

B.C.A Syllabus under CBCS Pattern with effect from 2023-2024 onwards

**PERIYAR UNIVERSITY**

**SALEM-636011**

**DEGREE OF BACHELOR OF COMPUTER APPLICATION**

**Syllabus for**

**B.C.A**

**(SEMESTER PATTERN- CBCS)**

**(For Candidates admitted in the colleges affiliated to  
Periyar university from 2023-2024 onwards)**

## **Introduction**

### **BCA (Bachelor of Computer Application)**

Education is the key to development of any society. Role of higher education is crucial for securing right kind of employment and also to pursue further studies in best available world class institutes else where within and outside India. Quality education in general and higher education in particular deserves high priority to enable the young and future generation of students to acquire skill, training and knowledge in order to enhance their thinking, creativity, comprehension and application abilities and prepare them to compete, succeed and excel globally. Learning Outcomes-based Curriculum Framework (LOCF) which makes it student-centric, interactive and outcome-oriented with well-defined aims, objectives and goals to achieve. LOCF also aims at ensuring uniform education standard and content delivery across the state which will help the students to ensure similar quality of education irrespective of the institute and location.

Computer Application is the study of quantity, structure, space and change, focusing on problem solving, application development with wider scope of application in science, engineering, technology, social sciences etc. throughout the world in last couple of decades and it has carved out a space for itself like any other disciplines of basic science and engineering. Computer Application is a discipline that spans theory and practice and it requires thinking both in abstract terms and in concrete terms . Nowadays, practically every one is a computer user, and many people are even computer programmers. Computer Application can be seen on a higher level, as a science of problem solving and problem solving requires precision, creativity, and careful reasoning. The ever-evolving discipline of computer Application also has strong connections to other disciplines. Many problems in science, engineering, health care, business, and other areas can be solved effectively with computers, but finding a solution requires both computer science expertise and knowledge of the particular application domain. Computer Application has a wide range of specialties. These include Computer Architecture, Software Systems, Graphics, Artificial Intelligence, Computational Science, and Software Engineering. Drawing from a common core of computer science knowledge, each specialty area focuses on specific challenges. Computer Application is practiced by mathematicians, scientists and

engineers. Mathematics, the origins of Computer Science, provides reason and logic. Science provides the methodology for learning and refinement. Engineering provides the techniques for building hardware and software.

### **Programme Outcome, Programme Specific Outcome and Course Outcome**

Computer Application is the study of quantity, structure, space and change, focusing on problem solving, application development with wider scope of application in science, engineering, technology, social sciences etc. The key core areas of study in Mathematics include Algebra, Analysis (Real & Complex), Differential Equations, Geometry, and Mechanics.

The Students completing this programme will be able to present Software application clearly and precisely, make abstract ideas precise by formulating them in the Computer languages. Completion of this programme will also enable the learners to join teaching profession, enhance their employability for government jobs, jobs in software industry, banking, insurance and investment sectors, data analyst jobs and jobs in various other public and private enterprises.

#### **1. Programme Outcomes(PO)of BCA**

- Scientific aptitude will be developed in Students
- Students will acquire basic Practical skills & Technical knowledge along with domain knowledge of different subjects in the Computer Science & humanities stream.
- Students will become employable; Students will be eligible for career opportunities in education field, Industry, or will be able to opt for entrepreneurship.
- Students will possess basic subject knowledge required for higher studies, professional and applied courses.
- Students will be aware of and able to develop solution oriented approach towards various Social and Environmental issues.
- Ability to acquire in-depth knowledge of several branches of Computer Science and aligned areas. This Programme helps learners in building a solid foundation for higher studies in Computer Science and applications.
- The skills and knowledge gained lead to proficiency in analytical reasoning, which can be utilized in modelling and solving real-life problems.
- Utilize computer programming skills to solve theoretical and applied problems by critical understanding, analysis and synthesis.

- To recognize patterns and to identify essential and relevant aspects of problems.
- Ability to share ideas and insights while seeking and benefitting from knowledge and insights of others.
- Mould the students into responsible citizens in a rapidly changing interdependent society.

The above expectations generally can be pooled into 6 broad categories and can be modified according to institutional requirements:

PO1: Knowledge

PO2: Problem Analysis

PO3: Design/Development of  
Solutions

PO4: Conduct investigations of complex problems

PO5: Modern tools usage

PO6: Applying to society

## **2. Programme Specific Outcomes of B.Sc. Degree Programme in Computer Science**

PSO1: Think in a critical and logical based manner

PSO2: Familiarize the students with suitable software tools of computer science and industrial applications to handle issues and solve problems in mathematics or statistics and real time application related sciences.

PSO3: Know when there is a need for information, to be able to identify, locate, evaluate, and effectively use that information for the issue or problem at hand.

PSO4: Understand, formulate, develop programming model with logical approaches to a problem arising in social science, business and other contexts.

PSO5: Acquire good knowledge and understanding to solve specific theoretical and applied problems in advanced areas of Computer science and Industrial statistics.

PO6: Provide students/learners sufficient knowledge and skills enabling them to under take further studies in Computer Science or Applications or Information Technology and its allied area son multiple disciplines linked with Computer Science.

PO7: Equip with Computer science technical ability, problem solving skills, creative talent and power of communication necessary for various forms of employment.

PO8: Develop a range of generic skills helpful in employment, internships & societal activities.

PO9: Get adequate exposure to global and local concerns that provides platform for further exploration into multi-dimensional aspects of computing sciences.

Mapping of Course Learning Outcomes (CLOs) with Programme Outcomes (POs) and Programme Specific Outcomes (PSOs) can be carried out accordingly, assigning the appropriate level in the grids: (put tickmark in each row)

<b>PO/PSO</b>	<b>PS O1</b>	<b>PS O2</b>	<b>PS O3</b>	<b>PS O4</b>	<b>PS O5</b>	<b>PS O6</b>
<b>PO1</b>	<input type="checkbox"/>					
<b>PO2</b>		<input type="checkbox"/>				
<b>PO3</b>			<input type="checkbox"/>			
<b>PO4</b>				<input type="checkbox"/>		
<b>PO5</b>					<input type="checkbox"/>	
<b>PO6</b>						<input type="checkbox"/>

### **3. Highlights of the Revamped Curriculum**

- Student-centric, meeting the demands of industry & society, incorporating industrial components, hands-on training, skill enhancement modules, industrial project, project with viva-voce, exposure to entrepreneurial skills, training for competitive examinations, sustaining the quality of the core components and incorporating application oriented content wherever required.
- The Core subjects include latest developments in the education and scientific front, advanced programming packages allied with the discipline topics, practical training, devising mathematical models and algorithms for providing solutions to industry/real life situations. The curriculum also facilitates peer learning with advanced mathematical topics in the final semester, catering to the needs of stakeholders with research aptitude.
- The General Studies and Computer Science based problem solving skills are included as mandatory components in the Training for Competitive Examinations course at the final semester, a first of its kind.
- The curriculum is designed so as to strengthen the Industry-Academia interface and provide more job opportunities for the students.
- The Industrial Statistics course is newly introduced in the fourth semester, to expose the students to real life problems and train the students on designing a mathematical model to provide solutions to the industrial problems.
- The Internship during the second year vacation will help the students gain valuable work experience that connects classroom knowledge to real world experience and to narrow down and focus on the career path.
- Project with viva-voce component in the fifth semester enables the student, application of conceptual knowledge to practical situations. The state-of-art technologies in conducting a Explain in a scientific and systematic way and arriving at a precise solution is ensured. Such innovative provisions of the industrial training, project and internships will give students an edge over the counterparts in the job market.

State-of-Art techniques from the streams of multi-disciplinary, cross disciplinary and interdisciplinary nature are incorporated as Elective courses, covering conventional topics to the latest – Statistics with R Programming, Data Science, Machine learning, Internet of Things and Artificial Intelligence etc..

#### 4. ValueadditionsintheRevampedCurriculum:

Semester	Newly introduced Components	Outcome/Benefits
I	<b>FoundationCourse</b> To ease the transition oflearning from higher secondary to higher education ,providing an over view of the pedagogy of learning abstractMathematics and simulating mathematical Concepts to real world.	<ul style="list-style-type: none"> <li>• Instilconfidenceamongstudents</li> <li>• Createinterest forthesubject</li> </ul>
I,II,III,IV	<b>Skill Enhancement papers</b> (Disciplinecentric/Generic/Entrepreneurial)	<ul style="list-style-type: none"> <li>• Industryreadygraduates</li> <li>• Skilledhumanresource</li> <li>• Studentsareequippedwithessentialskillstomakethememployable</li> <li>• Trainingon Computing / Computational skills enablethestudentsgainknowledgeandexposureonlatestcomputationalaspects</li> <li>• Dataanalytical skills will enable students gain internships,apprenticeships,fieldworkinvolvingdatacollection, compilation,analysisetc.</li> <li>• Entrepreneurial skill training will provide anopportunityforindependent livelihood</li> <li>• Generatesself–employment</li> <li>• Createssmallscaleentrepreneurs</li> <li>• Trainingtogirlsleadstowomenempowerment</li> <li>• DisciplinecentricskillwillimprovetheTechnicalknowhowofsolvingreallifeproblemsusingICT tools</li> </ul>

