should output after sorting the key alphanumerically.
6. Write a program that accepts a comma separated sequence of words as input and prints the words in a comma-separated sequence after sorting them alphabetically.
7. Demonstrate use of list & related functions.
8. Demonstrate use of Dictionary & related functions.
9. Demonstrate use of tuple & related functions.
10. Implement stack using list.
11. Implement queue using list.
12. Read and write from a file.
13. Copy a file.
14. Demonstrate working of classes and objects.
15. Demonstrate class method & static method.
16. Demonstrate constructors.
17. Demonstrate inheritance.
18. Demonstrate aggregation/composition.
19. Create a small GUI application for insert, update and delete in a table.
20. Bar charts, histograms and pie charts

**60**

	<b><u>MOBILE APPLICATION DEVELOPMENT</u></b>	CC	6	-	-	-	4	25	75	100
<b>Learning Objectives</b>										
LO1	Develop in-depth Knowledge about the architecture and features of Android									
LO2	Implementing the various options available in views.									
LO3	Understand the file handling concepts and thereby enabling to manage data efficiently.									
LO4	Able to describe clearly the features of SMS messaging.									
LO5	Illustrate the concepts of Location Based Services									
UNIT	Contents									No. Of. Hours
I	<b>Android Fundamentals:</b> Android overview and Versions –Features of Android – Architecture of Android - Setting up Android Environment (Eclipse/Android Studio, SDK, AVD)- Anatomy of an Android Application - Simple Android Application Development.									<b>18</b>
II	<b>Android User Interface:</b> Layouts: Linear, Relative, Frame and Scrollview- Managing changes to Screen Orientation. Views: TextView, Button, ImageButton, EditText, CheckBox, RadioButton, RadioGroup, ProgressBar, AutoCompleteTextView, ListViews and WebView									<b>18</b>
III	<b>Data Persistence:</b> Saving and Loading User Preferences. File Handling: File System-Internal and External Storage-Permissions-File Manipulation-Managing Data using Sqlite: Creation of database-Insertion, Retrieval and Updation of records.									<b>18</b>
IV	<b>SMS Messaging:</b> Sending and Receiving messages - Sending E-mail–Networking: Downloading Binary Data – Downloading Text Files.									<b>18</b>
V	<b>Location Based Services:</b> Displaying maps- Displaying zoom control-Changing view – Adding Markers- Getting the location – Geo-coding Publishing Android Applications: Preparing for publishing-Deploying APK Files.									<b>18</b>

		<b>TOTAL HOURS</b>	<b>90</b>
<b>Course Outcomes</b>		<b>Programme Outcomes</b>	
CO	On completion of this course, students will		
CO1	Appreciate the importance of visualization in the data analytics solution	PO1, PO2, PO3, PO4, PO5, PO6	
CO2	Apply structured thinking to unstructured problems	PO1, PO2, PO3, PO4, PO5, PO6	
CO3	Understand a very broad collection of machine learning algorithms and problems	PO1, PO2, PO3, PO4, PO5, PO6	
CO4	Learn algorithmic topics of machine learning and mathematically deep enough to introduce the required theor	PO1, PO2, PO3, PO4, PO5, PO6	
CO5	Develop an appreciation for what is involved in learning from data.	PO1, PO2, PO3, PO4, PO5, PO6

**SOFTWARE ENGINEERING LAB**

Subject Code	L	T	P	S	Credits	Inst. Hours	Marks		
							CIA	External	Total
<b>CC</b>	<b>0</b>	<b>0</b>	<b>5</b>	<b>-</b>	<b>4</b>	<b>5</b>	<b>25</b>	<b>75</b>	<b>100</b>
<b>Learning Objectives</b>									
<b>LO1</b>	To Impart Practical Training in Software Engineering								
<b>LO2</b>	To understand about different Software Testing								
<b>LO3</b>	Learn to write test cases using different testing techniques.								
<b>List of Exercises</b>									

**Do the following 8 exercises for any project projects (Eg. Student Portal, Online exam registration)**

- 1) Development of problem statement.
- 2) Preparation of Software Requirement Specification Document.
- 3) Preparation of Software Configuration Management and Risk Management related documents.
- 4) Draw the entity relationship diagram
- 5) Draw the data flow diagrams at level 0 and level 1
- 6) Draw use case diagram
- 7) Draw activity diagram of all use cases.
- 8) Performing the Design by using any Design phase CASE tools.
- 9) Develop test cases for unit testing and integration testing
- 10) Develop test cases for various white box and black box testing techniques

<b>TOTAL</b>		<b>75</b>
<b>CO</b>	<b>Course Outcomes</b>	
CO1	An ability to use the methodology and tools necessary for engineering practice.	
CO2	Ability to elicit, analyze and specify software requirements.	
CO3	Analyze and translate specifications into a design.	
CO4	Ability to derive test cases for different testing.	
CO5	Apply software engineering perspective through requirements analysis, software design and construction, verification, and validation to develop solutions to modern problems

## ANNEXURE – I

### Elective Course (EC1- EC8)

#### Discipline Specific

Subject Code	Subject Name	Category	L	T	P	S	Credits	Marks		
								CIA	External	Total
	<b>ANALYTICS FOR SERVICE INDUSTRY</b>	<b>Elect</b>	4	-	-	-	3	25	75	100
<b>Learning Objectives</b>										
<b>LO1</b>	Recognize challenges in dealing with data sets in service industry.									
<b>LO2</b>	Identify and apply appropriate algorithms for analyzing the healthcare, Human resource, hospitality and tourism data.									
<b>LO3</b>	Make choices for a model for new machine learning tasks.									
<b>LO4</b>	To identify employees with high attrition risk.									
<b>LO5</b>	To Prioritizing various talent management initiatives for your organization.									
<b>UNIT</b>	<b>Contents</b>									<b>No. Of. Hours</b>
I	<b>Healthcare Analytics :</b> Introduction to Healthcare Data Analytics- Electronic Health Records– Components of EHR- Coding Systems- Benefits of EHR- Barrier to Adopting HER Challenges-Phenotyping Algorithms. Biomedical Image Analysis and Signal Analysis- Genomic Data Analysis for Personalized Medicine. Review of Clinical Prediction Models.									<b>12</b>
II	<b>Healthcare Analytics Applications :</b> Applications and Practical Systems for Healthcare– Data Analytics for Pervasive Health- Fraud Detection in Healthcare- Data Analytics for Pharmaceutical Discoveries- Clinical Decision Support Systems- Computer- Assisted Medical Image Analysis Systems- Mobile Imaging and Analytics for Biomedical Data.									<b>12</b>
III	<b>HR Analytics:</b> Evolution of HR Analytics, HR information systems and									<b>12</b>

	data sources, HR Metric and HR Analytics, Evolution of HR Analytics; HR Metrics and HR Analytics; Intuition versus analytical thinking; HRMS/HRIS and data sources; Analytics frameworks like LAMP, HCM:21(r) Model.	
IV	<b>Performance Analysis:</b> Predicting employee performance, Training requirements, evaluating training and development, Optimizing selection and promotion decisions.	<b>12</b>
V	<b>Tourism and Hospitality Analytics:</b> Guest Analytics – Loyalty Analytics – Customer Satisfaction – Dynamic Pricing – optimized disruption management – Fraud detection in payments.	<b>12</b>
<b>TOTAL HOURS</b>		<b>60</b>
<b>Course Outcomes</b>		<b>Programme Outcomes</b>
CO	On completion of this course, students will	
CO1	Understand and critically apply the concepts and methods of business analytics	PO1, PO2, PO3, PO4, PO5, PO6
CO2	Identify, model and solve decision problems in different settings.	PO1, PO2, PO3, PO4, PO5, PO6
CO3	Interpret results/solutions and identify appropriate courses of action for a given managerial situation whether a problem or an opportunity.	PO1, PO2, PO3, PO4, PO5, PO6
CO4	Create viable solutions to decision making problems.	PO1, PO2, PO3, PO4, PO5, PO6
CO5	Instill a sense of ethical decision-making and a commitment to the long-run welfare of both organizations and the communities they serve.	PO1, PO2, PO3, PO4, PO5, PO6

