1. Introduction

B.Sc. Psychology: Programme Outcome, Programme Specific Outcome and Course Outcome

Psychology is the scientific study of mind and behaviour. It is a broad and diverse field with many career options for the students. This course forms the foundation for the students aspiring to specialize in various fields such as education, hospital, industrial, forensic, and many more. The key core areas of study in Psychology include general psychology, developmental psychology, social psychology, abnormal psychology and experimental psychology. This programme helps learners in building a solid foundation for higher studies in Psychology. In addition students are equipped with skills that facilitate employment. The Bachelor's Degree B.Sc. Psychology is awarded to the students on the basis of knowledge, understanding, skills, attitudes, values and academic achievements expected to be acquired by learners at the end of the Programme. Learning outcomes of Psychology are aimed at facilitating the learners to acquire these attributes, keeping in view of their preferences and aspirations for gaining knowledge of Psychology.

LEARNING OUTCOMES-BASED CURRICULUM FRAMEWORK GUIDELINES BASED REGULATIONS FOR UNDER GRADUATE PROGRAMME	
Programme	U.G.
Programme Code:	
Duration:	3 years [UG]
Programme Outcomes:	P01: Disciplinary knowledge: Capable of demonstrating comprehensive knowledge and understanding of one or more disciplines that form a part of an undergraduate Programme of study P02: Communication Skills: Ability to express thoughts and ideas effectively in writing and orally; Communicate with others using appropriate media; confidently share one's views and express herself/himself; demonstrate the ability to listen carefully, read and write analytically, and present complex information in a clear and concise manner to different groups. P03: Critical thinking: Capability to apply analytic thought to a

	body of knowledge; analyse and evaluate evidence, arguments, claims, beliefs on the basis of empirical evidence; identify relevant assumptions or implications; formulate coherent arguments; critically evaluate practices, policies and theories by following scientific approach to knowledge development. P04: Problem solving: Capacity to extrapolate from what one has learned and apply their competencies to solve different kinds of non-familiar problems, rather than replicate curriculum content knowledge; and apply one's learning to real life situations. P05: Analytical reasoning: Ability to evaluate the reliability and relevance of evidence; identify logical flaws and holes in the arguments of others; analyze and synthesize data from a variety of sources; draw valid conclusions and support them with evidence and examples, and addressing opposing viewpoints.
	P06: Research-related skills: A sense of inquiry and capability for asking relevant/appropriate questions, problem arising, synthesising and articulating; Ability to recognise cause-and- effect relationships, define problems, formulate hypotheses, test hypotheses, analyse, interpret and draw conclusions from data, establish hypotheses, predict cause-and-effect relationships; ability to plan, execute and report the results of an experiment or investigation P07: Cooperation/Team work: Ability to work effectively and respectfully with diverse teams; facilitate cooperative or coordinated effort on the part of a group, and act together as a group or a team in the interests of a common cause and work efficiently as a member of a team P08: Scientific reasoning: Ability to analyse, interpret and draw conclusions from quantitative/qualitative data; and critically evaluate ideas, evidence and experiences from an open- minded and reasoned perspective. P09: Reflective thinking: Critical sensibility to lived experiences, with self awareness and reflexivity of both self and society. P010 Information/digital literacy: Capability to use ICT in a variety of learning situations, demonstrate ability to access, evaluate, and use a variety of relevant information sources; and use appropriate software for analysis of data. PO 11 Self-directed learning: Ability to work independently, identify appropriate resources required for a project, and manage a project through to completion. PO 12 Multicultural competence: Possess knowledge of the values and beliefs of multiple cultures and a global perspective; and capability to effectively engage in a multicultural society and interact respectfully with diverse groups.

	PO 13: Moral and ethical awareness/reasoning: Ability to embrace moral/ethical values in conducting one's life, formulate a position/argument about an ethical issue from multiple perspectives, and use ethical practices in all work. Capable of demonstrating the ability to identify ethical issues related to one's work, avoid unethical behaviour such as fabrication, falsification or misrepresentation of data or committing plagiarism, not adhering to intellectual property rights; appreciating environmental and sustainability issues; and adopting objective, unbiased and truthful actions in all aspects of work. PO 14: Leadership readiness/qualities: Capability for mapping out the tasks of a team or an organization, and setting direction, formulating an inspiring vision, building a team who can help achieve the vision, motivating and inspiring team members to engage with that vision, and using management skills to guide people to the right destination, in a smooth and efficient way. PO 15: Lifelong learning: Ability to acquire knowledge and skills, including „learning how to learn“, that are necessary for participating in learning activities throughout life, through self-paced and self-directed learning aimed at personal development, meeting economic, social and cultural objectives, and adapting to changing trades and demands of work place through knowledge/skill development/reskilling.
Programme Specific Outcomes:	PSO1: To enable students to apply basic microeconomic, macroeconomic and monetary concepts and theories in real life and decision making. PSO 2: To sensitize students to various economic issues related to Development, Growth, International Economics, Sustainable Development and Environment. PSO 3: To familiarize students to the concepts and theories related to Finance, Investments and Modern Marketing. PSO 4: Evaluate various social and economic problems in the society and develop answer to the problems as global citizens. PSO 5: Enhance skills of analytical and critical thinking to analyze effectiveness of economic policies.