<b>III,IV,V &amp;VI</b>	Elective papers- An open choice of topics categorized under Generic and Discipline Centric	<ul style="list-style-type: none"> <li>• Strengthening the domain knowledge</li> <li>• Introducing the stakeholders to the State-of-Art techniques from the streams of multi-disciplinary, cross-disciplinary and interdisciplinary nature</li> <li>• Students are exposed to Latest topics on Computer Science/IT, that require strong mathematical background</li> <li>• Emerging topics in higher education /industry /communication network/ health sector etc. are introduced with hands-on-training, facilitates designing of mathematical models in the respective sectors</li> </ul>
<b>IV</b>	Industrial Statistics	<ul style="list-style-type: none"> <li>• Exposure to industry moulds students into solution providers</li> <li>• Generates Industry ready graduates</li> <li>• Employment opportunities enhanced</li> </ul>
<b>II year Vacation activity</b>	Internship /Industrial Training	<ul style="list-style-type: none"> <li>• Practical training at the Industry/ Banking Sector /Private/ Public sector organizations / Educational institutions, enable the students gain professional Experience and also become responsible citizens.</li> </ul>
<b>V Semester</b>	Project with Viva–voce	<ul style="list-style-type: none"> <li>• Self-learning is enhanced</li> <li>• Application of the concept to real situation is conceived resulting in tangible outcome</li> </ul>
<b>VI Semester</b>	Introduction of Professional Competency component	<ul style="list-style-type: none"> <li>• Curriculum design accommodates all category of learners; Mathematics for Advanced Explain component will comprise of advanced topics in Mathematics and allied fields, for those in the peer group/ aspiring researchers</li> <li>• ‘Training for Competitive Examinations’ – caters to the needs of the aspirants towards most sought-after services of the nation viz, UPSC, CDS, NDA, Banking Services, CAT, TNPSC group services, etc.</li> </ul>
<b>Extra Credits:</b> <b>For Advanced Learners/Honors degree</b>		<ul style="list-style-type: none"> <li>• To cater to the needs of peer learners/research aspirants</li> </ul>

<b>Skills acquired from the Courses</b>	Knowledge, Problem Solving, Analytical ability, Professional Competency, Professional Communication and Transferrable Skill

CC2	PYTHONLAB		-	-	3	-	3	25	75	100

### CourseObjectives:

1. Be able to design and program Python applications.
2. Be able to create loops and decision statements in Python.
3. Be able to work with functions and pass arguments in Python.
4. Be able to build and package Python modules for reusability.
5. Be able to read and write files in Python.

LABEXERCISES		RequiredHours	
1. Program using variables, constants, I/O statements in Python. 2. Program using Operators in Python. 3. Program using Conditional Statements. 4. Program using Loops. 5. Program using Jump Statements. 6. Program using Functions. 7. Program using Recursion. 8. Program using Arrays. 9. Program using Strings. 10. Program using Modules. 11. Program using Lists. 12. Program using Tuples. 13. Program using Dictionaries. 14. Program for File Handling.			<b>60</b>

### CourseOutcomes

On completion of this course, students will

CO1	Demonstrate the understanding of syntax and semantics of
CO2	Identify the problems and solve using PYTHON programming techniques.
CO3	Identify suitable programming constructs for problem solving.
CO4	Analyze various concepts of PYTHON language to solve the problem in an efficient way.
CO5	Develop a PYTHON program for a given problem and test for its correctness.

## SEMESTER IV

SubjectCode	SubjectName	Category	L	T	P	S	Credits	Inst.Hours	Marks		
									CIA	External	Total
CC7	ProgrammingINJAVA	Core	4	-	-	-	4	4	25	75	100
<b>CourseObjectives</b>											
LO1	To provide fundamental knowledge of object-oriented programming										
LO2	To equip the student with programming knowledge in Core Java from the basics up.										
LO3	To enable the student to use AWT controls, Event Handling and Swing for GUI.										
LO4	To provide fundamental knowledge of object-oriented programming.										
LO5	To equip the student with programming knowledge in Core Java from the basics up.										
UNIT	<b>Details</b>							<b>No. of Hours</b>			
I	<b>Introduction:</b> Review of Object Oriented concepts - History of Java - Java buzzwords - JVM architecture - Datatypes - Variables - Scope and lifetime of variables - arrays - operators - control statements - type conversion and casting - simple java program - constructors - methods - Static block - Static Data - Static Method String and StringBuffer Classes.							15			
II	<b>Inheritance:</b> Basic concepts - Types of inheritance - Member access rules - Usage of this and Super keyword - Method Overloading - Method overriding - Abstract classes - Dynamic method dispatch - Usage of final keyword.  <b>Packages:</b> Definition - Access Protection - Importing Packages.  <b>Interfaces:</b> Definition - Implementation - Extending							15			

	Interfaces.  <b>Exception Handling:</b> try–catch- throw - throws–finally– Built-in exceptions- Creating own Exception classes.	
III	<b>Multithreaded Programming:</b> Thread Class– Runnable interface– Synchronization– Using synchronized methods– Using synchronized statement– Interthread Communication– Deadlock.  <b>I/O Streams:</b> Concept of streams– Stream classes– Byte and Character stream– Reading console Input and Writing Console output– File Handling.	15
IV	<b>AWT Controls:</b> The AWT class hierarchy– user interface components– Labels– Button– Text Components – Check Box – Check Box Group – Choice – List Box – Panels – Scroll Pane – Menu – Scroll Bar. Working with Frame class – Colour – Fonts and layout managers.  <b>Event Handling:</b> Events– Event sources– Event listeners – Event Delegation Model (EDM) – Handling Mouse and Keyboard Events – Adapter classes – Inner classes	15
V	<b>Swing:</b> Introduction to Swing– Hierarchy of swing components. Containers– Top level containers– JFrame– JWindow – JPanel – JButton – JToggleButton – JCheckBox– JRadioButton– JLabel, JTextField– JTextArea– JList– JComboBox– JScrollPane.	15
	<b>Total</b>	<b>75</b>

### Course Outcomes

<b>Course Outcomes</b>	On completion of this course, students will;	
<b>CO1</b>	Understand the basic Object-oriented concepts. Implement the basic constructs of Core Java .	PO1, PO2, PO6

<b>CO2</b>	Implement inheritance, packages, interfaces and exception handling of Core Java.	PO2,PO3,PO8
<b>CO3</b>	Implement multi-threading and I/O Streams of Core Java	PO1,PO3,PO7
<b>CO4</b>	Implement AWT and Event handling.	PO2,PO6
<b>CO5</b>	Use Swing to create GUI.	PO1,PO3,PO8

CC8	Programming in java lab	Core	-	-	3	-	3	3	25	75	100
<b>CourseObjective</b>											
LO1	To provide fundamental knowledge of object-oriented programming.										
LO2	To equip the student with programming knowledge in Core Java from the basics up.										
LO3	To enable the students to know about Event Handling.										
LO4	To enable the students to use String Concepts.										
LO5	To equip the student with programming knowledge to create GUI using AWT controls.										
<b>UNIT</b>	<b>Details</b>										
1	Write a Java program that prompts the user for an integer and then prints out all the prime numbers up to that Integer										
2	Write a Java program to multiply two given matrices.										
3	Write a Java program that displays the number of characters, lines and words in a text										
4	Generate random numbers between two given limits using Random class and print messages according to the range of the value generated.										
5	Write a program to do String Manipulation using Character Array and perform the following string operations: a. String length b. Finding a character at a particular position c. Concatenating two strings										
6	Write a program to perform the following string operations using String class:										

	<ul style="list-style-type: none"> <li>a. StringConcatenation</li> <li>b. Searchasubstring</li> <li>c. Toextractsubstringfromgivenstring</li> </ul>	
7	<p>Write a program to perform string operations using StringBuffer class:</p> <ul style="list-style-type: none"> <li>a. Length of a string</li> <li>b. Reverse a string</li> <li>c. Delete a substring from the given string</li> </ul>	
8	<p>Write a java program that implements a multi-thread application that has three threads. First thread generates random integers every 1 second and if the value is even, second thread computes the square of the number and prints. If the value is odd, the third thread will print the value of cube of the number.</p>	
9	<p>Write a threading program which uses the same methods asynchronously to print the numbers 1 to 10 using Thread 1 and to print 90 to 100 using Thread 2.</p>	
10	<p>Write a program to demonstrate the use of following exceptions.</p> <ul style="list-style-type: none"> <li>a. ArithmeticException</li> <li>b. NumberFormatException</li> <li>c. ArrayIndexOutOfBoundsException</li> <li>d. NegativeArraySizeException</li> </ul>	
11	<p>Write a Java program that reads on file name from the user, then displays information about whether the file exists, whether the file is readable, whether the file is writable, the type of file and the length of the file in bytes</p>	

12	Write a program to accept a text and change its size and font. Include bold italic options. Use frames and controls.	
13	Write a Java program that handles all mouse events and shows the event name at the center of the window when a mouse event is fired. (Use <code>MouseListener</code> classes).	
14	Write a Java program that works as a simple calculator. Use a grid layout to arrange buttons for the digits and for the +, -, *, % operations. Add a text field to display the result. Handle any possible exceptions like divide by zero.	
15	Write a Java program that simulates a traffic light. The program lets the user select one of three lights: red, yellow, or green with radio buttons. On selecting a button, an appropriate message with —stop—or—ready—or—go! should appear above the buttons in a selected color. Initially there is no message shown.	
<b>Total</b>		<b>60</b>
<b>Course Outcomes</b>		<b>Programme Outcome</b>
CO	On completion of this course, students will	
1	Understand the basic Object-oriented concepts. Implement the basic constructs of Core Java.	PO1
2	Implement inheritance, packages, interfaces and exception handling of Core Java.	PO1, PO2
3	Implement multi-threading and I/O Streams of Core Java	PO4, PO6
4	Implement AWT and Event handling.	PO4, PO5, PO6
5	Use Swing to create GUI.	PO3, PO8

CC9	Operating System	Core	5	-	-	-	4	5	25	75	100
<b>CourseObjective</b>											
LO1	Understanding the design of the Operating System										
LO2	Imparting knowledge on CPU scheduling, Process and Memory Management.										
LO3	To code specialized programs for managing overall resources and operations of the computer.										
LO4	To study about the concept of Job and processors scheduling										
LO5	To learn about the concept of memory organization and multiprogramming										
UNIT	<b>Details</b>							<b>No.of Hours</b>			
	<b>Introduction:</b> operating system, history (1990s to 2000s and beyond), distributed computing, parallel computation. <b>Process concepts:</b> definition of process, process states - Lifecycle of a process, process management - process state transitions, process control block (PCB), process operations , suspend and resume, context switching, Interrupts - Interrupt processing, interrupt classes, Interprocess communication-signals, message passing.							15			
II	<b>Asynchronous concurrent processes:</b> mutual exclusion - critical section, mutual exclusion primitives, implementing mutual exclusion primitives, Peterson's algorithm, software solutions to the mutual Exclusion Problem-, n-thread mutual exclusion - Lamport's Bakery Algorithm. Semaphores -							15			