	<b>FINANCIAL ANALYTICS</b>	Elect	4	-	-	-	3	25	75	100
Learning Objectives										
<b>LO1</b>	To analyze and model financial data.									
<b>LO2</b>	To construct and optimize asset portfolios.									
<b>LO3</b>	To evaluate and model Risk on various financial assets.									
<b>LO4</b>	To use the most powerful and sophisticated routines in R for analytical finance.									
<b>LO5</b>	To acquire logical & analytical skills in financial analytics.									

UNIT	Contents	No. Of. Hours
I	<b>Financial Analytics:</b> Introduction: Meaning-Importance of Financial Analytics uses-Features-Documents used in Financial Analytics: Balance Sheet, Income Statement, Cash flow statement-Elements of Financial Health: Liquidity, Leverage, Profitability. Financial Securities: Bond and Stock investments - Housing and Euro crisis - Securities Datasets and Visualization - Plotting multiple series.	12
II	<b>Descriptive Analytics:</b> Data Exploration, Dimension Reduction and Data Clustering Geographical Mapping, Market Basket Analysis. Predictive Analytics, Fraud Detection, Churn Analysis, Crime Mapping, Content Analytics, Sentiment Analysis. Analyzing financial data and implement financial models. Process of Data analytics: obtaining publicly available data, refining such data, implement the models and generate typical output, Prices and individual security returns, Portfolio returns, Risks, Factor Models.	12
III	<b>Forecasting Analytics:</b> Estimating Demand Curves and Optimize Price, Price Bundling, Non Linear Pricing and Price Skimming, Forecasting, Simple Regression and Correlation Multiple Regression to forecast sales. Modeling Trend and Seasonality Ratio to Moving Average Method, Winter's Method.	12
IV	<b>Business Intelligence &amp; Tableau:</b> Definition of BI – A Brief History of BI – The Architecture of BI. The origin and Drivers of BI. Successful BI Implementation – Analytics Overview – Descriptive, Predictive and Perspective Analytics. Business reporting and Visualization – components - A brief history of data visualization – Different types of charts and graphs – The emergence of data visualization and visual analytics – Performance dashboards – Dashboard design – Best practices in dashboarddesign – Business performance management – Balanced Scorecards – Six sigma as a performance measurement system.	12
V	<b>Visualizations:</b> Using Tableau to Summarize Data, Slicing and Dicing Financial Data, Charts to Summarize Marketing Data. Functions to Summarize Data, Pricing Analytics, Risk based pricing, Fraud Detection and Prediction, Recovery Management, Loss Risk Forecasting, Risk Profiling, Portfolio Stress Testing.	12
<b>Course Outcomes</b>		<b>Programme Outcomes</b>
CO	On completion of this course, students will	

CO1	Interpret and discuss the outputs of given financial models and create their own models.	PO1, PO2, PO3, PO4, PO5, PO6
CO2	Design and create visualizations that clearly communicate financial data insights.	PO1, PO2, PO3, PO4, PO5, PO6
CO3	Gain essential knowledge and hands-on experience in the data analysis process, including data scraping, manipulation, and exploratory data analysis.	PO1, PO2, PO3, PO4, PO5, PO6
CO4	Be prepared for more advanced applied financial modeling courses.	PO1, PO2, PO3, PO4, PO5, PO6
CO5	Improve leadership, teamwork and critical thinking skills for financial decision making.	PO1, PO2, PO3, PO4, PO5, PO6
<b>Textbooks</b>

	<b>MARKETING ANALYTICS</b>	<b>ELECT</b>	4	-	-	-	3	25	75	100
<b>Learning Objectives</b>										
LO1	Understand the importance of marketing analytics for forward looking and systematic allocation of marketing resources 2.									
LO2	Know how to use marketing analytics to develop predictive marketing dashboard for organization									
LO3	Recognize challenges in dealing with data sets in marketing.									
LO4	Identify and apply appropriate algorithms for analyzing the social media and web data									
LO5	Make choices for a model for new machine learning tasks.									
UNIT	Contents								No. Of. Hours	
I	<b>Marketing Analytics</b> : Introduction to marketing research, Research design setup, Qualitative research, Quantitative research, Concept development, scale development, Exploring Data, Descriptive Statistics. Product analytics- features, attributes, benefits, Price analytics, Promotion analytics, Channel analytics, Multiple Discriminate analysis.								<b>12</b>	
II	<b>Customer Analytics:</b> Customer Analytics, Analyzing customer satisfaction, Prospecting and Targeting the Right Customers, Covariance and Correlation analysis, Developing Customers, Retaining Customers, Customer lifetime value case, Factor analysis. Market Segmentation & Cluster Analysis, Scatterplots & Correlation Analysis, Linear Regression, Model Validation & Assessment, Positioning analytics, Cross tabulation.								<b>12</b>	
III	<b>Social Media Analytics (SMA)</b> :Social media landscape, Need for SMA; SMA in Small organizations; SMA in large organizations; Application of SMA in different areas Network fundamentals and models: The social networks perspective - nodes, ties and influencers, Social network and web data and methods. Graphs and Matrices- Basic measures for								<b>12</b>	

	individuals and networks. Information visualization.	
IV	<b>Facebook Analytics:</b> Introduction, parameters, demographics. Analyzing page audience. Reach and Engagement analysis. Post- performance on FB. Social campaigns. Measuring and Analyzing social campaigns, defining goals and evaluating outcomes, Network Analysis. 9 (LinkedIn, Instagram, YouTube Twitter etc. Google analytics. Introduction. (Websites)	<b>12</b>
V	<b>Web Analytics and making connections :</b> Link analysis. Random graphs and network evolution. Social contexts: Affiliation and identity. Web analytics tools: Clickstream analysis, A/B testing, online surveys, Web crawling and Indexing.	<b>12</b>
<b>TOTAL HOURS</b>		<b>60</b>
<b>Course Outcomes</b>		<b>Programme Outcomes</b>
CO	On completion of this course, students will	
CO1	Critically evaluate the key analytical frameworks and tools used in marketing.  Apply key marketing theories, frameworks and tools to solve marketing problems.	PO1, PO2, PO3, PO4, PO5, PO6
CO2	Utilize information of a firm's external and internal marketing environment to identify and prioritize appropriate marketing strategies.	PO1, PO2, PO3, PO4, PO5, PO6
CO3	Exercise critical judgment through engagement and reflection with existing marketing literature and new developments in the marketing environment.	PO1, PO2, PO3, PO4, PO5, PO6
CO4	Critically evaluate the marketing function and the role it plays in achieving organizational success both in commercial and non-commercial settings.	PO1, PO2, PO3, PO4, PO5, PO6
CO5	Evaluate and act upon the ethical and environmental concerns linked to marketing activities.	PO1, PO2, PO3, PO4, PO5, PO6