3 – Strong, 2- Medium, 1- Low

Highlights of the Revamped Curriculum:

- Student-centric, meeting the demands of industry & society, incorporating industrial components, hands-on training, skill enhancement modules, industrial project, project with viva-voce, exposure to entrepreneurial skills, training for competitive examinations, sustaining the quality of the core components and incorporating application oriented content wherever required.
- The Core subjects include latest developments in the education and scientific front, advanced programming packages allied with the discipline topics, practical training, devising mathematical models and algorithms for providing solutions to industry / real life situations. The curriculum also facilitates peer learning with advanced mathematical topics in the final semester, catering to the needs of stakeholders with research aptitude.
- The General Studies and Mathematics based problem solving skills are included as mandatory components in the ‘Training for Competitive Examinations’ course at the final semester, a first of its kind.
- The curriculum is designed so as to strengthen the Industry-Academia interface and provide more job opportunities for the students.
- The Industrial Statistics course is newly introduced in the fourth semester, to expose the students to real life problems and train the students on designing a mathematical model to provide solutions to the industrial problems.
- The Internship during the second year vacation will help the students gain valuable work experience, that connects classroom knowledge to real world experience and to narrow down and focus on the career path.

- Project with viva-voce component in the fifth semester enables the student, application of conceptual knowledge to practical situations. The state of art technologies in conducting a Explain in a scientific and systematic way and arriving at a precise solution is ensured. Such innovative provisions of the industrial training, project and internships will give students an edge over the counterparts in the job market.
- State-of Art techniques from the streams of multi-disciplinary, cross disciplinary and inter disciplinary nature are incorporated as Elective courses, covering conventional topics to the latest - Artificial Intelligence.

Value additions in the Revamped Curriculum:

Semester	Newly introduced Components	Outcome / Benefits
I	Foundation Course To ease the transition of learning from higher secondary to higher education, providing an overview of the pedagogy of learning Literature and analysing the world through the literary lens gives rise to a new perspective.	➤ Instill Confidence among students ➤ Create interest for the subject
I, II, III, IV	Skill Enhancement papers (Discipline centric / Generic / Entrepreneurial)	➤ Industry ready graduates ➤ Skilled human resource ➤ Students are equipped with essential skills to make them employable
		➤ Training on language and communication skills enable the students gain knowledge and exposure in the competitive world.

		➤ Discipline centric skill will improve the Technical knowhow of solving real life problems.
III, IV, V & VI	Elective papers	➤ Strengthening the domain knowledge ➤ Introducing the stakeholders to the State-of Art techniques from the streams of multi-disciplinary, cross disciplinary and inter disciplinary nature ➤ Emerging topics in higher education/ industry/ communication network / health sector etc. are introduced with hands-on-training.
IV	Elective Papers	➤ Exposure to industry moulds students into solution providers ➤ Generates Industry ready graduates ➤ Employment opportunities enhanced
V Semester	Elective papers	➤ Self-learning is enhanced ➤ Application of the concept to real situation is conceived resulting in tangible outcome

VI Semester	Elective papers	➤ Enriches the study beyond the course. ➤ Developing a research framework and presenting their independent and intellectual ideas effectively.
Extra Credits: For Advanced Learners / Honors degree		➤ To cater to the needs of peer learners / research aspirants
Skills acquired from the Courses		Knowledge, Problem Solving, Analytical ability, Professional Competency, Professional Communication and Transferrable Skill

PART III - CORE PAPERS

Title of the Course		Introduction to Psychology I					
Paper Number		CORE I					
Category	Core	Year	I	Credits	5	Course Code	
		Semester	I				
Instructional Hours per week		Lecture	Tutorial		Lab Practice		Total
		4	1		--		5
Pre-requisite							
Objectives of the Course		• To offer the students a comprehensive overview and understanding of the Origins, Goals, Research Methods and Fields of Specialization in Psychology. • The basic principles of sensation for vision, hearing, smell, taste and bodily senses. • The principles of Perception and Illusion. • Learning theories highlighting on the principles of Classical and Operant Conditioning and Observational Learning. • Emotions and theoretical perspectives of emotions.					
Course Outline		Unit I: Introduction to Psychology: Definition of Psychology. Nature of Psychology. Origin of Psychology. Philosophical origins: Early Indian and Greek thoughts, Major ideas of Descartes, Locke. Brief history of modern scientific Psychology: Structuralism, Functionalism, Behaviourism, Gestalt psychology, Piaget, Psychoanalysis, Cognitive approach. Scientific approach to Psychology.					
		Unit II: Scope of Psychology: Goals of Psychology. Role of a psychologist in society. Branches of Psychology: Clinical Psychology, Industrial Psychology, Counselling Psychology, Developmental Psychology, Social Psychology, Positive Psychology, Sports Psychology, Health Psychology, Criminal Psychology, Gender Psychology, Biopsychology.					
		Unit III: Attention, Sensation & Perception: Attention: Definition, Factors affecting attention, Set in attention. Sensation: Definition, Types of sensation, Elements of Sensation. Perception: Definition, Gestalt Laws, Subliminal perception, ESP					