	MutualexclusionwithSemaphores,threadsynchronization nwithsemaphores,	
	countingsemaphores,implementingsemaphores.  <b>Concurrent programming:</b> monitors, messagepassing	
III	<b>Deadlockandindefinitepostponement:</b> Resourceconcepts,fournecessaryconditionsfordeadlock,deadlockprevention,deadlockavoidanceandDijkstra'sBanksalgorithmdeadlockdetection,deadlockrecovery.	15
IV	<b>Jobandprocessorscheduling:</b> schedulinglevels,scheduling objectives, scheduling criteria, preemptivesnon-preemptivescheduling,intervaltimerorinterruptingclock ,priorities,schedulingalgorithms-FIFO scheduling, RR scheduling, quantum size, SJFscheduling,SRTscheduling,HRNscheduling,multilevelfeedbackqueues,Fairsharescheduling.	15

V	<p><b>RealMemoryorganizationandManagement:</b> Memory organization, Memory management, Memory hierarchy, Memory management strategies, contiguousvsnon-contiguousmemoryallocation,singleusercontiguousmemoryallocation,fixedpartitionmultiprogramming, variable partitionmultiprogramming, Memoryswapping</p> <p><b>Virtual Memory organization:</b> virtual memory basicconcepts,multilevelstorageorganization, block mapping, paging basic concepts, segmentation,paging/segmentationsystems.</p> <p><b>VirtualMemoryManagement:</b>Demand Paging,Pagereplacementstrategies</p>	15
	<b>Total</b>	<b>75</b>
<b>CourseOutcomes</b>		<b>ProgrammeOutcomes</b>
CO	Oncompletionofthiscourse, studentswill	
1	Define the fundamentals of OS and identifytheconceptsonrelevanttoprocess,processlifecycle,Scheduling Algorithms, Deadlock and Memorymanagement	PO1
2	knowthecriticalanalysisofprocessinvolvingvarious algorithms, an exposure to threads andsemaphores	PO1,PO2
3	Have a complete study about Deadlock and itsimpact over OS. Knowledge of handling Deadlockwithrespective algorithms andmeasuresto retrievefromdeadlock..	PO4,PO6
4	HavecompleteknowledgeofSchedulingAlgorithmsandits types.	PO4,PO5,PO6
5	understandmemoryorganizationandmanagement	PO3,PO8

SubjectCode	SubjectName	Category	L	T	P	S	Credits	Inst. Hours	Marks				
									CIA	External	Total		
CC13	Computer Networks	CORE/Elective	6	-	-	-	4	6	25	75	100		
<b>Course Objective</b>													
LO1	To understand the concept of Data communication and Computer network												
LO2	To get knowledge on routing algorithms.												
LO3	To impart knowledge about networking and inter networking devices												
LO4	To study about Network communication.												
LO5	To learn the concept of Transport layer												
UNIT	Details									No.of Hours			
I	Introduction–Network Hardware–Software–Reference Models–OSI and TCP/IP Models – Example Networks: Internet, ATM, Ethernet and Wireless LANs–Physical Layer–Theoretical Basis for Data Communication–Guided Transmission Media									15			
II	Wireless Transmission–Communication Satellites–Telephone System: Structure, Local Loop, Trunks and Multiplexing and Switching. Data Link Layer: Design Issues–Error Detection and Correction.									15			
III	Elementary Data Link Protocols - Sliding Window Protocols – Data Link Layer in the Internet - Medium Access Layer – Channel Allocation Problem–Multiple Access Protocols–Bluetooth									15			
IV	Network Layer–Design Issues–Routing Algorithms–Congestion Control Algorithms–IP Protocol–IP Addresses–Internet Control Protocols.									15			
V	Transport Layer–Services–Connection Management–Addressing, Establishing and Releasing a Connection–Simple Transport Protocol–Internet Transport Protocols (ITP)–Network Security: Cryptography.									15			
	<b>Total</b>									<b>75</b>			
Course Outcomes								Programme Outcome					
CO	On completion of this course, students will												
1	To Understand the basics of Computer Network architecture, OSI and TCP/IP Reference model							PO1					

2	To gain knowledge on Telephone systems using wireless network	PO1,PO2
3	To understand the concept of MAC	PO4,PO6
4	To analyze the characteristics of Routing and Congestion control algorithms	PO4,PO5,PO6
5	To understand network security and define various protocols such as FTP, HTTP, Telnet, DNS	PO3,PO8

CC15	<b>R Programming-LAB</b>	Core	-	-	6	-	4	6	25	75	100		
<b>CourseObjective</b>													
LO1	To understand the problem solving approaches												
LO2	To learn the basic programming constructs in R Programming												
LO3	To practice various computing strategies for R Programming-based solutions to real world problems												
LO4	To use R Programming data structures - lists, tuples, and dictionaries.												
LO5	To do input/output with files in R Programming.												
<b>Sl.No</b>	<b>Details</b>												
1.	Program to convert the given temperature from Fahrenheit to Celsius and vice versa depending upon user's choice.												
2.	Program, to find the area of rectangle, square, circle and triangle by accepting suitable input parameters from user.												
3.	Write a program to find list of even numbers from 1 to n using R-Loops.												
4.	Create a function to print squares of numbers in sequence.												
5.	Write a program to join columns and rows in a data frame using cbind() and rbind() in R.												
6.	Implement different String Manipulation functions in R.												
7.	Implement different data structures in R (Vectors, Lists, DataFrames)												

8	Write a program to read a csv file and analyze the data in the file in R.	
9	Create pie chart and bar chart using R.	
10	10. Create a data set and do statistical analysis on the data using R.	
11	Program to find factorial of the given number using recursive function	
12	<b>Write a R program to count the number of even and odd numbers from a array of N numbers.</b>	
	<b>Total</b>	
<b>Course Outcomes</b>		<b>Programme Outcome</b>
CO	On completion of this course, students will	
1	Acquire programming skills in core R Programming	PO1, PO4, PO5
2	Acquire Object-oriented programming skills in R Programming.	PO1, PO4, PO8
3	Develop the skill of designing graphical-user interfaces (GUI) in R Programming	PO1, PO3, PO6
4	Acquire R Programming skills to move into specific branches	PO3, PO4
5		PO1, PO5, PO6

	<b>Microprocessor and Microcontroller</b>		5	-	-	-	4	5	25	75	100
<b>CourseObjective</b>											
LO1	To introduce the internal organization of Intel 8085 Microprocessor.										
LO2	To know about various instruction sets and classifications										
LO3	To enable the students to write assembly language programs using 8085.										
LO4	To interface the peripheral devices to 8085 using Interrupt controller and DMA interface.										
LO5	To provide real-life applications using microcontroller.										
<b>UNIT</b>	<b>Details</b>								<b>No.of Hours</b>		
I	Digital Computers-Microcomputer Organization-Computer languages – Microprocessor Architecture and its operations–Microprocessor initiated operations and 8085 Bus organization – Internal Data operations and 8085 registers - Peripheral or External initiated operations.								15		
II	8085 Microprocessor–Pinout and Signals–Functional block diagram -8085 Instruction Set and Classifications.								15		
III	BCD to Binary and Binary to BCD conversions - ASCII to BCD and BCD to ASCII conversions - Binary to ASCII and ASCII to Binary conversions. BCD Arithmetic-BCD addition and Subtraction- Multibyte Addition and Subtraction- Multiplication and Division.								15		
IV	The 8085 Interrupts – RIM AND SIM instructions-8259 Programmable Interrupt Controller- Direct Memory Access (DMA) and 8257 DMA controller.								15		

V	Introduction to Microcontroller - Microcontroller Vs Microprocessor - 8051 Microcontroller architecture -8051 pin description.Timers andCounters—Operating Modes—Control Registers. Interrupts—Interrupts in8051-Interrupts Control Register—Execution of interrupt.	15
	<b>Total</b>	<b>75</b>
<b>CourseOutcomes</b>		<b>ProgrammemeOutcomea</b>
CO	On completion of this course, students will	
1	Remember the basic binary codes and their conversions. Binary concepts are used in Microprocessor programming and provide a good understanding of the architecture of 8085 to introduce the internal organization of Intel 8085 Microprocessor..	Po1
2	Understanding the 8085 instruction set and their classifications, enable the students to write the programs easily on their own using different logic	Po1, Po2
3	Applying different types of instructions to convert binary codes and analyzing the outcome. The instruction set is applied to develop programs on multi-byte arithmetic operations.	Po4, Po6
4	Analyze how peripheral devices are connected to 8085 using Interrupts and DMA controller.	Po4, Po5, Po6
5	An exposure to create real time applications using microcontroller.	Po3, Po8