	<b>DATA COMMUNICATION</b>	Elective	4	-	-	-	3	25	75	100

<b>AND COMPUTER NETWORKS</b>										
<b>Learning Objectives</b>										
LO1	To introduce the fundamental network architecture concepts and their core principle issues in the emerging communication / data networks.									
LO2	To have a complete picture of the data and computer networks systematically									
LO3	To provide a strong foundation in networking concepts and technology									
LO4	To know the significance of various Flow control and Congestion control Mechanisms									
LO5	To know the Functioning of various Application layer Protocols.									
<b>UNIT</b>	<b>Contents</b>								<b>No. Of. Hours</b>	
I	<b>Data Communications:</b> Introduction– Networks – The Internet – Protocols and Standards- Network Models: OSI model – TCP/IP protocol suite – Transmission Media: Guided media – Unguided Media.								<b>12</b>	
II	<b>Data Link Layer:</b> Error Detection and Correction: Introduction- Block coding – Linear block codes – Cyclic Codes – Checksum. Framing – Flow and Error Control: Protocols –Noiseless Channels: Stop- and –Wait – Noisy Channel: Stop-and Wait Automatic Repeat Request-Go-Back –N.								<b>12</b>	
III	<b>Medium Access and Network Layer:</b> Multiple Access: Random Access – Controlled access- Channelization. Network Layer Logical addressing: IPv4 addresses – IPv6 addresses. Transport Layer: Process to Process delivery: UDP – TCP. Congestion Control – Quality of Service								<b>12</b>	
IV	<b>Application Layer:</b> Domain Naming System: Name Space - Domain Name Space - Distribution of Name Space - DNS in the INTERNET - Resolution–Remote logging – E-mail – FTP.								<b>12</b>	
V	<b>Wireless Networks:</b> Wireless Communications – Principles and Fundamentals. WLANs – WPAN- Satellite Networks - Ad-hoc Networks								<b>12</b>	
<b>TOTAL HOURS</b>								<b>60</b>		
<b>Course Outcomes</b>								<b>Programme Outcomes</b>		
CO	On completion of this course, students will									
CO1	Understand the basics of data communication, networking, internet and their importance.								PO1, PO2, PO3, PO4, PO5, PO6	

CO2	Analyze the services and features of various protocol layers in data networks.	PO1, PO2, PO3, PO4, PO5, PO6
CO3	Differentiate wired and wireless computer networks	PO1, PO2, PO3, PO4, PO5, PO6
CO4	Analyze TCP/IP and their protocols.	PO1, PO2, PO3, PO4, PO5, PO6
CO5	Recognize the different internet devices and their functions.	PO1, PO2, PO3, PO4, PO5, PO6

<b>Learning Objectives:</b>										
<ul style="list-style-type: none"> <li>To understand the software engineering concepts and to create a system model in real life applications</li> </ul>										
<b>Course Outcomes:</b> (for students: To know what they are going to learn)										
<b>CO1:</b> Gain basic knowledge of analysis and design of systems										
<b>CO2:</b> Ability to apply software engineering principles and techniques										
<b>CO3:</b> Model a reliable and cost-effective software system										
<b>CO4:</b> Ability to design an effective model of the system										
<b>CO5:</b> Perform Testing at various levels and produce an efficient system.										
Units	Contents							Required Hours		
<b>I</b>	<b>Introduction:</b> The software engineering discipline, programs vs. software products, why study software engineering, emergence of software engineering, Notable changes in software development practices, computer systems engineering.							<b>12</b>		
<b>II</b>	<b>Requirements Analysis and Specification:</b> Requirements gathering and analysis, Software requirements specification (SRS) <b>Software Design:</b> Good software design, cohesion and coupling, neat arrangement, software design approaches, object- oriented vs function-oriented design							<b>12</b>		
<b>III</b>	<b>Function-Oriented Software Design:</b> Overview of SA/SD methodology, structured analysis, data flow diagrams (DFD's), structured design, detailed design.							<b>12</b>		
<b>IV</b>	<b>Coding and Testing:</b> <b>Coding;</b> code review; testing; testing in the large vs testing in the small; unit testing; black-box testing; white-box testing; debugging; program analysis tools; integration testing; system testing; some general							<b>12</b>		

	issues associated with testing.	
V	<b>Software Maintenance:</b> Characteristic of software maintenance; software reverse engineering; software maintenance process models; estimation of maintenance cost;	12

#### SOFTWARE QUALITY ASSURANCE

Subject Code	L	T	P	S	Credits	Inst. Hours	Marks		
							CIA	External	Total
	4	0	0	0	3	4	25	75	100
<b>Learning Objectives</b>									
LO1	Learn the basic concepts of Software Quality Assurance.								

<b>LO2</b>	Understand quality management processes	
<b>LO3</b>	Understand the importance of standards in the quality management process and their impact on the final product.	
<b>LO4</b>	Understand to apply software testing techniques in commercial environment	
<b>LO5</b>	Gain knowledge of the various software development methodologies and their impact on quality assurance processes.	
<b>Unit</b>	<b>Contents</b>	<b>No. of Hours</b>
I	Introduction- quality and the quality system – standards and procedures technical activities. Software tasks –management responsibility – quality system – contract review – design control – document control – purchasing product identification and traceability.	<b>12</b>
II	Process control–checking– identification of testing tools– control of non conforming product –corrective action.	<b>12</b>
III	Handling, storage, packing and delivery –quality records- internal quality audits –training –servicing –statistical techniques.	<b>12</b>
IV	QA and new technologies –QA and Human–computer interface- process modeling–standards and procedures.	<b>12</b>
V	ISO-9001-ElementsofISO9001-improvingqualitysystem– Case study.	<b>12</b>
<b>TOTAL</b>		<b>60</b>
<b>CO</b>	<b>Course Outcomes</b>	
CO1	To have broad understanding of the role of Quality Assurance in Software Engineering.	
CO2	Illustrate the role of automation in software quality assurance and gain practical experience in using automated testing tools	
CO3	Apply the concepts in preparing the quality plan & documents.	
CO4	Analyze and executing software test plans, test cases, and test scripts.	
CO5	Evaluate information quality, software quality and business value of information system.

	<b>Organizational Behaviour</b>	<b>Elec</b>	4	-	-	-	3	5	25	75	100

		t								
Learning Objectives										
CO1	To have extensive knowledge on OB and the scope of OB.									
CO2	To create awareness of Individual Behaviour.									
CO3	To enhance the understanding of Group Behaviour									
CO4	To know the basics of Organisational Culture and Organisational Structure									
CO5	To understand Organisational Change, Conflict and Power									
UNIT	Details									No. of Hours
I	INTRODUCTION : Concept of Organizational Behavior (OB): Nature, Scope and Role of OB: Disciplines that contribute to OB; Opportunities for OB (Globalization, Indian workforce diversity, customer service, innovation and change, networked organizations, work-life balance, people skills, positive work environment, ethics)									12
II	<p>INDIVIDUAL BEHAVIOUR:</p> <p>1. Learning, attitude and Job satisfaction: Concept of learning, conditioning, shaping and reinforcement. Concept of attitude, components, behavior and attitude. Job satisfaction: causation; impact of satisfied employees on workplace.</p> <p>2. Motivation : Concept; Theories (Hierarchy of needs, X and Y, Two factor, McClelland, Goal setting, Self-efficacy, Equity theory); Job characteristics model; Redesigning jobs,</p> <p>3. Personality and Values: Concept of personality; Myers-Briggs Type Indicator (MBTI); Big Five model. Relevance of values; Linking personality and values to the workplace (person-job fit, person-organization fit)</p> <p>4. Perception, Decision Making : Perception and Judgement Factors; Linking perception to individual decision making:</p>									12
III	<p>GROUP BEHAVIOUR : 1. Groups and Work Teams : Concept : Five Stage model of group development; Group norms, cohesiveness ; Group think and shift ; Teams; types of teams; Creating team players from individuals and team based work(TBW) 2. Leadership : Concept; Trait theories; Behavioral theories (Ohio and Michigan studies); Contingency theories (Fiedler, Hersey and Blanchard, Path-</p>									12