	Unit IV: Learning: Characteristics of Learning. Classical conditioning (Pavlov) - Principles involved, Significance, Operant Conditioning (B.F Skinner) – Principles involved, Significance, Trial and Error (Thorndike) Conditioning – Principles Involved, Significance, Insight learning (Kohler)- Principles Involved, Significance, Social Learning Theory (Bandura)- – Principles Involved, Significance.
	Unit V: Emotion: Definition. Nature. Types. Physiological Responses-Arousal and Emotional Intensity. Theories: James Lange Theory, Cannon Bard Theory, Schachter- Singer Theory, Richard Lazarus' Theory. Communication of Emotion: Emotional Expression, Characteristics, Innate Expression of Emotions, Social Aspects of Emotional Expressions.
Extended Professional Component (is a part of internal component only, Not to be included in the External Examination question paper)	Questions related to the above topics, from various competitive examinations UPSC / TRB / NET / UGC – CSIR / GATE / TNPSC /others to be solved (To be discussed during the Tutorial hour)
Skills acquired from this course	Knowledge, Problem Solving, Analytical ability, Professional Competency, Professional Communication and Transferrable Skill

Course Outcomes:

On successful completion of the course, students will be able to

- **CO1 (K1)** Acquire knowledge on the history, methods and special areas in the field of Psychology
- **CO2 (K3)** Explain sensory systems through which information processing happens
- **CO3 (K4)** Relate the process of attention to perception and infer how we make sense of the world around us
- **CO4 (K5)** Critically examine the process of learning
- **CO5 (K1, K4)** Gain insight into complex emotional experiences of human being and analyse the experience of self in day to day life.

COURSE OUTCOMES

On successful completion of the course, students will be able to

- **C01 (K4)** – To analyse the positive and negative approach and its effect on work determinants like, job motivation,

satisfaction and performance.

- **CO2 (K2)** – To understand the role of self-efficacy and ways to improve it.
- **CO3 (K2)** – To distinguish the various conditions that implicate in developing hope and hopelessness and analyse ways to inculcate hope and build mental well-being.
- **CO4 (K2)** – To distinguish the ways to build optimism and locus of control for better performance.
- **CO5 (K3, K4)** – To analyse and apply 7C's Model of Resilience.

Title of the Course		Introduction to Psychology II					
Paper Number		CORE III					
Category	Core	Year	I	Credits	5	Course Code	
		Semester	II				
Instructional Hours per week		Lecture	Tutorial		Lab Practice		Total
		4	1		--		5
Pre-requisite							
Objectives of the Course		• To examine the various spectrum of Cognition like problem –solving and Decision making. • To understand the way memory works and stages of memory. • It provides an overview of theories of motivation and its implication on behaviour. • To understand what is intelligence and various theoretical approaches to it and to know how to asses Intelligence. • To understand the underlying concept of personality and how it applies in different settings such as the workplace, in a marriage, in forming friendship, also emphasis on the measurement of and practical applications of personality.					

Course Outline	Unit I: Cognition: Meaning – Cognitive Psychology- Types of cognition: – Mental Imagery – Concept, Problem solving- Steps- Barriers to Effective problem solving- Strategies of problem solving: Algorithms, Heuristic, Decision making – Step, Reasoning – Inductive and Deductive reasoning, Language: Nature - Main Components of Language – Phonemes Morphemes – Syntax - Semantics – Pragmatics. Unit II: Memory: Definition. Nature of memory (Encoding, storage and retrieval) Memory encoding Attention, levels of Processing, Elaboration, Imagery. Memory storage – Sensory Memory, short –Term memory, Chunking and Rehearsal, working Memory, Long-Term Memory, Explicit Memory, Implicit Memory. Memory Retrieval – Retrieval Cues and retrieval tasks. Forgetting – Encoding Failure; Retrieval Failure; Memory and Study Strategies in encoding, storage and retrieval Unit III: Motivation: Meaning, Definition, Motivation Cycle; Types of Motivation-Physiological Motivation – Hunger, Thirst, Psychological Motivation – Achievement, Affiliation, Power; Theories of Motivation – Need Theories – Maslow and ERG, Drive Reduction Theories Unit IV: Intelligence: Definition. Intelligence as a process: Piaget. Structure of intelligence: Approaches of Spearman, Thurstone, Cattell. Triarchic approach. Multiple intelligences. Concept of IQ. Evolution of intelligence testing: Stanford-Binet, Wechsler scales. Extremes of intelligence: Mental retardation and giftedness. Determiners of intelligence: heredity and environment. Emotional intelligence. Unit V: Personality: Definition, Determinants, Approaches – Psychoanalytic – Freud- Structuring Personality, Psychosexual stages of development, defence mechanism. Type approach – Jung’s typology, Trait theory – Allport; Eysenck and BIG Five; Assessment of personality – Objective, Subjective and Projective
Extended Professional Component (is a part of internal component only,	Questions related to the above topics, from various competitive examinations UPSC / TRB / NET / UGC – CSIR / GATE / TNPSC /others to be solved (To be discussed during the Tutorial hour)

On successful completion of the course, students will be able to

- **CO1 (K2, K4)** To Understand the different types of cognition and thinking processes and to analyse the steps in problem solving and decision making.
- **CO2 (K4)** To summarize and compare the various functions and memory processes involved in memory and forgetting.
- **CO3 (K1)** To outline the various theories of motivation and to understand the implications of it.
- **CO4 (K3)** To explain the theories of intelligence and the ways to assess intelligence.
- **CO5 (K3)** To explore the various theories of Personality and examine the uses of personality assessments.