	<b>MACHINE LEARNING TECHNIQUES</b>	Core	5	-	-	-	4	25	75	100
<b>Learning Objectives</b>										
LO1	To Learn about Machine Intelligence and Machine Learning applications									
LO2	To implement and apply machine learning algorithms to real-world applications									
LO3	To identify and apply the appropriate machine learning technique to classification, pattern recognition, optimization and decision problems									
LO4	To create instant based learning									
LO5	To apply advanced learning									
UNIT	<b>Contents</b>								No. Of.Hours	
I	<b>Introduction Machine Learning-</b> Difference between AI, Machine Learning and Big data. Supervised and unsupervised learning, parametric vs non-parametric models, parametric models for classification and regression- Linear Regression, Logistic Regression, Naïve Bayes classifier, simple non-parametric classifier- K-nearest neighbour, support vector machines								15	
II	<b>Neural networks and genetic algorithms</b> Neural Network Representation – Problems – Perceptrons – Multilayer Networks and Back Propagation Algorithms – Advanced Topics – Genetic Algorithms – Hypothesis Space Search – Genetic Programming – Models of Evaluation and Learning.								15	
III	<b>Bayesian and computational learning</b> Bayes Theorem – Concept Learning – Maximum Likelihood – Minimum Description Length Principle – Bayes Optimal Classifier – Gibbs Algorithm – Naïve Bayes Classifier – Bayesian Belief Network – EM Algorithm – Probability Learning – Sample Complexity – Finite and Infinite Hypothesis Spaces – Mistake Bound Model.								15	
IV	<b>Instant based learning</b> K-Nearest Neighbour Learning – Locally weighted Regression – Radial Basis Functions – Case Based Learning.								15	
V	<b>Advanced learning</b> Recommendations systems – opinion mining, sentiment analysis. Learning Set of Rules – Sequential Covering Algorithm – Learning Rule Set – First Order Rules – Sets of First Order Rules – Induction on Inverted Deduction – Inverting Resolution – Analytical Learning – Perfect Domain Theories – Explanation Base Learning – FOCL Algorithm – Reinforcement Learning – Task – Q – Learning – Temporal Difference Learning.								15	
<b>TOTAL HOURS</b>									75	

CourseOutcomes		Programme Outcomes
CO	On completion of this course, students will	
CO1	Appreciate the importance of visualization in the data analytic solution	PO1, PO2, PO3, PO4, PO5, PO6
CO2	Apply structured thinking to unstructured problems	PO1, PO2, PO3, PO4, PO5, PO6
CO3	Understand a very broad collection of machine learning algorithms and problems	PO1, PO2, PO3, PO4, PO5 , PO6
CO4	Learn algorithmic topics of machine learning and mathematically deepen ought to introduce the required theory	PO1, PO2, PO3, PO4, PO5 , PO6
CO5	Develop an appreciation for what is involved in learning from data.	PO1, PO2, PO3 , PO4, PO5, PO6

	<b>Network Security</b>		5	-	-	-	4	5	25	75	100
<b>CourseObjectives</b>											
LO1	To familiarize on the model of network security, Encryption techniques										
LO2	To understand the concept of Number Theory, theorems										
LO3	To understand the design concept of cryptography and authentication										
LO4	To develop experiments on algorithms used for security										
LO5	To understand about virus and threats, firewalls, and implementation of Cryptography										
UNIT	<b>Details</b>								<b>No. of Hours</b>		
I	Model of network security – Security attacks, services and attacks – OSI security architecture – Classical encryption techniques – SDES – Block cipher Principles DES – Strength of DES – Block cipher design principles – Block cipher mode of operation – Evaluation criteria for AES – RC4 – Differential and linear cryptanalysis – Placement of encryption function – traffic confidentiality.								15		
II	Number Theory – Prime number – Modular arithmetic – Euclid's algorithm – Fermat's and Euler's theorem – Primality – Chinese remainder theorem – Discrete logarithm – Public key cryptography and RSA – Key distribution – Key management – Diffie-Hellman key exchange – Elliptic curve cryptography								15		
III	Authentication requirement – Authentication function – MAC – Hash function – Security of hash function and MAC – SHA – HMAC – CMAC – Digital signature								15		

	and authentication protocols—DSS.	
IV	Authentication applications – Kerberos – X.509 Authentication services – E-mail security – IP security - Web security	15
V	Intruder – Intrusion detection system – Virus and related threats – Countermeasures – Firewalls design principles – Trusted systems – Practical implementation of cryptography and security	15
	<b>Total</b>	<b>75</b>

### **CourseOutcomes**

<b>CourseOutcomes</b>	On completion of this course, students will;	
<b>CO1</b>	Analyze and design classical encryption techniques and block ciphers.	PO1,PO3,PO6,PO8
<b>CO2</b>	Understand and analyze public-key cryptography, RSA and other public-key crypto systems such as Diffie-Hellman Key Exchange, ElGamal Cryptosystem, etc	PO1,PO2,PO3,PO6
<b>CO3</b>	Understand key management and distribution schemes and design User Authentication	PO3,PO5
<b>CO4</b>	Analyze and design hash and MAC algorithms, and digital signatures.	PO1,PO2,PO3,PO7
<b>CO5</b>	Know about Intruders and Intruder Detection mechanisms, Types of Malicious software,	PO2,PO6,PO7

	<b>Data Mining And Warehousing</b>		5	-	-	-	4	5	25	75	100

#### Course Objectives

LO1	To provide the knowledge on Data Mining and Warehousing concepts and techniques
LO2	To study the basic concepts of Data Mining, Architecture and Comparison.
LO3	To study a set of Mining Association Rules, Data Warehouses.
LO4	To study about Classification and Prediction, Classifier Accuracy
LO5	To study the basic concepts of cluster analysis, Cluster Methods

UNIT	Details	No. of Hours	Course Objectives
I	<i>Introduction: Datamining–Functionalities– Classification– Introduction to Data Warehousing– Data Preprocessing: Preprocessing the Data– Data cleaning– Data Integration and Transformation– Data Reduction</i>	15	CO1
II	Data Mining, Primitives, Languages and System Architecture: Data Mining–Primitives– Data Mining Query Language, Architecture of Data mining Systems. Concept Description, Characterization and Comparison: Concept Description, Data Generalization and Summarization, Analytical Characterization, Mining Class Comparison– Statistical Measures.	15	CO2
III	Mining Association Rules: Basic Concepts– Single Dimensional Boolean Association Rules from Transaction Databases, Multi level Association Rules from transaction databases – Multi dimension Association Rules from Relational Database and Data	15	CO3

	Warehouses.		
IV	ClassificationandPrediction:Introduction–Issues–DecisionTreeInduction–BayesianClassification–Classification of Back Propagation. Classification basedon ConceptsfromAssociationRuleMining–OtherMethods.Prediction–Introduction–ClassifierAccuracy	15	CO4
V	Cluster Analysis: Introduction – Types of DatainClusterAnalysis,PetitioningMethods–HierarchicalMethods-DensityBasedMethods–GRIDBasedMethod–ModelbasedClusteringMethod	15	CO5
<b>Total</b>		<b>75</b>	

### **CourseOutcomes**

<b>CourseOutcomes</b>	Oncompletionofthiscourse,studentswill;	
<b>CO1</b>	To understand the basic concepts and the functionality of the various datamining and data warehousing component	PO1,PO3,PO6,PO8
<b>CO2</b>	To know the concepts of Data mining system architectures	PO1,PO2,PO3,PO6
<b>CO3</b>	To analyze the principles of association rules	PO3,PO5
<b>CO4</b>	To get analytical idea on Classification and prediction methods	PO1,PO2,PO3,PO7
<b>CO5</b>	To Gain knowledge on Cluster analysis and its methods.	PO2,PO6,PO7

<b>Learning Objectives</b>										
LO1	Develop in-depth Knowledge about the architecture and features of Android									
LO2	Implementing the various options available in views.									
LO3	Understand the file handling concepts and thereby enabling to manage data efficiently.									
LO4	Able to describe clearly the features of SMS messaging.									
LO5	Illustrate the concept of Location Based Services									
UNIT	<b>Contents</b>								No. Of.Hours	
I	<b>Android Fundamentals:</b> Android overview and Versions – Features of Android – Architecture of Android - Setting up Android Environment(Eclipse/Android Studio, SDK, AVD)- Anatomy of an Android Application- Simple Android Application Development.									15
II	<b>Android User Interface:</b> Layouts: Linear, Relative, Frame and ScrollView- Managing changes to Screen Orientation. Views: TextView, Button, ImageButton, EditText, CheckBox, RadioButton, RadioGroup, ProgressBar, AutoCompleteTextView, ListView and WebView									15
III	<b>Data Persistence:</b> Saving and Loading User Preferences. File Handling: FileSystem-Internal and External Storage- Permissions- File Manipulation- Managing Data using SQLite: Creation of database- Insertion, Retrieval and Updation of records.									15
IV	<b>SMS Messaging:</b> Sending and Receiving messages- Sending E-mail- Networking: Downloading Binary Data- Downloading Text Files.									15
V	<b>Location Based Services:</b> Displaying maps- Displaying zoom control- Changing view – Adding Markers- Getting the location – Geocoding Publishing Android Applications: Preparing for publishing- Deploying APK files.									15
<b>TOTAL HOURS</b>										75
<b>Course Outcomes</b>								<b>Programme Outcomes</b>		
CO	On completion of this course, students will									
CO1	Appreciate the importance of visualization in the data analytic solution								PO1, PO2, PO3, PO4, PO5, PO6	

CO2	Apply structured thinking to unstructured problems	PO1, PO2, PO3, PO4, PO5, PO6
-----	--	---------------------------------------

CO3	Understand a very broad collection of machine learning algorithms and problems	PO1, PO2, PO3, PO4, PO5, PO6
CO4	Learn algorithmic topics of machine learning and mathematically deepen enough to introduce the required theories	PO1, PO2, PO3, PO4, PO5, PO6
CO5	Develop an appreciation for what is involved in learning from data.	PO1, PO2, PO3, PO4, PO5, PO6

## SOFTWARE METRICS

Subject Code	L	T	P	S	Credits	Inst.Ho urs	Marks		
							CIA	External	Total
	6	-	-	-	5	6	25	75	100

### Learning Objectives

<b>LO1</b>	Gain a solid understanding of what software metrics are and their significance
<b>LO2</b>	Learn how to identify and select appropriate software metrics based on project goals
<b>LO3</b>	Acquire knowledge and skills in collecting and measuring software metrics
<b>LO4</b>	Learn how to analyze and interpret software metrics data to extract valuable insights
<b>LO5</b>	Gain the ability to evaluate software quality using appropriate metrics