	Goal);	
IV	ORGANISATIONAL CULTURE AND STRUCTURE : Concept of culture; Impact (functions and liability); Creating and sustaining culture: Concept of structure, Prevalent organizational designs: New design options	12
V	ORGANISATIONAL CHANGE, CONFLICT AND POWER: Forces of change; Planned change; Resistance; Approaches (Lewin's model, Organisational development);. Concept of conflict, Conflict process; Types, Functional/ Dysfunctional. Introduction to power and politics.	12
	<b>TOTAL</b>	<b>60</b>
<b>Course Outcomes</b>	On Completion of the course the students will	<b>Program Outcomes</b>
<b>CO1</b>	To define Organisational Behaviour, Understand the opportunity through OB.	PO1, PO2, PO3, PO4, PO5, PO6
<b>CO2</b>	To apply self-awareness, motivation, leadership and learning theories at workplace.	PO1, PO2, PO3, PO4, PO5, PO6
<b>CO3</b>	To analyze the complexities and solutions of group behaviour.	PO1, PO2, PO3, PO4, PO5, PO6
<b>CO4</b>	To impact and bring positive change in the culture of the organisation.	PO1, PO2, PO3, PO4, PO5, PO6
<b>CO5</b>	To create a congenial climate in the organization.	PO1, PO2, PO3, PO4, PO5, PO6

	<b>COMPUTING INTELLIGENCE</b>	Elect	4	-	-	-	3	25	75	100

**Learning Objectives:**

- To provide strong foundation on fundamental concepts in Computing Intelligence
- To apply basic principles of Artificial Intelligence and solutions that require problem solving, influence, perception, knowledge representation and learning

<b>Course Outcomes:</b>		
<b>CO1:</b> Describe the fundamentals of artificial intelligence concepts and searching techniques.		
<b>CO2:</b> Develop the fuzzy logic sets and membership function and defuzzification techniques.		
<b>CO3:</b> Understand the concepts of Neural Network and analyze and apply the learning techniques		
<b>CO4:</b> Understand the artificial neural networks and its applications		
<b>CO5:</b> Understand the concept of Genetic Algorithm and Analyze the optimization problems using GAs.		
<b>Units</b>	<b>Contents</b>	<b>Required Hours</b>
<b>I</b>	Introduction to AI: Problem formulation – AI Applications – Problems – State Space and Search – Production Systems – Breadth First and Depth First – Travelling Salesman Problem – Heuristic search techniques: Generate and Test – Types of Hill Climbing.	<b>12</b>
<b>II</b>	Fuzzy Logic Systems: Notion of fuzziness – Operations on fuzzy sets – T-norms and other aggregation operators – Basics of Approximate Reasoning – Compositional Rule of Inference – Fuzzy Rule Based Systems – Schemes of Fuzzification – Inferencing – Defuzzification – Fuzzy Clustering – fuzzy rule-based classifier.	<b>12</b>
<b>III</b>	Neural Networks: What is Neural Network, Learning rules and various activation functions, Single layer Perceptions, Back Propagation networks, Architecture of Backpropagation (BP) Networks, Back propagation Learning, Variation of Standard Back propagation Neural Network, Introduction to Associative Memory, Adaptive Resonance theory and Self Organizing Map, Recent Applications.	<b>12</b>
<b>IV</b>	<b>Artificial Neural Networks:</b> Fundamental Concepts – Basic Models of Artificial Neural Networks – Important Terminologies of ANNs – McCulloch-Pitts Neuron – Linear Separability – Hebb Network.	<b>12</b>
<b>V</b>	<b>Genetic Algorithm:</b> Introduction – Biological Background – Genetic Algorithm Vs Traditional Algorithm – Basic Terminologies in Genetic Algorithm – Simple GA – General Genetic Algorithm – Operators in Genetic Algorithm.	<b>12</b>

**Learning Resources:****Recommended Texts**

	<b>INFORMATION SECURITY</b>	Elect	4	-	-	-	3	25	75	100

**Learning Objectives:**

- To know the objectives of information security
- Understand the importance and application of each of confidentiality, integrity, authentication and availability
- Understand various cryptographic algorithms
- Understand the basic categories of threats to computers and networks

**Course Outcomes:****CO1:** Understand network security threats, security services, and countermeasures**CO2:** Understand vulnerability analysis of network security**CO3:** Acquire background on hash functions; authentication; firewalls; intrusion detection techniques.**CO4:** Gain hands-on experience with programming and simulation techniques for security protocols.**CO5:** Apply methods for authentication, access control, intrusion detection and prevention.

<b>Units</b>	<b>Contents</b>	<b>Required Hours</b>
<b>I</b>	Introduction to Information Security : Security mindset, Computer Security Concepts (CIA), Attacks, Vulnerabilities and protections, Security Goals, Security Services, Threats, Attacks, Assets, malware, program analysis and mechanisms.	<b>12</b>
<b>II</b>	The Security Problem in Computing: The meaning of computer Security, Computer Criminals, Methods of Defense. Cryptography: Concepts and Techniques: Introduction, plain text and cipher text, substitution techniques, transposition techniques, encryption and decryption	<b>12</b>
<b>III</b>	Symmetric and Asymmetric Cryptographic Techniques: DES, AES, RSA algorithms .Authentication and Digital Signatures: Use of Cryptography for authentication, Secure Hash function, Key management – Kerberos.	<b>12</b>
<b>IV</b>	Program Security : Non-malicious Program errors – Buffer overflow, Incomplete mediation, Time-of-check to Time-of-use Errors, Viruses, Trapdoors, Salami attack, Man-in-the-middle attacks, Covert channels. File protection Mechanisms, User Authentication Designing Trusted O.S: Security polices, models of security, trusted O.S design, Assurance in trusted O.S. Implementation examples.	<b>12</b>
<b>V</b>	Security in Networks: Threats in networks, Network Security Controls – Architecture, Encryption, Content Integrity, Strong Authentication, Access Controls, Wireless Security, Honeypots, Traffic flow security. Web Security: Web security considerations, Secure Socket Layer and Transport Layer Security, Secure electronic transaction.	<b>12</b>

**Learning Resources:**

- **Recommended Texts**

	<b>GRID COMPUTING</b>	Elect	4	-	-	-	3	25	75	100

**Learning Objectives:**

- To provide the knowledge on the basic construction and use of Grid computing.
- To know and understand the grid computing applications.
- To assess the efficiency of the grid computing in solving large scale scientific problems