Title of the Course		Developmental Psychology I					
Paper Number		CORE IV					
Category	Core	Year	I	Credits	5	Course Code	
		Semester	II				
Instructional Hours per week		Lecture	Tutorial	Lab Practice		Total	
		4	1	--		5	
Pre-requisite							

Objectives of the Course	• To provide an overview of the human development stages from conception to babyhood. • To understand the characteristics of early childhood at physiological domain. • To analyse the emotional development of childhood and socialization process. • To examine the characteristics of late childhood at physiological domain, challenges of development. • To provide various perspectives to explain cognitive and personality development in early childhood.
Course Outline	UNIT I: CONCEPTION THROUGH BIRTH Meaning of developmental changes – Significant facts about development – Developmental stages – Developmental Issues – Conception of Age. Characteristics of the Prenatal Period – How Life begins – Importance of Conception – Periods of Conception – Periods of Prenatal development – Stages of child Birth - Types of childbirth – Attitudes of significant people - Prenatal hazards & complications of low birth weight. UNIT II: INFANCY Characteristics of Infancy, developmental tasks- Major adjustment of Infancy – Conditions influencing adjustment to Postnatal life – Characteristics of the Infant – Hazards of Infancy. UNIT III: BABYHOOD Characteristics of Babyhood – Developmental tasks of babyhood – Physical development – Physiological development – Muscle Control – Speech development – Emotional behaviour – Socialization – Interest in Play Development of Understanding – Beginnings of Morality – Beginnings of Sex-Role typing – Family Relationships – Personality development – Hazards and Happiness. UNIT IV: EARLY CHILDHOOD

	Characteristics of Early Childhood – Developmental tasks – Physical development – Physiological habits – Skills of Early Childhood – Improvement in Speech – Emotions – Socialization – Play – Development of Understanding – Moral development – Common Interests – Sex-role Typing – Family Relationship – Personality development – Hazards and Happiness.
	UNIT V: LATE CHILDHOOD Characteristics of Late Childhood – Developmental tasks – Physical development – Skills – Speech improvement – Emotions and Emotional Expressions – Social groupings and Social behaviour – Play interest and activities – Increase in Understanding – Moral attitudes and behaviour – Interests – Sex-role Typing – Changes in Family relationships – Personality Changes – Hazards and Happiness.
Extended Professional Component (is a part of internal component only, Not to be included in the External Examination question paper)	Questions related to the above topics, from various competitive examinations UPSC / TRB / NET / UGC – CSIR / GATE / TNPSC /others to be solved (To be discussed during the Tutorial hour)

COURSE OUTCOMES

On successful completion of the course, students will be able to

- **O1(K2)** – To explicate the developmental stage of conception throughbirth.
- **CO2 (K1, K2)**– To elucidate the developmental tasks of early childhood.
- **CO3 (K2)**– To describe the various emotions and socialization patterns of early childhood.
- **CO4 (K4)** – To distinguish the hazards and happiness of late childhood
- **CO5 (K4)**– To critically analyze the cognitive and personality development in childhood.

Title of the Course		Cross Cultural Psychology					
Paper Number		ELECTIVE II (Discipline specific)					
Category	Elective	Year	I	Credits	3	Course Code	
		Semester	II				
Instructional Hours per week		Lecture	Tutorial		Lab Practice		Total
		3	1		--		4
Pre-requisite							
Objectives of the Course		• Introduce the principles, concepts and issues associated with the study of cross-cultural psychology. • Identify and explore the diversity associated with different cultures and how culture influences all aspects of human interaction in all situations. • Facilitate students understanding of their own cultural heritage and how these cultural perspectives impact on their lives. • Examine the role of Culture in various development aspects of human development process and emotionality. • Explore gender sensitisation in view of cultural spectrum.					
Course Outline		UNIT I: INTRODUCTION TO CULTURE AND PSYCHOLOGY Definition of Culture, Origins of Culture, Contents of Culture, Pan cultural Principles Ethics & Emics.					
		UNIT II: SOCIALIZATION & ENCULTURATION Definition, Bronfenbrenner model, Culture & Parenting - Parenting Goals & Beliefs, Baumrind parenting theory, Culture & Peer – Margaret Mead socialization theory, Social and cultural factors that influence math’s achievement.					
		UNIT III: CULTURE AND DEVELOPMENTAL PROCESS –TEMPERAMENT Three major categories of temperaments Thomas & Chess, 1977, Goodness of fit - Cross- Cultural research on Temperament; Attachment- Bowlby’s (1969) evolutionary theory of attachment, Ainsworth’s <i>Classification</i> System of Attachment; Moral reasoning- Kohlberg’s Theory of Morality, Criticism: Kohlberg’s Theory of Morality.					

	UNIT IV: CULTURE, LANGUAGE AND COMMUNICATION Structure of language, Language differences across cultures, Culture, language, and cognition – Sapir- Whorf hypothesis support and Criticisms,
	Bilingualism and culture, Components of communication – Non Verbal Communication, Role of culture in the communication process, Intracultural vs. intercultural communication-- Barna's obstacles in communication, Improving intercultural communication.
	UNIT V: CULTURE AND GENDER Definition of terms, Gender differences- Hofstede's Masculinity vs. Femininity, Cognitive differences ,Gender stereotypes, Gender role ideology, Future research
Extended Professional Component (is a part of internal component only, Not to be included in the External Examination question paper)	Questions related to the above topics, from various competitive examinations UPSC / TRB / NET / UGC – CSIR / GATE / TNPSC /others to be solved (To be discussed during the Tutorial hour)
Skills acquired from this course	Knowledge, Problem Solving, Analytical ability, Professional Competency, Professional Communication and Transferrable Skill

COURSE OUTCOMES

On successful completion of the course, students will be able to

- **CO1 (K2)** - To describe and discuss the various theoretical orientations/paradigms that describe cultural differences
- **CO2 (K4)** - To analyse and discuss the ways in which different cultures influence our socialisation and enculturation process.
- **CO3 (K6)** - To discuss and evaluate the impact of culture on human development concepts like temperament, attachment styles and morality.
- **CO4 (K2, K4)** - To understand the interaction of language, culture and communication and analyse methods to improve intercultural communication.
- **CO5 (K3)** - to examine the role of culture in the understanding gender roles, stereotypes and ideology development.