Unit	Contents	No.of Hours
I	<b>Fundamentals of Measurement:</b> Need for Measurement: Measurement in Software Engineering, Scope of Software Metrics, <b>The Basics of measurement:</b> The representational theory of measurement, Measurement and models, Measurement scales and scale types, meaningfulness in measurement	12
II	<b>A Goal-Based Framework For Software Measurement:</b> Classifying software measures, Determining what to Measure, Applying the framework, Software measurement validation, Performing Software Measurement Validation <b>Empirical investigation:</b> Principles of Empirical Studies, Planning Experiments, Planning case studies as quasi-experiments, Relevant and Meaningful Studies	12
III	<b>Software Metrics Data Collection:</b> Defining good data, Data collection for incident reports, How to collect data, Reliability of data collection Procedures <b>Analyzing software measurement data:</b> Statistical distributions and hypothesis testing, Classical data analysis techniques, Examples of simple analysis techniques	12
IV	<b>Measuring internal product attributes:</b> Size Properties of Software Size, Code size, Design size, Requirements analysis and Specifications size, Functional size measures and estimators, Applications of size measures <b>Measuring internal product attributes: Structure:</b> Aspects of Structural Measures, Control flow structure of program units, Design-level Attributes, Object-oriented Structural attributes and measures	12

V	<b>Measuring External Product Attributes:</b> Modelling software quality, Measuring aspects of quality, Usability Measures, Maintainability measures, Security Measures <b>Software Reliability: Measurement and Prediction:</b> Basics of reliability theory, The software reliability problem, Parametric reliability growth models, Predictive accuracy	<b>12</b>		
<b>TOTAL</b>		<b>60</b>		
<b>CO</b>	<b>Course Outcomes</b>			
CO1	Understand various fundamental of measurement and software metrics			
CO2	Identify framework and analysis techniques for software measurement			
CO3	Apply internal and external attributes of software product for effort estimation			
CO4	Use appropriate analytical techniques to interpret software metrics data and derive meaningful insights			
CO5	Recommend reliability models for predicting software quality

	<b>NATURAL LANGUAGE PROCESSING</b>	Elect	4	-	-	-	3	25	75	100
<b>Learning Objectives</b>										
<b>LO1</b>	To understand approaches to syntax and semantics in NLP.									
<b>LO2</b>	To learn natural language processing and to learn how to apply basic algorithms in this field.									
<b>LO3</b>	To understand approaches to discourse, generation, dialogue and summarization within NLP.									
<b>LO4</b>	To get acquainted with the algorithmic description of the main language levels: morphology, syntax, semantics, pragmatic etc.									
<b>LO5</b>	To understand current methods for statistical approaches to machine translation.									
UNIT	<b>Contents</b>								No. Of.Hours	
I	<b>Introduction :</b> Natural Language Processing tasks in syntax, semantics, and pragmatics – Issue- Applications – The role of machine learning –Probability Basics –Information theory – Collocations -N-gram Language Models – Estimating parameters and smoothing – Evaluating language models.								12	
II	<b>WordlevelandSyntacticAnalysis:</b> WordLevelAnalysis:RegularExpressions-Finite-State Automata-Morphological Parsing-Spelling ErrorDetectionandcorrection-WordsandWordclasses-Part-ofSpeechTagging. <b>SyntacticAnalysis:</b> Context-freeGrammar-Constituency-Parsing-ProbabilisticParsing.								12	
III	<b>SemanticanalysisandDiscourseProcessing:</b> SemanticAnalysis: Meaning Representation-LexicalSemantics-Ambiguity- WordSenseDisambiguation. Discourse Processing: cohesion-Reference Resolution-DiscourseCoherenceandStructure.								12	
IV	<b>NaturalLanguageGeneration:</b> ArchitectureofNLGSystems-Generation Tasks and Representations- Application of NLG. <b>MachineTranslation:</b> Problems in Machine Translation. Characteristics of IndianLanguages- MachineTranslationApproaches-TranslationinvolvingIndianLanguages.								12	
V	<b>Informationretrieval and lexical resources:</b> Information Retrieval:									

	Design features of Information Retrieval Systems-Classical, Non-classical, Alternative Models of Information Retrieval – valuation Lexical Resources: WorldNet-FrameNet Stemmers-POSTagger-Research Corpora SSAS.	<b>12</b>
<b>TOTAL</b>		<b>60</b>
<b>Course Outcomes</b>		<b>Programme Outcomes</b>
CO	On completion of this course, students will	
CO1	Describe the fundamental concepts and techniques of natural language processing. Explain the advantages and disadvantages of different NLP technologies and their applicability in different business situations.	PO1, PO2, PO3, PO4, PO5, PO6
CO2	Distinguish among the various techniques, taking into account the assumptions, strengths, and weaknesses of each Use NLP technologies to explore and gain a broad understanding of text data.	PO1, PO2, PO3, PO4, PO5, PO6
CO3	Use appropriate descriptions, visualizations, and statistics to communicate problems and their solutions. Use NLP methods to analyse sentiment of a text document.	PO1, PO2, PO3, PO4, PO5, PO6
CO4	Analyze large volume text data generated from a range of real-world applications. Use NLP methods to perform topic modelling.	PO1, PO2, PO3, PO4, PO5, PO6
CO5	Develop robotic process automation to manage business processes and to increase and monitor their efficiency and effectiveness. Determine the framework in which artificial intelligence and the Internet of things may function, including interactions with people, enterprise functions, and environments.	PO1, PO2, PO3, PO4, PO5, PO6

	<b>ANALYTICS FOR SERVICE INDUSTRY</b>	Elective	6	-	-	-	5	25	75	100

### Learning Objectives

<b>LO1</b>	Recognize challenges in dealing with datasets in service industry.
<b>LO2</b>	Identify and apply appropriate algorithms for analyzing the healthcare, Human resource, hospitality and tourism data.
<b>LO3</b>	Make choices for a model for new machine learning tasks.
<b>LO4</b>	To identify employees with high attrition risk.
<b>LO5</b>	To Prioritizing various talent management initiatives for your organization.

UNIT	Contents	No. Of Hours
I	<b>Healthcare Analytics :</b> Introduction to Healthcare Data Analytics- Electronic Health Records- Components of EHR- Coding Systems- Benefits of EHR- Barrier to Adopting HER Challenges- Phenotyping Algorithms. Biomedical Image Analysis and Signal Analysis- Genomic Data Analysis for Personalized Medicine. Review of Clinical Prediction Models.	<b>12</b>
II	<b>Healthcare Analytics Applications :</b> Applications and Practical Systems for Healthcare- Data Analytics for Pervasive Health- Fraud Detection in Healthcare- Data Analytics for Pharmaceutical Discoveries- Clinical Decision Support Systems- Computer-Assisted Medical Image Analysis Systems- Mobile Imaging and Analytics for Biomedical Data.	<b>12</b>
III	<b>HR Analytics:</b> Evolution of HR Analytics, HR information systems and data sources, HR Metric and HR Analytics, Evolution of HR Analytics; HR Metrics and HR Analytics; Intuition versus analytical thinking; HRMS/HRISS and data sources; Analytics frameworks like LAMP, HCM:21(r) Model.	<b>12</b>
IV	<b>Performance Analysis:</b> Predicting employee performance, Training requirements, evaluating training and development, Optimizing selection and promotion decisions.	<b>12</b>

V	<b>Tourism and Hospitality Analytics:</b> Guest Analytics – LoyaltyAnalytics– CustomerSatisfaction–DynamicPricing–optimized disruptionmanagement– Frauddetectioninpayments.	<b>12</b>

	<b>Database Management System</b>	Core	6	-	-	-	5	6	25	75	100
<b>CourseObjective</b>											
LO1	To enable the students to learn the designing of database systems, foundation on the relational model of data and normal forms.										
LO2	To understand the concepts of database management system, design simple Database models										
LO3	To learn and understand to write queries using SQL, PL/SQL.										
LO4	To enable the students to learn the designing of database systems, foundation on the relational model of data and normal forms.										
LO5	To understand the concepts of database management system, design simple Database models										
UNIT	<b>Details</b>							<b>No.of Hours</b>			
	<b>Database Concepts:</b> Database Systems - Data vs Information - Introducing the database - File system - Problems with file system – Database systems. Data models - Importance - Basic Building Blocks - Business rules - Evolution of Data models - Degrees of Data Abstraction							12			
II	<b>Design Concepts:</b> Relational database model - logical view of data - keys - Integrity rules - relational set operators - data dictionary and the system catalog - relationships - data redundancy revisited - indexes - codd's rules. Entity relationship model - ER diagram							12			
III	<b>Normalization of Database Tables:</b> Database tables							12			

	and Normalization – The Need for Normalization – TheNormalizationProcess–HigherlevelNormalForm.  <b>IntroductiontoSQL:</b> DataDefinitionCommands– DataManipulationCommands–SELECTQueries– AdditionalDataDefinitionCommands–Additional SELECTQueryKeywords–JoiningDatabaseTables.	
IV	<b>Advanced SQL:</b> Relational SET Operators: UNION – UNIONALL–INTERSECT-MINUS.SQLJoin Operators: Cross Join – Natural Join – Join USINGClause – JOIN ON Clause – Outer Join. <b>Sub Queriesand Correlated Queries:</b> WHERE – IN – HAVING –ANY and ALL – FROM. SQL Functions: Date andTimeFunction–NumericFunction– StringFunction–ConversionFunction	12
V	<b>PL/SQL:</b> AProgrammingLanguage:History– Fundamentals – Block Structure – Comments – DataTypes – Other Data Types – Variable Declaration – Assignment operation –Arithmetic operators. <b>ControlStructures and Embedded SQL:</b> Control Structures –NestedBlocks–SQLInPL/SQL– DataManipulation – Transaction Control statements. <b>PL/SQL Cursorsand Exceptions:</b> Cursors – Implicit Cursors, ExplicitCursorsandAttributes–CursorFORloops– SELECT...FOR UPDATE – WHERE CURRENT OFclause – Cursor with Parameters – Cursor Variables –Exceptions–TypesofExceptions.	12
	<b>Total</b>	<b>60</b>
	<b>CourseOutcomes</b>	<b>ProgrammeOutcomes</b>
CO	Oncompletionofthiscourse, studentswill	
1	UnderstandthevariousbasicconceptsofDataBase System.DifferencebetweenfilesystemandDBMS	PO1

	and compare various data models.	
2	Define the integrity constraints. Understand the basic concepts of Relational Data Model, Entity-Relationship Model.	PO1, PO2
3	Design database schema considering normalization and relationships within database. Understand and construct database using Structured Query Language. Attain a good practical skill of managing and retrieving of data using Data Manipulation Language (DML)	PO4, PO6
4	Classify the different functions and various join operations and enhance the knowledge of handling multiple tables.	PO4, PO5, PO6
5	Learn to design Database operations and implement using PL/SQL programs. Learn basics of PL/SQL and develop programs using Cursors, Exceptions	PO3, PO8