<b>Course Outcomes:</b>		
<b>CO1:</b> To understand the basic elements and concepts related to Grid computing		
<b>CO2:</b> To identify the Grid computing toolkits and Framework.		
<b>CO3:</b> To know about the concepts of Virtualization		
<b>CO4:</b> To analyze the concept of service oriented architecture.		
<b>CO5:</b> To Gain knowledge on grid and web service architecture.		
<b>Units</b>	<b>Contents</b>	<b>Required Hours</b>
<b>I</b>	Introduction: Early Grid Activity, Current Grid Activity, Overview of Grid Business areas, Grid Applications, Grid Infrastructures.	<b>12</b>
<b>II</b>	Grid Computing organization and their Roles: Organizations Developing Grid Standards, and Best Practice Guidelines, Global Grid Forum (GCF), #Organization Developing Grid Computing Toolkits and Framework#, Organization and building and using grid based solutions to solve computing, commercial organization building and Grid Based solutions.	<b>12</b>
<b>III</b>	Grid Computing Anatomy: The Grid Problem, The conceptual of virtual organizations, # Grid Architecture # and relationship to other distributed technology	<b>12</b>
<b>IV</b>	The Grid Computing Road Map: Autonomic computing, Business on demand and infrastructure virtualization, Service-Oriented Architecture and Grid, #Semantic Grids#.	<b>12</b>
<b>V</b>	Merging the Grid services Architecture with the Web Services Architecture: Service-Oriented Architecture, Web Service Architecture, #XML messages and Enveloping#, Service message description Mechanisms, Relationship between Web Services and Grid Services, Web services Interoperability and the role of the WS-I Organization.	<b>12</b>
<b>Learning Resources:</b>		
<b>Recommended Texts</b>		
1. Joshy Joseph and Craig Fellenstein, Grid computing, Pearson / IBM Press, PTR, 2004.		
<b>Reference Books</b>		
2. Ahmer Abbas and Graig computing, A Practical Guide to technology and applications, Charles River Media, 2003.

## ANNEXURE II

### Skill Enhancement Courses (SEC1-SEC8)

Subject Code	Subject Name	Category	L	T	P	S	Credits	Marks		
								CIA	External	Total
	<b>INTRODUCTION TO HTML</b>	SEC	2	-	-	-	2	25	75	100
<b>Learning Objectives</b>										
LO1	Insert a graphic within a web page.									
LO2	Create a link within a web page.									
LO3	Create a table within a web page.									
LO4	Insert heading levels within a web page.									
LO5	Insert ordered and unordered lists within a web page. Create a web page.									
<b>UNIT</b>	<b>Contents</b>								<b>No. Of. Hours</b>	
I	<b>Introduction:</b> Introduction to Java-Features of Java-Object Oriented Concepts-Software Evolution - Software Development,								<b>6</b>	

	SDLC Models – SDLC steps – Software Testing – Software Quality - Lexical Issues-Data Types – Variables – Arrays – Operators - Control Statements – Classes – Objects –Constructors - Overloading method - Access control - static and fixed methods - Inner classes -Inheritance-Overriding Methods-Using super-Abstract class.	
II	<b>Packages &amp; Threads:</b> Packages-Access Protection-Importing Packages-Interfaces-Exception Handling-Throw and Throws-Thread-Synchronization-Messaging- Runnable Interface-Inter thread communication-Deadlock-suspending, resuming and stopping threads-Multithreading	6
III	<b>Input/Output &amp; Collection API:</b> I/O Streams-File Streams-String Objects-String Buffer-Char Array - Java Utilities-Collectionsinterface - Collection classes-Enumeration – Vector - Stack –Hash tables - String class.	6
IV	<b>Networking:</b> Networking –Networking basics – java and the Net – InetAddress- TCP/IP Client Sockets –URL- URLConnection – TCP/IP Server Sockets – Datagrams.	6
V	<b>Graphical User Interface in Java:</b> Working with windows using AWT Classes - Class Hierarchy of Window and Panel -AWT controls - Layout Managers – Menus- Menu bars - Dialog Boxes-File Dialog- Applets-Lifecycle of Applet-Types of Applets-Event handling-Applet tags - JDBC and connecting to Databases – CRUD operations.	6
<b>TOTAL HOURS</b>		<b>30</b>
<b>Course Outcomes</b>		<b>Programme Outcomes</b>
CO	On completion of this course, students will	
CO1	Knows the basic concept in HTML Concept of resources in HTML	PO1, PO2, PO3, PO4, PO5, PO6
CO2	Knows Design concept. Concept of Meta Data Understand the concept of save the files.	PO1, PO2, PO3, PO4, PO5, PO6
CO3	Understand the page formatting. Concept of list	PO1, PO2, PO3, PO4, PO5, PO6
CO4	Creating Links. Know the concept of creating link to email address	PO1, PO2, PO3, PO4, PO5, PO6
CO5	Concept of adding images Understand the table creation.	PO1, PO2, PO3, PO4, PO5, PO6

	<b>OFFICE AUTOMATION</b>	<b>SEC</b>	2	-	-	-	2	25	75	100

#### Learning Objectives: (for teachers: what they have to do in the class/lab/field)

- The major objective in introducing the Computer Skills course is to impart training for students in Microsoft Office which has different components like MS Word, MS Excel and Power point.
- The course is highly practice oriented rather than regular classroom teaching.
- To acquire knowledge on editor, spreadsheet and presentation software.

#### Course Outcomes: (for students: To know what they are going to learn)

**CO1:** Understand the basics of computer systems and its components.

**CO2:** Understand and apply the basic concepts of a word processing package.

**CO3:** Understand and apply the basic concepts of electronic spreadsheet software.

**CO4:** Understand and apply the basic concepts of database management system.

**CO5:** Understand and create a presentation using PowerPoint tool.

Units	Contents	Required Hours
I	<b>Introductory concepts:</b> Memory unit– CPU-Input Devices: Key board, Mouse and Scanner. Output devices: Monitor, Printer. Introduction to Operating systems & its features: DOS– UNIX–Windows. Introduction to Programming Languages.	6
II	<b>Word Processing:</b> Open, Save and close word document; Editing text – tools, formatting, bullets; Spell Checker - Document formatting – Paragraph alignment, indentation, headers and footers, numbering; printing–Preview, options, merge.	6
III	<b>Spreadsheets:</b> Excel-opening, entering extend data, formatting, navigating; Formulas–entering, handling and copying; Charts–creating, formatting and printing, analysis tables, preparation of financial statements, introduction to data analytics.	6
IV	<b>Database Concepts:</b> The concept of data base management system; Data field, records, and files, Sorting and indexing data; Searching records. Designing queries, and reports; Linking of data files; Understanding Programming environment in DBMS; Developing menu drive application sin query language (MS–Access).	6
V	<b>Power point:</b> Introduction to Power point - Features – Understanding slide typecasting & viewing slides – creating slide shows. Applying special object – including objects & pictures – Slide transition– Animation effects, audio inclusion, timers.	6
		30
<b>Learning Resources:</b> <ul style="list-style-type: none"> <li>• <b>Recommended Texts</b> <ol style="list-style-type: none"> <li>1. 	<b>QUANTITATIVE APTITUDE</b>	<b>SEC</b>	2	-	-	-	2	25	75	100

**Learning Objectives:**(for teachers: what they have to do in the class/lab/field)

- To improve the quantitative skills of the students
- To prepare the students for various competitive exams