Objectives of the Course		• To have an overview of Abnormal psychology. • To comprehend the paradigms in psychopathology. • To gain understanding of Intellectual disability. • To develop insight into Somatoform and Dissociative disorders • To learn of Addiction disorders.					
Course Outline		Unit I: Introduction to Abnormal Psychology Mental health, psychological abnormality, deviance, dis function, historical views of abnormal behaviour, differences between psychosis and neurosis, clinical assessment and methods - mental status examination, clinical interviews, questionnaires, projective tests in clinical practice.					
		Unit II: Paradigms In Psychopathology. Psychoanalytic paradigm, Physiological paradigm, Cognitive paradigm, Humanistic paradigm, classification and diagnosis: DSM 5 and ICD 10 classification, issues in classification of abnormal behaviour.					
		Unit III: Intellectual Disability Definition, classification, prevalence, interpersonal deficits and behaviour problems, common intellectual disability syndromes - hypothyroidism, Fragile X syndrome, Down's, William's, PKU.					
		Unit IV: Somatoform And Dissociative Disorders Somatoform disorders- Hypochondriasis, Pain disorder, Conversion disorder and Body dysmorphic disorder Dissociative disorders- Depersonalization disorder, Dissociation amnesia and fugue, Dissociative identity disorder, Biological, Psychosocial and socio					

	cultural causal factors of somatoform and dissociative disorders, Treatment and outcomes.
	Unit V: Addiction Disorders Alcohol abuse and dependence, Drug abuse and drug dependence, Treatment and outcome.
Extended Professional Component (is a part of internal component only, Not to be included in the External Examination question paper)	Questions related to the above topics, from various competitive examinations UPSC / TRB / NET / UGC – CSIR / GATE / TNPSC / others to be solved (To be discussed during the Tutorial hour)

COURSE OUTCOMES

On successful completion of the course, the students will be able to

- CO1(K2) - To distinguish between normal & abnormal behavior and outline the historic view of abnormal psychology.
- CO2 (K2) – To understand the classification and diagnosis of abnormal behaviour.
- CO3 (K1)–To outline the common intellectual disability syndromes.
- CO4 (K4) – To elucidate various somatoform and Dissociative disorders
- CO5 (K5)– To analyze the causes and treatment of addiction.

		Semester	III				
Instructional Hours per week		Lecture	Tutorial		Lab Practice		Total
		3	1		--		4
Pre-requisite							
Objectives of the Course		● To understand basic statistical concepts. ● To learn of qualitative data and its application in research. ● To gain insight into parametric analysis. ● To comprehend Non parametric analysis and tests ● To apply statistical methods using software.					
Course Outline		Unit I: Basic statistical concepts Definition of basic concepts - statistics , descriptive statistics, inferential statistics, , population, sample, parameter, random sampling. Applied Statistics - research question, independent variable, dependent variable, confounding variable, statistical question, statistical conclusion, research conclusion, statistical procedures. Variables and constants - Meaning of variable, constant, discrete variable, continuous variable. Scales of Measurement - Scales of measurement and their characteristics - nominal scale, ordinal scale, interval scale, ratio scale - Scales of measurement and problems of statistical treatment. Measure of Central tendency - properties of mean, median and mode - effects of score transformations characteristics of random sampling distribution - using table of random numbers,- Z scores. Unit II: Organizing qualitative data Frequency distribution - grouped scores- constructing a grouped frequency distribution - apparent vs real limits - relative frequency distribution - cumulative frequency distribution.					

Percentiles and Percentile ranks - percentile point, percentile rank, computing percentiles from grouped data computation of percentile rank.

Graphical representation of frequency distribution - Abscissa, ordinate, zero point on a graph, histogram, frequency polygon, bar diagram, pie chart, cumulative percentage curve - factors affecting the shape of graphs- shape of frequency distributions - J shaped distribution, skewed distribution, kurtosis, rectangular distribution, bimodal distribution, bell shaped distribution.

Variability and Standard (Z) scores - Measure of variability - range and semi interquartile range- calculation of the variance and standard deviation - raw score method - standard scores (Z) scores - comparison of z scores and percentile ranks. Standard scores and the normal curve - nature of normal curve- standard normal curve - finding scores when the area is known.

Unit III: Parametric analysis - Basic concepts and assumptions

Correlation, scatter diagram, product moment correlation coefficient- calculating r from raw scores- rank order correlation coefficient- cautions concerning correlation coefficients.