	<b>Big Data Analytics</b>		6	-	-	-	5	6	25	75	100
<b>CourseObjective</b>											
LO1	Understand the Big Data Platform and its Use cases, MapReduce Jobs										
LO2	To identify and understand the basics of cluster and decision tree										
LO3	To study about the Association Rules, Recommendation System										
LO4	To learn about the concept of stream										
LO5	Understand the concepts of NoSQL Databases										
UNIT	<b>Details</b>							No. of Hours			
I	Evolution of Big data — Best Practices for Big data Analytics — Big data characteristics — Validating — The Promotion of the Value of Big Data — Big Data Use Cases- Characteristics of Big Data Applications — Perception and Quantification of Value - Understanding Big Data Storage — A General Overview of High-Performance Architecture— HDFS—MapReduce and YARN—MapReduce Programming Model							12			
II	Advanced Analytical Theory and Methods: Overview of Clustering — K-means — Use Cases — Overview of the Method— Determining the Number of Clusters — Diagnostics — Reasons to Choose and Cautions .- Classification: Decision Trees—Overview of a Decision Tree — The General Algorithm — Decision Tree Algorithms—Evaluating a Decision Tree— Decision Trees in R — Naïve Bayes — Bayes Theorem—Naïve Bayes Classifier.							12			

III	Advanced Analytical Theory and Methods: Association	12
	Rules—Overview—Apriori Algorithm— Evaluation of Candidate Rules— Applications of Association Rules— Finding Association & finding similarity Recommendation System: Collaborative Recommendation— Content Based Recommendation — Knowledge Based Recommendation-Hybrid Recommendation Approaches.	
IV	Introduction to Streams Concepts— Stream Data Model and Architecture— Stream Computing, Sampling Data in a Stream — Filtering Streams — Counting Distinct Elements in a Stream — Estimating moments— Counting oneness in a Window—Decaying Window— Realtime Analytics Platform (RTAP) applications — Case Studies — RealTime Sentiment Analysis, Stock Market Predictions. Using Graph Analytics for Big Data: Graph Analytics	12
V	NoSQL Databases : Schema-less Models: Increasing Flexibility for Data Manipulation-Key Value Stores-Document Stores — Tabular Stores — Object Data Stores—Graph Databases Hive—Sharding—Hbase — Analyzing big data with twitter — Big data for E-Commerce Big data for blogs — Review of Basic Data Analytic Methods using R.	12
	<b>Total</b>	<b>60</b>
	<b>Course Outcomes</b>	<b>Programme Outcomes</b>
CO	On completion of this course, students will	

1	Work with big data tools and its analysis techniques.	PO1
2	Analyzed data by utilizing clustering and classification algorithms.	PO1, PO2
3	Learn and apply different mining algorithms and recommendations systems for large volumes of data.	PO4, PO6
4	Perform analytics on data streams.	PO4, PO5, PO6
5	Learn NoSQL databases and management.	PO3, PO8

	<b>Human Computer Interaction</b>	Elective	6	-	-	-	5	6	25	75	100
<b>CourseObjective</b>											
LO1	To learn about the foundations of Human Computer Interaction.										
LO2	To learn the design and software process technologies.										
LO3	To learn HCI models and theories.										
LO4	To learn Mobile Ecosystem.										
LO5	To learn the various types of Web Interface Design.										
UNIT	<b>Details</b>									No. of Hours	
I	<b>FOUNDATIONS OF HCI:</b> <ul style="list-style-type: none"> <li>The Human: I/O channels – Memory</li> <li>Reasoning and problem solving; The Computer: Devices – Memory – processing and networks;</li> <li>Interaction: Models – frameworks – Ergonomics – styles – elements – interactivity – Paradigms. - Case Studies</li> </ul>									12	
II	<b>DESIGN &amp; SOFTWARE PROCESS:</b> <ul style="list-style-type: none"> <li>Interactive Design:</li> <li>Basics – process – scenarios</li> <li>Navigation: screen design Iteration and prototyping.</li> <li>HCI in software process:</li> <li>Software life cycle – usability engineering – Prototyping in practice – design rationale. Design rules: principles, standards, guidelines, rules. Evaluation Techniques – Universal Design</li> </ul>									12	

III	<p><b>MODELSANDTHEORIES:</b></p> <ul style="list-style-type: none"> <li>• HCI Models : Cognitive models:-Socio-Organizational issuesandstakeholderrequirements</li> <li>Communicationandcollaborationmodels-Hypertext,</li> <li>MultimediaandWWW.</li> </ul>	12
IV	<p><b>MobileHCI:</b></p> <ul style="list-style-type: none"> <li>• MobileEcosystem:Platforms,Applicationframeworks</li> <li>• TypesofMobileApplications:Widgets,Applications,Games</li> <li>• MobileInformationArchitecture,Mobile2.0,</li> <li>• MobileDesign:ElementsofMobileDesign,Tools.- CaseStudies</li> </ul>	12
V	<p><b>WEB INTERFACE DESIGN:</b> Designing Web Interfaces – Drag &amp;Drop,DirectSelection,ContextualTools,Overlays,InlaysandVirtualPages,ProcessFlow -CaseStudies</p>	12
<b>Total</b>		<b>60</b>
<b>CourseOutcomes</b>		<b>ProgrammeOutcome</b>
CO	Oncompletionofthiscourse, studentswill	
1	UnderstandthefundamentalsofHCI.	PO1
2	Understandthedesignandsoftwareprocesstechnologies.	PO1,PO2
3	UnderstandHCImodelsandtheories.	PO4,PO6
4	UnderstandMobile Ecosystem, typesofMobileApplications,mobileArchitectureanddesign.	PO4,PO5,PO6
5	UnderstandthevariousatypesofWebInterface Design.	PO3,PO8

	<b>FuzzyLogic</b>	Elective	6	-	-	-	5	6	25	75	100
<b>CourseObjective</b>											
LO1	To understand the basic concept of Fuzzy logic										
LO2	To learn the various operations on relation properties										
LO3	To study about the membership functions										
LO4	To learn about the Defuzzification and Fuzzy Rule-Based System										
LO5	To learn the concepts of Applications of Fuzzy Logic										
UNIT	<b>Details</b>								<b>No. of Hours</b>		
I	Introduction to Fuzzy Logic- Fuzzy Sets- Fuzzy Set Operations, Properties of Fuzzy Sets, Classical and Fuzzy Relations: Introduction- Cartesian Product of Relation-Classical Relations- Cardinality of Crisp Relation.								12		
II	Operations on Crisp Relation-Properties of Crisp Relations- Composition of Fuzzy Relations, Cardinality of Fuzzy Relations-Operations on Fuzzy Relations- Properties of Fuzzy Relations-Fuzzy Cartesian Product and Composition- Tolerance and Equivalence Relations , Crisp Relation.								12		
III	Membership Functions: Introduction, Features of Membership Function, Classification of Fuzzy Sets, Fuzzification, Membership Value Assignments, Intuition, Inference, Rank Ordering.								12		

IV	Defuzzification: Introduction, Lambda Cuts for Fuzzy Sets, Lambda Cuts for Fuzzy Relations, Defuzzification Methods, Fuzzy Rule-Based System: Introduction, Formation of Rules, Decomposition of Rules, Aggregation of Fuzzy Rules, Properties of Sets of Rules.	12
V	Applications of Fuzzy Logic: Fuzzy Logic in Automotive Applications, Fuzzy Anti-lock Brake System - Anti-lock Braking System and Vehicle Speed-Estimation Using Fuzzy Logic.	12
<b>TOTAL</b>		<b>60</b>
<b>Course Outcomes</b>		<b>Programme Outcomes</b>
CO	On completion of this course, students will	
1	Understand the basic of Fuzzy sets, operation and properties.	PO1
2	Apply Cartesian product and composition on Fuzzy relations and use the tolerance and Equivalence relations.	
3	Analyze various fuzzification methods and features of membership functions.	PO4, PO6
4	Evaluate defuzzification methods for real time applications.	
5	Design an application using Fuzzy logic and its relations.	PO3, PO8

	<b>Mobile Ad-hocNetwork</b>	Elective	6	-	-	-	5	5	25	75	100
<b>CourseObjective</b>											
LO1	To learn about basic concepts of Ad-hoc network models.										
LO2	To learn about Medium Access Protocols (MAC).										
LO3	To learn about Network Routing Protocols and Algorithms.										
LO4	To learn about Delivery and Security in Transport Layer.										
LO5	To learn about cross layer design and optimization techniques, Integration of ad-hoc with Mobile IP networks.										
UNIT	<b>Details</b>									<b>No.of Hours</b>	
I	<b>Introduction:</b> Introduction to ad-hoc networks – definition, characteristics, features, applications. Characteristics of wireless channel, ad-hoc mobility models in door and out-door models.									12	
II	<b>Medium Access Protocol:</b> <ul style="list-style-type: none"> <li>• MAC Protocols: Design issues, goals and classification.</li> <li>• Contention based protocols – with reservation, scheduling algorithms, protocols using directional antennas.</li> <li>• IEEE standards: 802.11a, 802.11b, 802.11g, 802.15. HIPERLAN.</li> </ul>									12	
III	<b>Network Protocols:</b> Routing Protocols: Design issues, goals and classification. Proactive Vs reactive routing, unicast routing algorithms, Multicast routing algorithms, hybrid routing algorithm, energy aware routing algorithm, hierarchical routing, QoS aware routing.									12	
IV	<b>End-to-end delivery and security:</b> Transport Layer: Issues in designing – Transport layer classification, ad-hoc transport protocols. Security issues in ad-hoc networks: issues and challenges, network security attacks, secure routing protocols.									12	