**Course Outcomes:**(for students: To know what they are going to learn)

**CO1:**To gain knowledge on LCM and HCF and its related problems

**CO2:**To get an idea of age, profit and loss related problem solving.

**CO3:**Able to understand time series simple and compound interests

**CO4:**Understanding the problem related to probability, and series

**CO5:**Able to understand graphs, charts

Units	Contents	Required Hours
<b>I</b>	Numbers- HCF and LCM of numbers-Decimal fractions- Simplification- Square roots and cube	<b>6</b>

	roots- Average- problems on Numbers	
<b>II</b>	Problems on Ages - Surds and Indices - percentage - profits and loss - ratio and proportion-partnership- Chain rule.	<b>6</b>
<b>III</b>	Time and work - pipes and cisterns - Time and Distance - problems on trains -Boats and streams - simple interest - compound interest - Logarithms - Area -Volumeandsurfacearea-racesandGamesofskill.	<b>6</b>
<b>IV</b>	Permutationandcombination-probability- TrueDiscount-BankersDiscount - Height and Distances-Odd man out & Series.	
<b>V</b>	Calendar - Clocks - stocks and shares - Data representation - Tabulation – Bar Graphs- Piecharts- Linegraphs	<b>6</b>

	<b>CYBER FORENSICS</b>	<b>SEC</b>	2	-	-	-	2	25	75	100

**Learning Objectives:**

- To correctly define and cite appropriate instances for the application of computer forensics.
- To Correctly collect and analyze computer forensic evidence and data seizure. Identify the essential and up-to-date concepts, algorithms, protocols, tools, and methodology of Computer Forensics.

**Course Outcomes:**

**CO1:** Understand the definition of computer forensics fundamentals.

**CO2:** Evaluate the different types of computer forensics technology.

**CO3:** Analyze various computer forensics systems.

**CO4:** Apply the methods for data recovery, evidence collection and data seizure.

**CO5:** Gain your knowledge of duplication and preservation of digital evidence.

Units	Contents	Required Hours
<b>I</b>	<p><b>Overview of Computer Forensics Technology:</b></p> <ul style="list-style-type: none"> <li>• Computer Forensics Fundamentals: What is Computer Forensics? Use of Computer</li> <li>• Forensics in Law Enforcement, Computer Forensics Assistance to Human</li> <li>• Resources/Employment Proceedings, Computer Forensics Services, Benefits of professional</li> <li>• Forensics Methodology, Steps taken by Computer Forensics Specialists. Types of Computer.</li> <li>• Forensics Technology: Types of Business Computer Forensic, Technology–Types of</li> </ul>	<b>6</b>
<b>II</b>	<p><b>Computer Forensics Evidence and capture:</b></p> <ul style="list-style-type: none"> <li>• Data Recovery: Data Recovery Defined, Data Back–</li> </ul>	<b>6</b>

	<p>up and Recovery, The Role of Back –up</p> <ul style="list-style-type: none"> <li>• in Data Recovery, The Data –Recovery Solution. Evidence Collection and Data Seizure:</li> <li>• Collection Options, Obstacles, Types of Evidence, The Rules of Evidence, Volatile Evidence, General Procedure, Collection and Archiving, Methods of Collections, Artefacts, Collection Steps, Controlling Contamination: The chain of custody.</li> </ul>	
<b>III</b>	<p><b>Duplication and Preservation of Digital Evidence:</b></p> <ul style="list-style-type: none"> <li>• Processing steps, Legal Aspects of collecting and Preserving Computer forensic Evidence. Computer image Verification and Authentication: Special needs of Evidential Authentication, Practical Consideration, Practical Implementation.</li> </ul>	<b>6</b>
<b>IV</b>	<p><b>Computer Forensics Analysis:</b></p> <ul style="list-style-type: none"> <li>• Discovery of Electronic Evidence: Electronic Document Discovery: A Powerful New Litigation Tool. Identification of Data: Time Travel, Forensic Identification and Analysis of Technical Surveillance Devices.</li> </ul>	<b>6</b>
<b>V</b>	<p><b>Reconstructing Past Events:</b></p> <ul style="list-style-type: none"> <li>• How to Become a Digital Detective, Useable File Formats,</li> <li>• Unusable File Formats, Converting Files.</li> <li>• Networks: Network Forensics Scenario, a technical approach, Destruction Of E–Mail, Damaging Computer Evidence, Documenting</li> <li>• The Intrusion on Destruction of Data, System Testing.</li> </ul>	<b>6</b>

**Learning Resources:**

- **Recommended Texts**

1. John R. Vacca, “Computer Forensics: Computer Crime Investigation”, 3/E, Firewall Media, New Delhi, 2002.

- **Reference Books**

1. Nelson, Phillips Enfinger, Steuart, “Computer Forensics and Investigations” Enfinger, Steuart, CENGAGE Learning, 2004.
2. Anthony Sammes and Brian Jenkinson, ”Forensic Computing: A

Practitioner's Guide", Second Edition, Springer-Verlag London Limited, 2007.

	<b>SOFTWARE TESTING</b>	<b>SEC</b>	2	-	-	-	2	25	75	100

**Learning Objectives:**

- To study various Software techniques
- To study fundamental concepts in software testing

**Course Outcomes:**

- CO1:** Understand and describe the basic concepts of functional (black box) software testing.  
**CO2:** Understand the basic application of techniques used to identify useful ideas for tests.  
**CO3:** Help determine the mission and communicate the status of your testing with the rest of your project team.  
**CO4:** Characterize a good bug report, peer-review the reports of your colleagues, and improve your own report writing.  
**CO5:** Understand where key testing concepts apply within the context of unified processes.

Units	Contents	Required Hours
<b>I</b>	Introduction: Purpose–Productivity and Quality in Software– Testing Vs Debugging– Model for Testing– Bugs– Types of Bugs – Testing and Design Style.	<b>6</b>
<b>II</b>	Flow / Graphs and Path Testing – Achievable paths – Path instrumentation – Application– Transaction Flow Testing Techniques	<b>6</b>
<b>III</b>	Data Flow Testing Strategies - Domain Testing: Domains and Paths – Domains and Interface Testing.	<b>6</b>
<b>IV</b>	Linguistic–Metrics – Structural Metric – Path Products and Path Expressions. Syntax Testing– Formats–Test Cases.	<b>6</b>

<b>V</b>	Logic Based Testing – Decision Tables–Transition Testing– States, State Graph, State Testing.	<b>6</b>

	<b>DATA MINING AND WAREHOUSING</b>	<b>SEC</b>	2	-	-	-	2	25	75	100

<b>Learning Objectives:</b>
<ul style="list-style-type: none"> <li>• To provide the knowledge on Data Mining and Warehousing concepts and techniques.</li> </ul>

- To study the basic concepts of cluster analysis
- To study a set of typical clustering methodologies, algorithms and applications.