Prediction - basics of regression , regression line - regression equation - criterion of best fit- error of prediction - standard error of estimate- interpretation of correlation and regression .

t distribution - characteristics of student's distribution of t , degrees of freedom and student's distribution of t, computing t from raw scores, levels of significance vs p values

One way analysis of variance- within group and between group variations - variance estimates and the F ratio- Post Hoc comparisons - alternative to F test - planned comparisons - ANOVA for repeated measures - factorial

	analysis for two factor design for independent groups , f test. Chi - square test for goodness of fit- interpretation of the outcome of a chi square test.
	Unit IV: Non parametric analysis - Assumption - Free tests Randomization tests- rank order test - Mann - Whitney Utest - sign test - Wilcoxon's signed - ranks test Kruskal - Wallis test - Friedman's rank test. Qualitative data analysis - Basic concepts - percentage analysis, content analysis, narrative analysis, thematic analysis.
	Unit V: Statistical methods using software SPSS data editor, SPSS viewer, importing and exporting data, alternatives to spss, data entry in spss, assigning a variable naming , sorting the data type, defining variable table, defining value tables, slotting missing values, data cleaning , working with large data set, software for qualitative data analysis.
Extended Professional Component (is a part of internal component only, Not to be included in the External Examination question paper)	Questions related to the above topics, from various competitive examinations UPSC / TRB / NET / UGC – CSIR / GATE / TNPSC /others to be solved (To be discussed during the Tutorial hour)
Skills acquired from this course	Knowledge, Problem Solving, Analytical ability, Professional Competency, Professional Communication and Transferrable Skill
Recommended Text	1. King, B.M. and Minium E W. (2011) . Statistical Reasoning in the Behavioural Sciences . 5th Edition. New Delhi: Wiley student India edition. 2. Aron A, Aron E N and Coups E J. (2007) . Statistics for Psychology. New Delhi: Pearson Education.

Psychological Testing: History, Principles, and Applications (4th Ed.). New Delhi: Pearson Education. 5. Murphy, K.R. & Davidshofer, C. O. (2004). Psychological Testing: Principles & Applications (6th Ed.) New Jersey: Prentice Hall.

Course Outcomes:

On successful completion of the course, the students will be able to

CO1 (K2) To understand and define statistics as a specialization to be used for behavioural research and explain the difference between descriptive and inferential statistics.

CO2 (K3) To recognize measurements as being one of the four scales and to understand that not all numbers can be treated alike and to understand measure of central tendency and to calculate it.

CO3 (K3) To organize scores into a frequency distribution in table form, construct a cumulative frequency distribution and a relative cumulative frequency distribution and to compute percentiles and percentile ranks. CO4 (K4) To analyze and interpret raw data using various parametric and non-parametric methods

CO5 (K5) To compile data using various software analysis.

Objectives of the Course		• Understand the clinical picture, causal factors and treatment for Schizophrenia. • Know the Causes and Treatment of the Mood Disorders. • Classify the causes and treatment of Anxiety Disorders. • Classify personality disorder and its attributes. • Understand Attention Deficit Hyperactive Disorder and Learning Disorders					
Course Outline		UNIT 1: SCHIZOPHRENIA Schizophrenia, clinical picture, positive and negative symptoms - hallucinations, delusions, disorganised behaviour, disorganised speech, catatonia; subtypes of schizophrenia, other psychotic disorders- Schizoaffective disorder, Schizophreni form disorder, Delusional disorder, Brief psychotic disorder, Shared psychotic disorder.					

	UNIT -2 MOOD DISORDERS Mania, Depression, Major Depressive disorder, Dysthymia, Cyclothymia, Bipolar I and Bipolar II disorders, causes and treatment.
	UNIT 3: ANXIETY DISORDERS Anxiety, phobia, Generalized anxiety disorder- clinical picture, causes and treatment, specific phobia, social phobia, panic disorder, agoraphobia, obsessive compulsive disorder- clinical picture, causes and
	treatment, post traumatic stress disorder - symptoms, causes and treatment.
	UNIT 4: PERSONALITY DISORDERS Personality, personality disorder, Cluster A, Cluster B and Cluster C disorders, causes and treatment.
	UNIT 5: CHILDHOOD DISORDERS Attention Deficit Hyperactive Disorder - clinical picture, Causes, management, treatment, contemporary interventions, Learning Disorders - Dyslexia, Dysgraphia, Dyscalculia - clinical picture, management, contemporary interventions.
Extended Professional Component (is a part of internal component only, Not to be included in the External Examination question paper)	Questions related to the above topics, from various competitive examinations UPSC / TRB / NET / UGC – CSIR / GATE / TNPSC / others to be solved (To be discussed during the Tutorial hour)
Skills acquired from this course	Knowledge, Problem Solving, Analytical ability, Professional Competency, Professional Communication and Transferrable Skill

COURSE OUTCOME:

On successful completion of the course, the students will be able to

- **CO1 (K2):** To be able to understand schizophrenic behaviour.
- **CO2 (K2):** To explain the causes of unipolar and bipolar disorder and treatment
- **CO3 (K2):** To detail the symptoms, causes and treatment of anxiety disorders.
- **CO4 (K2):** To summarize types, causes and treatment of Personality disorder
- **CO5 (K2) :** To understand the contemporary interventions used to treat Attention Deficit Hyperactive Disorder and Learning Disorders.