V	Need for cross layer design, cross layer optimization, parameter optimization techniques, cross layer cautionary perspective. Integration of ad-hoc with Mobile IP networks.	12
<b>Total</b>		<b>60</b>
<b>CourseOutcomes</b>		<b>ProgrammeOutcome</b>
CO	On completion of this course, students will	
1	Understand the basics concepts of Ad-hoc network models.	PO1
2	Understand the Medium Access Protocols (MAC).	PO1, PO2
3	Understand Network Routing Protocols, design issues and various types of Routing Algorithms.	PO4, PO6
4	Understand the concepts of Delivery and Security in Transport Layer.	PO4, PO5, PO6
5	Understand cross layer techniques and Integration of ad-hoc with Mobile IP networks.	PO3, PO8

Learning Algorithms - Error correction - Gradient Descent Rules, Perception Learning Algorithm, Perception Convergence Theorem.									12	
II	Introduction, Error correction learning, Memory-based learning, Hebbian learning, Competitive learning, Boltzmann learning, credit assignment problem, Learning with and without teacher, learning tasks , Memory and Adaptation.									12	
III	Single layer Perception: Introduction, Pattern Recognition, Linear classifier, Simple perception, Perception learning algorithm, Modified Perception learning algorithm, Adaptive linear combiner, Continuous perception, Learning in continuous perception. Limitation of Perception.									12	

IV	Multi-Layer Perception Networks: Introduction, MLP with 2 hidden layers, Simple layer of a MLP, Delta learning rule of the output layer,	12
	Multilayer feedforward neural network with continuous perceptions, Generalized delta learning rule, Backpropagation algorithm	
V	Deep learning- Introduction- Neuro architectures building blocks for the DL techniques, Deep Learning and Neocognitron, Deep Convolutional Neural Networks, Recurrent Neural Networks (RNN), feature extraction, Deep Belief Networks, Restricted Boltzmann Machines, Training of DNN and Applications	12
	<b>Total</b>	<b>60</b>
<b>Course Outcomes</b>		<b>Programme Outcome</b>
CO	On completion of this course, students will	
1	<b>Students will learn the basics of artificial neural networks with single layer and multi-layer perception networks.</b>	PO1
2	Learn about the Error Correction and various learning algorithms and tasks.	PO1, PO2
3	Learn the various Perception Learning Algorithm.	PO4, PO6
4	Learn about the various Multi-Layer Perception Network.	PO4, PO5, PO6
5	Understand the Deep Learning of various Neural network and its Applications.	PO3, PO8
<b>TextBook</b>

	<b>Agile Project Management</b>	Elective	6	-	-	-	5	6	25	75	100
<b>CourseObjective</b>											
LO1	Learning of software design, software technologies and APIs.										
LO2	Detailed demonstration about Agile development and testing techniques.										
LO3	Learning about Agile Planning and Execution.										
LO4	ing of Agile Management Design and Quality Check.										
LO5	Detailed examination of Agile development and testing techniques.										
UNIT	<b>Details</b>									<b>No.of Hours</b>	
I	<p><b>Introduction: Modernizing Project Management:</b> Project Management Needed a Makeover – Introducing Agile Project Management.</p> <p><b>Applying the Agile Manifesto and Principles:</b> Understanding the Agile manifesto – Outlining the four values of the Agile manifesto – Defining the 15 Agile Principles – Adding the Platinum Principles – Changes as a result of Agile Values – The Agile litmus test.</p> <p><b>Why Being Agile Works Better:</b> Evaluating Agile benefits – How Agile approaches beat historical approaches – Why people like being Agile.</p>									12	
II	<p><b>Being Agile</b></p> <p><b>Agile Approaches:</b> Diving under the umbrella of Agile approaches – Reviewing the Big Three: Lean, Scrum, Extreme Programming – Summary</p>									12	

	<p><b>Agile Environments in Action:</b> Creating the physical environment – Low-tech communicating – High-tech communicating – Choosing tools.</p> <p><b>Agile Behaviours in Action:</b> Establishing Agile roles – Establishing new values – Changing team philosophy.</p>	
III	<p><b>Agile Planning and Execution</b></p> <p><b>Defining the Product Vision and Roadmap:</b> Agile planning – Defining the product vision – Creating a product roadmap – Completing the product backlog.</p> <p><b>Planning Releases and Sprints:</b> Refining requirements and estimates – Release planning – Sprint planning.</p> <p><b>Working Throughout the Day:</b> Planning your day – Tracking progress – Agile roles in the sprint – Creating shippable functionality – The end of the day.</p> <p><b>Showcasing Work, Inspecting and Adapting:</b> The sprint review – The sprint retrospective.</p> <p><b>Preparing for Release:</b> Preparing the product for deployment (the release sprint) – Preparing the operational support – Preparing the organization for product deployment – Preparing the marketplace for product deployment</p>	12
IV	<p><b>Agile Management</b></p> <p><b>Managing Scope and Procurement:</b> What's different about Agile scope management – Managing Agile scope – What's different about Agile procurement – Managing Agile procurement.</p> <p><b>Managing Time and Cost:</b> What's different about Agile time management – Managing Agile schedules – What's different about Agile cost management – Managing Agile budgets.</p> <p><b>Managing Team Dynamics and Communication:</b> What's different about Agile team dynamics – Managing Agile team dynamics –</p>	12

	What's different about Agile communication – Managing Agile communication.  <b>Managing Quality and Risk:</b> What's different about Agile quality – Managing Agile quality – What's different about Agile risk management – Managing Agile risk.	
V	<p><b>Implementing Agile</b></p> <p><b>Building a Foundation:</b> Organizational and individual commitment – Choosing the right pilot team members – Creating an environment that enables Agility – Supporting Agility initially and over time.</p> <p><b>Being a Change Agent:</b> Becoming Agile requires change – why change doesn't happen on its own – Platinum Edge's Change Roadmap – Avoiding pitfalls – Signs your changes are slipping.</p> <p><b>Benefits, Factors for Success and Metrics:</b> Ten key benefits of Agile project management – Ten key factors for project success – Ten metrics for Agile Organizations.</p>	12
	<b>Total</b>	
	<b>Course Outcomes</b>	
CO	On completion of this course, students will	
1	Understanding of software design, software technologies and APIs using Agile Management.	PO1
2	Understanding of Agile development and testing techniques.	PO1, PO2
3	Understanding about Agile Planning and Execution using Sprint.	PO4, PO6
4	Understanding of Agile Management Design, scope, Procurement, managing Time and Cost and Quality Check.	PO4, PO5, PO6

5	Analysing of Agile development and testing techniques.	PO3,PO8

	<b>FUNDAMENTALS OF INFORMATION TECHNOLOGY</b>	Specif icElec tive	2	-	-	-	2	25	75	100		
<b>Learning Objectives</b>												
<b>LO1</b>	Understand basic concepts and terminology of information technology.											
<b>LO2</b>	Have a basic understanding of personal computers and their operation											
<b>LO3</b>	Be able to identify data storage and its usage											
<b>LO4</b>	Get great knowledge of software and its functionalities											
<b>LO5</b>	Understand about operating systems and their uses											
UNIT	<b>Contents</b>								<b>No.Of. Hours</b>			
I	<b>Introduction to Computers</b> –Generations of Computer–Data and Information – Components of Computer – Software – Hardware – Input Devices–Output Devices—Types of Operating System.								<b>6</b>			
II	<b>MS Word</b> : Introduction–Elements of Window–Files, Folders and Directories – Text Manipulating: Cut, Copy, Paste, Drag and Drop – Text Formatting: Font – Style, Size, Face and Colors (Both foreground and background)– Alignment–Bullets and Numbering–Header and footer–watermark–inserting objects (images, other application document)–Table creation – Mail merge.								<b>6</b>			
III	<b>Ms Excel</b> : Introduction–Inserting rows and columns–Sizing rows and columns–Implementing formulas–Generating series–Functions in excel –Creation of Chart–Inserting objects–Filter–Sorting–Inserting worksheet.								<b>6</b>			
IV	<b>MSPowerPoint</b> : Introduction–Slides Manipulation (Inserting new, Copy, paste, delete and duplicate slides) – Slide show– Types of Views – Types of Animations–Inserting Objects–Implementing multimedia (Video and Audio)–Templates (Built-in and User-Defined).								<b>6</b>			
V	<b>Internet</b> : Introduction to Internet and Intranet–Services of Internet–Domain Name – URL – Browser – Types of Browsers – Search Engine -E-Mail – Basic Components of E-Mail – How to send group mail. <b>E-Commerce</b> : Digital Signature–Digital Currency–Online shopping and transaction.								<b>6</b>			
<b>TOTAL HOURS</b>								<b>30</b>				
<b>Course Outcomes</b>								<b>Programme Outcomes</b>				
CO	On completion of this course, students will											

CO1	Learn the basics of computer, Construct the structure of the required things in computer, learn how to use it.	PO1, PO2, PO3, PO4, PO5, PO6
CO2	Develop organizational structure using for the devices present currently under input or output unit.	PO1, PO2, PO3, PO4, PO5, PO6
CO3	Concept of storing data in computer using two headers namely RAM and ROM with different types of ROM with advancement in storage basis.	PO1, PO2, PO3, PO4, PO5, PO6
CO4	Work with different software, Write program in the software and applications of software.	PO1, PO2, PO3, PO4, PO5, PO6
CO5	Usage of Operating system in information technology which really acts as a interpreter between software and hardware.	PO1, PO2, PO3, PO4, PO5, PO6