**Course Outcomes:**

**CO1:**To understand the basic concepts and the functionality of the various data mining and data warehousing component

**CO2:** To know the concepts of Data mining system architectures

**CO3:**To analyze the principles of association rules

**CO4:** To get analytical idea on Classification and prediction methods.

**CO5:** To Gain knowledge on Cluster analysis and its methods.

**Recap:**(notforexamination)Motivation/previouslecture/relevantportionsrequiredforthe course)[Thisisdoneduring2Tutorialhours)

Units	Contents	Required Hours
I	Introduction: Data mining – Functionalities – Classification – Introduction to Data Warehousing – Data Preprocessing: Preprocessing the Data – Data cleaning – Data Integration and Transformation – Data Reduction.	6
II	Data Mining, Primitives, Languages and System Architecture: Data Mining – Primitives – Data Mining Query Language, Architecture of Data mining Systems. Concept Description, Characterization and Comparison: Concept Description, Data Generalization and Summarization.	6
III	Mining Association Rules: Basic Concepts – Single Dimensional Boolean Association Rules From Transaction Databases, Multilevel Association Rules from transaction databases.	6
IV	Classification and Prediction: Introduction – Issues – Decision Tree Induction – Bayesian Classification – Classification of Back Propagation.	6
V	Cluster Analysis: Introduction – Types of Data in Cluster Analysis, Partitioning Methods – Hierarchical Methods-Density Based Methods	6

**Learning Resources:**

- **Recommended Texts**

1. Han and M. Kamber, “Data Mining Concepts and Techniques”, 2001, Harcourt India Pvt. Ltd, New Delhi.

- **Reference Books**

1. K.P. Soman, Shyam Diwakar, V. Ajay “Insight into Data Mining Theory and Practice “, Prentice Hall of India Pvt. Ltd, New Delhi
2. Parteek Bhatia, ‘Data Mining and Data Warehousing: Principles and Practical Techniques’, Cambridge University Press, 2019

	<b>BIOMETRICS</b>	<b>SEC</b>	2	-	-	-	2	25	75	100

**Learning Objectives:**(forteachers:whattheyhavetodointheclass/lab/field)

- To learn and understand biometric technologies and their functionalities.
- To learn the role of biometrics, computational methods, context of Biometric Applications.
- To learn to develop applications with biometric security

**Course Outcomes:** (for students: To know what they are going to learn)

**CO1:** Identify the various biometric technologies.

**CO2:** Design of biometric recognition.

**CO3:** Develop simple applications for privacy

**CO4:** Understand the need of biometric in the society

**CO5:** Understand the scope of biometric techniques

Units	Contents	Required Hours
I	<b>Introduction:</b> What is Biometrics, History, Types of biometric Traits, General architecture of biometric systems, Basic working of biometric matching. <b>Face Biometrics:</b> Introduction, Background of Face Recognition, Design of Face Recognition System.	6
II	<b>Retina and Iris Biometrics:</b> Introduction, Performance of Biometrics, Design of Retina Biometrics, Design of Iris Recognition System, Iris Segmentation Method , Determination of Iris Region, Determination of Iris Region.	6
III	<b>Privacy Enhancement Using Biometrics:</b> Introduction, Privacy Concerns Associated with Biometric Deployments, Identity and Privacy, Privacy Concerns, Biometrics with Privacy Enhancement, Comparison of Various Biometrics in Terms of Privacy, Soft Biometrics.	6
IV	<b>Watermarking Techniques:</b> Introduction, Data Hiding Methods, Basic Framework of Watermarking, Classification of Watermarking, Applications of Watermarking, Attacks on Watermarks, Performance Evaluation, Characteristics of Watermarks, General Watermarking Process.	6
V	<b>Scope and Future:</b> Scope and Future Market of Biometrics, Biometric Technologies, Applications of Biometrics, Biometrics and Information Technology Infrastructure, Role of Biometrics in Enterprise Security, Role of Biometrics in Border Security, Smart Card Technology and Biometrics.	6

**Learning Resources:**

- **Recommended Texts**

1. Biometrics: Concepts and Applications by G.R Sinha and Sandeep B.Patil , Wiley, 2013

	<b>SIMULATION AND MODELING</b>	<b>SEC</b>	2	-	-	-	2	25	75	100
<p><b>Learning Objectives:</b>(for teachers: what they have to do in the class/lab/field)  In this course, modeling and simulation (M&amp;S) methodologies considering the theoretical aspects. A wide range of Modeling and Simulation concepts that will lead you to develop your own M&amp;S applications. Students learn the methodologies and tools for simulation and modeling of a real time problem/ mathematical model.</p>										
<p><b>Course Outcomes:</b>(for students: To know what they are going to learn)  <b>CO1:</b> Introduction To Modeling &amp; Simulation, Input Data Analysis and Modeling.  <b>CO2:</b> Random Variate and Number Generation. Analysis of Simulations and methods.  <b>CO3:</b> Comparing Systems via Simulation  <b>CO4:</b> Entity Body Modeling, Visualization, Animation.  <b>CO5:</b> Algorithms and Sensor Modeling.</p>										
<b>Units</b>	<b>Contents</b>							<b>Required Hours</b>		
<b>I</b>	Introduction To Modeling & Simulation – What is Modeling and Simulation? – Complexity Types – Model Types – Simulation Types – M&S Terms and Definitions Input Data Analysis – Simulation Input Modeling							<b>6</b>		
<b>II</b>	Random Variate Generation – Random Numbers – Random Number Generators – General principles – Inverse Transform Method – Acceptance Rejection Method – Composition Method – Relocate and Rescale Method – Specific distributions-Output Data Analysis							<b>6</b>		
<b>III</b>	Comparing Systems via Simulation – Introduction – Comparison Problems - Comparing Two Systems - Screening Problems - Selecting the Best - Comparison with a Standard - Comparison with a Fixed Performance Discrete Event Simulations – Introduction - Next-Event Time Advance -							<b>6</b>		
<b>IV</b>	Entity Modeling – Entity Body Modeling – Entity Body Visualization – Entity Body Animation – Entity Interaction Modeling – Building Modeling Distributed Simulation – High Level Architecture (HLA) – Federation Development and Execution Process (FEDEP)							<b>6</b>		
<b>V</b>	Optimization Algorithms – Genetic Algorithms – Simulated Annealing Examples: Sensor Systems Modeling – Human Eye Modeling – Optical Sensor Modeling – Radar Modeling.							<b>6</b>		

**Learning Resources:**

	<b>PATTERN RECOGNITION</b>	<b>SEC</b>	2	-	-	-	2	25	75	100

**Learning Objectives:** (for teachers: what they have to do in the class/lab/field)  
To study the Pattern Recognition techniques and its applications

<b>Course Outcomes:</b> (for students: To know what they are going to learn)		
<b>CO1:</b> To learn the fundamentals of Pattern Recognition techniques		
<b>CO2:</b> To learn the various Statistical Pattern recognition techniques		
<b>CO3:</b> To learn the linear discriminant functions and unsupervised learning and clustering		
<b>CO4:</b> To learn the various Syntactical Pattern recognition techniques		
<b>CO5:</b> To learn the Neural Pattern recognition techniques		
<b>Recap:</b> (not for examination) Motivation/previous lecture/relevant portions required for the course) [This is done during 2 Tutorial hours]		
<b>Units</b>	<b>Contents</b>	<b>Required Hours</b>
<b>I</b>	PATTERN RECOGNITION OVERVIEW: Pattern recognition, Classification and Description-Patterns and feature Extraction with Examples-Training and Learning in PR systems-Pattern recognition Approaches	<b>6</b>
<b>II</b>	STATISTICAL PATTERN RECOGNITION: Introduction to statistical Pattern Recognition-supervised Learning using Parametric and Non-Parametric Approaches.	<b>6</b>
<b>III</b>	LINEAR DISCRIMINANT FUNCTIONS AND UNSUPERVISED LEARNING AND CLUSTERING: Introduction-Discrete and binary Classification Problems-Techniques to directly Obtain linear Classifiers - Formulation of Unsupervised Learning Problems-Clustering for unsupervised learning and classification	<b>6</b>
<b>IV</b>	SYNTACTIC PATTERN RECOGNITION: Overview of Syntactic Pattern Recognition-Syntactic recognition via parsing and other grammars-Graphical Approaches to syntactic pattern recognition-Learning via grammatical inference.	<b>6</b>
<b>V</b>	NEURAL PATTERN RECOGNITION: Introduction to Neural Networks-Feed forward Networks and training by Back Propagation-Content Addressable Memory Approaches and Unsupervised Learning in Neural PR	<b>6</b>