Course Outcomes

On successful completion of the course, the students will be able to

- CO1(K6)-Experiment and Assess human attributes such as perception, attention, personality, intelligence, thought and attitudes through standardized tests.
- CO2 (K2)- Demonstrate skills in administering and scoring assessment measures.
- CO3 (K5)-Demonstrate competence in drawing inferences from the results without bias.
- CO4 (K6)-Demonstrate competence in writing a standard report.
- CO5 (K5)- Make observation, interpret and use the data obtained from measurement to analyse individual differences in human capacities

Title of the Course		Introduction to Research Methodology					
Paper Number		ELECTIVE IV (Discipline Specific)					
Category	Elective	Year	II	Credits	3	Course Code	
		Semester	IV				
Instructional Hours per week		Lecture	Tutorial		Lab Practice		Total
		3	---		--		3
Pre-requisite							
Objectives of the Course		• Understand how of social influence enable compliance, conformity and obedience • Get introduced to the theories that explain selflessness and to suggest ways to increase helping behaviour. • Comprehend knowledge about various theories that explain aggression and apply the knowledge to prevent and control aggression. • Get acquainted to functions of a group and its influences on individual performance and to educate them about the potential dangers of decision making in group. • Facilitate students to see the applicability of social psychological principles in various settings.					
Course Outline		Unit I: Introduction Understanding behaviour - empirical and non empirical method - assumptions of scientific work - overview of research process/framework. Ethics in research - APA ethics code, plagiarism, ethics and animal experimentations. Data collection - observational method, interview method - structured, semi structured and focus group interviews, questionnaire method, case study method - its merits and limitations.					
		Unit II: Variables , Reliability and Validity Types of variables- dependent and independent variables, confounded variables, quantitative and categorical variables, continuous and discrete variables. Reliability and Validity of measurements - types of validity test- criterion related validity, face validity, content validity, convergent validity, concurrent validity, discriminate validity, predictive validity , types of reliability tests -					

inter rater reliability, test retest reliability, split half reliability, internal consistency reliability.

Unit III: Hypothesis and Sampling

Hypothesis - Definition, types - Hypothesis testing - Type 1 and Type II errors, significance level (p value) , one tailed and two tailed tests- Effect size Sampling - meaning, probability and non probability . Sampling techniques - its merits and limitations, sample size estimation - using a table of random numbers.

Unit IV: Research designs

Experimental designs - independent groups designs, completely randomized groups design, randomized factorial groups design, within participants group design, matched group design. Non Experimental designs - quasi experimental design, time series design, case studies, correlational research design, cross sectional research, longitudinal research, non equivalent group designs. Mixed research designs - single participant w design, base -line design. Quantitative research design and analysis - Grounded theory, discourse analysis, content analysis, diary method, narrative methods, focus group discussions, in- depth interviews, participatory observations, action research.

Unit V: Report writing and computers in research

Reporting and replication, experimental reports, reporting non experimental studies and qualitative studies, oral and poster presentation, APA primer - presenting research and preparation of research proposal - Computers in research - software for quantitative and qualitative data analysis.

Extended Professional Component (is a part of internal component only, Not to be included in the External Examination question paper)	Questions related to the above topics, from various competitive examinations UPSC / TRB / NET / UGC – CSIR / GATE / TNPSC / others to be solved (To be discussed during the Tutorial hour)
Skills acquired from this Course	Knowledge, Problem Solving, Analytical ability, Professional Competency, Professional Communication and Transferrable Skill

COURSE OUTCOMES:

On the successful completion of the course, students will be able to

- **CO1:** (K2) Understand the ethics and various data collection methods to conduct research.
- **CO2:** (K2) Demonstrate the ability to identify independent, dependent and mediating variables and to establish reliability and validity
- **CO3:** (K3) Formulate hypothesis and research objectives and distinguish various sampling techniques
- **CO4:** (K4) Determine appropriate research design.
- **CO5:** (K6) Ability to write research report as per APA protocol

Pre-requisite							
Objectives of the Course		• To offer the students a comprehensive overview of Social Psychology. • To comprehend the development and vicissitudes of Social Cognition. • To gain insight into the formation and management of Social Perception. • To develop understanding of attitudes and persuasion • To learn of the dynamics of close interpersonal relationships.					
Course Outline		UNIT I: INTRODUCTION TO SOCIAL PSYCHOLOGY Definition of Social Psychology, History, Research method in Social Psychology, Social Psychology in new millennium.					

	UNIT II: SOCIAL COGNITION Definition of social cognition; Schemas – Meaning, Impact of schemas on social cognition, Priming, Schema persistence; Heuristics – Meaning, Representativeness, Availability, Anchoring and adjustment; Potential sources of error in social cognition. UNIT III: SOCIAL PERCEPTION Definition of social perception; Non-verbal communication – Basic channels; Deception – Meaning. Non-verbal cues to identify deception; Attribution – Definition, Theories of attribution– Correspondent inference, Kelley’s theory of causal attribution; Basic sources of error in attribution, Impression formation, Impression management. UNIT IV: ATTITUDES Attitudes – Meaning, Types, Formation of attitudes – Classical conditioning, Instrumental conditioning, Observational learning; Strength of attitudes, Change in attitude – Persuasion, cognitive processes underlying persuasion, Resisting persuasion attempts, Cognitive dissonance, Dissonance and attitude change.
	UNIT V: INTERPERSONAL ATTRACTION AND CLOSE RELATIONSHIPS Meaning of interpersonal attraction, Internal determinants of attraction, External determinants of attraction; Romantic relationships and falling in love – Romance, Selecting a potential mate, Love, Jealousy, Marital happiness, Causes of relationship failure.
Extended Professional Component (is a part of internal component only, Not to be included in the External Examination question paper)	Questions related to the above topics, from various competitive examinations UPSC / TRB / NET / UGC – CSIR / GATE / TNPSC /others to be solved (To be discussed during the Tutorial hour)
Skills acquired from this course	Knowledge, Problem Solving, Analytical ability, Professional Competency, Professional Communication and Transferrable Skill

COURSE OUTCOMES

On successful completion of the course, the students will be able to

- CO1 (K1) - To Outline the nature, history, principles and scope of social psychology and methods used in social psychology research
- CO2 (K2) – To understand social cognition and its potential sources of error
- CO3 (K3) – To describe the strategies used to form and maintain positive impression.
- CO4 (K3) – To elucidate the ways to resist persuasion
- CO5 (K4) – To analyze the causes of marital happiness and relationship failure.

Paper Number		CORE X					
Category	Core	Year	III	Credit s	4	Cours e Code	
		Semester	V				
Instructional Hoursper week		Lecture	Tutorial		Lab Practice		Total
		4	1		--		5
Pre-requisite							
Objectives of the Course		● To define and outline the evolution and scope of cognitive psychology. ● To outline various theories of pattern recognition and explain language development, comprehension and understand disorders of language. ● To outline the various theories of attention and perceptual disorders. ● To compare the differences between short term, long term and working memory. ● To illustrate the different types of problem solving strategies, and the application of different types of reasoning.					
Course Outline		Unit I : Introduction Definition - Information Processing Approach - Growth of Cognitive Psychology - Cognition's relation to other fields - Research methods in Cognitive Psychology.					

Unit II : Pattern Recognition, Language

Pattern recognition - Template Theories - Feature Theories - Structural Theories - Information Processing stages - Partial Report Technique - Spelling's model - word recognition - word superiority effect - neural network model.

Language - language systems, speech sounds, words and morphemes, sentence level, sentence comprehension, language production, disorders of language - aphasia, dyslexia.

Unit III : Attention, Disorders of perception and attention

Attention – Definition – Factors influencing attention – Theories of attention - Bottleneck theories - Broadbent's filter model - Treisman's attenuation model - Deutsch- Norman Memory selection model - Automatic Processing and Applications - Cognitive Neuroscience of Attention - Posner's theory of the neural bases of attention.

Overview of Disorders of perception and attention - synaesthesia, blindsight, unilateral spatial neglect, visual agnosia, prosopagnosia.

Unit IV: Memory

Forgetting - Decay theory - Interference theory - cue dependent forgetting - inhibition - retrieval induced forgetting - directed forgetting - imagination and false memory - Individual differences in chunking - Acoustic codes and rehearsal- Acoustic codes in reading - Recognition of items in short term memory - types of amnesia.

Working memory - Baddeley's revised working memory model.

Long term memory - Atkinson-Shiffrin model - Verbal rehearsal and learning - Rehearsal and serial position effect - meta cognition - Mnemonic Techniques - method of loci, the pegword technique, key word technique, organizational technique - tip of the tongue phenomenon - Improving eyewitness recall and identification- episodic and semantic memory- autobiographical memory - Flashbulb memory - the cue-word method .

Unit V: Reasoning , Problem solving

Reasoning - Logical reasoning - Analogical reasoning - Scientific reasoning - Deductive reasoning, Inductive reasoning, Propositional reasoning, Syllogistic reasoning, Conditional reasoning- Venn diagrams - Creative thinking.

	Problem solving - Types of problems - problem solving strategies - mean end analysis - reasoning by analogy - transformational problems - incubation - problem solving experts - block to problem solving - types of heuristics.
Extended Professional Component (is a part of internal component only, Not to be included in the External Examination question paper)	Questions related to the above topics, from various competitive examinations UPSC / TRB / NET / UGC – CSIR / GATE / TNPSC / others to be solved (To be discussed during the Tutorial hour)

------------------------	---

Course outcomes:

On the successful completion of the course, students will be able to:

CO1 (K1) Recognize the applications of cognitive processes in various areas of human Development.

CO2 (K2) Distinguish the different discords of language and comprehend the stages of human language development and also identify different perspectives of pattern recognition.

CO3 (K2) Explain the process of attention and identify various perceptual disorders.

CO4 (K4) Recognize and examine the process of remembering and forgetting.

CO5 (K5) Examine the different types of reasoning and demonstrate various problem solving strategies.

Objectives of the Course		• To have a perceptual overview of the counselling. • To comprehend the counselling process. • To understand the role of psychological testing and diagnosis in counselling. • To gain insight into the counsellors attributes, skills and ethics. • To learn of the varied fields of application in counselling.					
Course Outline		Unit I: Nature And Scope Of Counselling Counselling– Meaning, Nature, Need and Functions of Counselling, Emergence of Counselling in India, Goals and Scope of Counselling, Types of Counselling Services.					
		Unit II: Approaches To Counselling And The Counselling Process Directive and non-directive approaches, Humanistic approach, Behavioristic approach, Existential Approach, Eclectic Approach, Counselling Process - Preparation for counselling, Steps in the counselling process.					
		Unit III: Psychological Testing And Diagnosis Use of psychological tests in counselling, Types of psychological tests, Nature of a good psychological test, Test interpretation in counselling, Limitations of psychological tests, Diagnosis and its limitations.					

	Unit IV: Counsellor Qualities, Skills And Ethical Responsibilities Qualities of an effective counsellor, Counsellor skills- Building Trust, Listening, Attending, Observing,
	Building Rapport, Demonstrating Empathy, Ethics in counselling.