<b>Skill Enhancement course</b>	<b>ADVANCED EXCEL</b>	SEC	2	-	-	-	2	2	25	75	100
<b>Course Objective</b>											
C1	Handle large amounts of data										
C2	Aggregate numeric data and summarize into categories and subcategories										
C3	Filtering, sorting, and grouping data or subsets of data										
C4	Create pivot tables to consolidate data from multiple files										
C5	Presenting data in the form of charts and graphs										
<b>UNIT</b>	<b>Details</b>									<b>No. of Hours</b>	
I	Basics of Excel- Customizing common options- Absolute and relative cells- Protecting and un-protecting worksheets and cells- Working with									6	

	Functions - Writing conditional expressions - logical functions - lookup and reference functions- VlookUP with Exact Match, Approximate Match- Nested VlookUP with Exact Match- VlookUP with Tables, Dynamic Ranges- Nested VlookUP with Exact Match- Using VLOOKUP to consolidate Data from Multiple Sheets	
II	Data Validations - Specifying a valid range of values - Specifying a list of valid values- Specifying custom validations based on formula - Working with Templates Designing the structure of a template-templates for standardization of worksheets - Sorting and Filtering Data - Sorting tables	6
III	Creating Pivot tables Formatting and customizing Pivot tables-advanced options of Pivot tables- Pivot charts- Consolidating data from multiple sheets and files using Pivot tables- external data sources- data consolidation feature to consolidate data- Show Value As % of Row, % of Column, Running Total, Compare with Specific Field- Viewing Subtotal under Pivot- Creating Slicers.	6
IV	More Functions Date and time functions- Text functions- Database functions- Power Functions - Formatting Using auto formatting option for worksheets- Using conditional formatting option for rows, columns and cells- WhatIf Analysis - Goal Seek- Data Tables- Scenario Manager.	6
V	Charts - Formatting Charts- 3D Graphs- Bar and Line Chart together-Secondary Axis in Graphs- Sharing Charts with PowerPoint / MS Word, Dynamically- New Features Of Excel Sparklines, Inline Charts, data Charts- Overview of all the new features.	6
	<b>Total</b>	<b>30</b>
<b>Course Outcomes</b>		<b>Programme Outcome</b>
CO	Upon completion of the course the students would be able to:	
1	Handle large amounts of data	PO1, PO6
2	Aggregate numeric data and summarize into categories and subcategories	PO2
3	Filtering, sorting, and grouping data or subsets of data	PO4 ,PO7
4	Create pivot tables to consolidate data from multiple files	PO6
5	Presenting data in the form of charts and graphs	PO7,PO8

<b>SKILL ENHANCEMENT COURSE</b>	<b>WEB TECHNOLOGY</b>	SEC	2	-	-	-	2	2	25	75	100

**Learning Objectives:** (for teachers: what they have to do in the class/lab/field)

- To learn the basic web concepts and to create rich internet applications that use most recent client-side programming technologies.
- To learn the basics of HTML, DHTML, XML, CSS, Java Script and AJAX.

**Course Outcomes:**(for students: To know what they are going to learn)

**CO1:** Ability to Develop and publish Web pages using Hypertext Markup Language(HTML).

**CO2:** Ability to optimize page styles and layout with Cascading Style Sheets(CSS).

**CO3:** Ability to Understand, analyze and apply the role of languages to create a capstone

**CO4:** Website using client-side web programming languages like HTML, DHTML, CSS, XML, JavaScript, and AJAX

**CO5:** Able to understand the concept of jQuery and AngularJS

Units	Contents	Required Hours
I	HTML: HTML-Introduction-tag basics- page structure-adding comments working with texts, paragraphs and line break. Emphasizing test- heading and horizontal rules-list-font size, face and color-alignment- links-tables-frames	6
II	Forms & Images Using Html: Graphics: Introduction-How to work efficiently with images in web pages, image maps, GIF animation, adding multimedia, data collection with html forms textbox, password, list box, combo box, text area, tools for building web page front page	6
III	XML & DHTML: Cascading style sheet (CSS)-what is CSS-Why we use CSS-adding CSS to your web pages-Grouping styles-extensible markup language (XML).	6
IV	JavaScript: Client side scripting, What is JavaScript, How to develop JavaScript, simple JavaScript, variables, functions, conditions, loops and repetition.	6
V	Ajax: Introduction, advantages & disadvantages, Purpose of it, ajax based web application, alternatives of ajax Java Script & AJAX: Introduction to array-operators, making statements-date & time-mathematics- strings-Event handling-form properties. AJAX. Introduction to jQuery and AngularJS	6

Subject Code	Subject Name	Category	L	T	P	S	Credits	Inst. Hours	Marks		
									CIA	External	Total
<b>SKILL ENHANCEMENT COURSE</b>	<b>IMAGE PROCESSING</b>	SEC	2	-	-	-	2	2	25	75	100

**Learning Objectives:**(for teachers: what they have to do in the class/lab/field)

- To become familiar with digital image fundamentals
- To get exposed to simple image enhancement techniques in Spatial and Frequency domain.
- To learn concepts of degradation function and restoration techniques.
- To study the image segmentation and representation techniques.
- To become familiar with image compression and recognition methods

**Course Outcomes:**(for students: To know what they are going to learn)

**CO1:** Gain a fundamental understanding of digital image processing

**CO2:** Learn the basics of how digital images are represented and processed

**CO3:** Understand image enhancement techniques

**CO4:** Develop your programming skills to apply digital image processing algorithms

**CO5:** Design solutions for real-world problems that involve digital image processing.

Units	Contents	Required Hours
<b>I</b>	<b>DIGITAL IMAGE FUNDAMENTALS:</b> Steps in Digital Image Processing – Components – Elements of Visual Perception – Image Sensing and Acquisition – Image Sampling and Quantization	<b>6</b>
<b>II</b>	<b>IMAGE ENHANCEMENT:</b> Spatial Domain: Gray level transformations – Histogram processing – Basics of Spatial Filtering– Smoothing and Sharpening Spatial Filtering,	<b>6</b>
<b>III</b>	<b>IMAGE RESTORATION:</b> Image Restoration - degradation model, Properties, Noise models – Mean Filters – Order Statistics – Adaptive filters	<b>6</b>
<b>IV</b>	<b>IMAGE SEGMENTATION:</b> Edge detection, Edge linking via Hough transform – Thresholding - Region based segmentation – Region growing – Region splitting and merging	<b>6</b>
<b>V</b>	<b>IMAGE COMPRESSION AND RECOGNITION:</b> Need for data compression, Huffman, Run Length Encoding, Shift codes, Arithmetic coding, JPEG standard, MPEG.	<b>6</b>

**Learning Resources:**

- **Recommended Texts**

1. Anil K. Jain , Digital Image Processing: Principles and Applications
2. Wayne Niblack, "Introduction to Digital Image Processing"
3. B.S. Manjunath and Srimat T.V. Rao, "Digital Image Processing: An Algorithmic Approach Using Java"

- **Reference Books**

1. Rafael C. Gonzalez and Richard Eugene Woods, "Digital Image Processing"