	<b>PROBLEM SOLVING TECHNIQUES</b>	Specific Elective	2	-	-	-	2	2	25	75	100
<b>CourseObjective</b>											
LO1	Understand the systematic approach to problem solving.										
LO2	Know the approach and algorithms to solve specific fundamental problems.										
LO3	Understand the efficient approach to solve specific factoring-related problems.										
LO4	Understand the efficient array-related techniques to solve specific problems.										
LO5	Understand the efficient methods to solve specific problems related to text processing.  Understand how recursion works.										
<b>UNIT</b>	<b>Details</b>									<b>No.of Hours</b>	
I	<b>Introduction:</b> Notion of algorithms and programs – Requirements for solving problems by computer – The problem-solving aspect: Problem definition phase, Getting started on a problem, The use of specific examples, Similarities among problems, Working backwards from the solution – General problem-solving strategies – Problem solving using top-down design – Implementation of algorithms – The concept of Recursion.									6	
II	<b>Fundamental Algorithms:</b> Exchanging the values of two variables – Counting – Summation of a set of numbers – Factorial computation – Sine function computation – Fibonacci Series generation – Reversing the digits of an integer – Base Conversion.									6	
III	<b>Factoring Methods:</b> Finding the square root of a number – The smallest divisor of an integer – Greatest common divisor of two integers - Generating prime numbers – Computing the prime factors of an integer – Generation of pseudo-random numbers - Raising a number to a large power – Computing the $n$ th Fibonacci number.									6	
IV	<b>Array Techniques:</b> Array order reversal – Array counting or histogramming – Finding the maximum number in a set - Removal of duplicates from an ordered array – Partitioning an array – Finding the $k^{\text{th}}$ smallest element – Longest monotone subsequence.									6	

V	<b>Text Processing and Pattern Searching:</b> Text line length adjustment – Left and right justification of text – Keyword searching in text – Text line editing – Linear pattern search.  <b>Recursive algorithms:</b> Towers of Hanoi – Permutation generation.	6
	<b>Total</b>	<b>30</b>
<b>Course Outcomes</b>		<b>Programme Outcome</b>
CO	On completion of this course, students will	
1	Understand the logic of problem and analyses implementation of algorithm and Top Down approach and concept of Recursion	PO1, PO6
2	Able to understand the Sequence of Numbers and Series Fibonacci, Reversing, Base Conversion.	PO2
3	Able to do Algebraic operations	PO2, PO4
4	Coverage of Arrays and its Logics	PO6, PO8
5	Text Processing and Pattern Searching Approach	PO7

	<b>OFFICE AUTOMATION</b>	Specific Elective	2	-	-	-	2	2	25	75	100		
<b>CourseObjective</b>													
LO1	Understand the basics of computer systems and its components.												
LO2	Understand and apply the basic concepts of word processing package.												
LO3	Understand and apply the basic concepts of electronic spreadsheet software.												
LO4	Understand and apply the basic concepts of database management system.												
LO5	Understand and create a presentation using PowerPoint tool.												
UNIT	<b>Details</b>									No. of Hours			
I	<b>Introductory concepts:</b> Memory unit – CPU-Input Devices: Key board, Mouse and Scanner. Output devices: Monitor, Printer. Introduction to Operating systems & its features: DOS – UNIX – Windows. Introduction to Programming Languages.									6			
II	<b>Word Processing:</b> Open, Save and close word document; Editing text – tools, formatting, bullets; Spell Checker - Document formatting – Paragraph alignment, indentation, headers and footers, numbering ; printing – Preview, options, merge.									6			
III	<b>Spreadsheets:</b> Excel – opening, entering text and data, formatting, navigating; Formulas – entering, handling and copying; Charts – creating, formatting and printing, analysis tables, preparation of financial statements, introduction to data analytics.									6			
IV	<b>Database Concepts:</b> The concept of data base management system; Data field, records, and files, Sorting and indexing data; Searching records. Designing queries, and reports; Linking of data files; Understanding Programming environment in DBMS; Developing menu drive applications in query language (MS – Access).									6			
V	<b>Power point:</b> Introduction to Power point - Features – Understanding slide type casting & viewing slides – creating slideshows. Applying special object – including objects & pictures – Slide transition – Animation effects, audio inclusion, timers.									6			
	<b>Total</b>									30			
<b>CourseOutcomes</b>								<b>ProgrammeOutcomes</b>					
CO	On completion of this course, students will												
1	Possess the knowledge on the basics of computers and its components							PO1, PO2, PO3, PO6, PO8					

2	Gain knowledge on Creating Documents, spreadsheets and presentation.	PO1, PO2, PO3, PO6
3	Learn the concepts of Database and implement the Query in Database.	PO3, PO5, PO7
4	Demonstrate the understanding of different automation tools.	PO3, PO4, PO5, PO7
5	Utilize the automation tools for documentation, calculation and presentation purpose.	PO4, PO6, PO7, PO8

	<b>Pattern Recognition</b>	Specific Elective	2	-	-	-	2	2	75	25	100
<b>CourseObjective</b>											
LO1	To learn the fundamental of Pattern Recognition techniques										
LO2	To learn the various Statistical Pattern recognition techniques										
LO3	To learn the linear discriminant functions and unsupervised learning and clustering										
LO4	To learn the various Syntactical Pattern recognition techniques										
LO5	To learn the Neural Pattern recognition techniques										
UNIT	<b>Details</b>						<b>No.of Hours</b>				
I	<b>PATTERN RECOGNITION OVERVIEW:</b> Pattern recognition, Classification and Description-Patterns and feature Extraction with Examples-Training and Learning in PR systems- Pattern recognition Approaches						6				
II	<b>STATISTICAL PATTERN RECOGNITION:</b> Introduction to statistical Pattern Recognition-supervised Learning using Parametric and Non-Parametric Approaches.						6				
III	<b>LINEAR DISCRIMINANT FUNCTIONS AND UNSUPERVISED LEARNING AND CLUSTERING:</b> Introduction-Discrete and binary Classification Problems- Techniques to directly Obtain linear Classifiers - Formulation of Unsupervised Learning Problems- Clustering for unsupervised learning and classification						6				
IV	<b>SYNTACTIC PATTERN RECOGNITION:</b> Overview of Syntactic Pattern Recognition-Syntactic recognition via parsing and other grammars- Graphical Approaches to syntactic pattern recognition-Learning via grammatical inference.						6				
V	<b>NEURAL PATTERN RECOGNITION:</b> Introduction to Neural Networks-Feed-forward Networks and training by Back Propagation- Content Addressable Memory Approaches and Unsupervised Learning in Neural PR						6				
	<b>Total</b>						30				
<b>CourseOutcomes</b>							<b>ProgrammeOutcomes</b>				
CO	On completion of this course, students will										
1	understand the concepts, importance, application and the process of developing Pattern recognition overview						PO1				

2	to have basic knowledge and understanding about parametric and non-parametric related concepts.	PO1,PO2
3	To understand the framework of frames and bit images to animations	PO4,PO6
4	Speaks about the multimedia projects and stages of requirement in phases of project.	PO4,PO5,PO6
5	Understanding the concept of cost involved in multimedia planning, designing, and producing	PO3,PO8

	<b>ERP</b>	Specific Elective	2	-	-	-	2	2	25	75	100
<b>Course Objectives</b>											
LO1	To understand the basic concepts, Evolution and Benefits of ERP.										
LO2	To know the need and Role of ERP in logical and Physical Integration.										
LO3	Identify the important business functions provided by typical business softwares such as enterprise resource planning and customer relationship management										
LO4	To train the students to develop the basic understanding of how ERP enriches the business organizations in achieving a multidimensional growth										
LO5	To aim at preparing the students technological competitive and make them ready to self-upgrade with the higher technical skills										
UNIT	Details								No. of Hours		
I	ERP Introduction, Benefits, Origin, Evolution and Structure: Conceptual Model of ERP, the Evolution of ERP, the Structure of ERP, Components and needs of ERP, ERP Vendors; Benefits & Limitations of ERP Packages.								6		
II	Need to focus on Enterprise Integration/ERP; Information mapping; Role of common shared Enterprise database, System Integration, Logical vs. Physical System Integration, Benefits & limitations of System Integration, ERP's Role in Logical and Physical Integration, Business Process Reengineering, Data warehousing, Data Mining, Online Analytic Processing (OLAP), Product Life Cycle Management (PLM), LAP, Supply chain Management.								6		
III	ERP Marketplace and Marketplace Dynamics: Market Overview, Marketplace Dynamics, the Changing ERP Market. ERP-Functional Modules: Introduction, Functional Modules of ERP Software, Integration of ERP, Supply chain and Customer Relationship Applications. Cloud and Open Source, Quality Management, Material Management, Financial Module, CRM and Case Study.								6		
IV	ERP Implementation Basics, ERP Implementation Strategy, ERP Implementation Life Cycle, Pre-Implementation task, Role of SDLC/SSAD, Object Oriented Architecture, Consultants, Vendors and Employees.								6		

	Internet,Criticalsuccessandfailurefactors,IntegratingERP into organizationalculture.UsingERPtool:eitherSAPorORACLEformattocasestudy.

	<b>SimulationandModeling</b>	Specific Elective	2	-	-	-	2	2	25	75	100
<b>Course Objectives</b>											
LO1	Generates computer simulation technologies and techniques, lays the groundwork for students to comprehend computer simulation requirements, and implements and tests a variety of simulation and data analysis libraries and programmes. This course focuses on what is required to create simulation software environments rather than just simulations using pre-existing packages										
LO2	Discusses the concepts of modelling layers of critical infrastructure networks in society.										
LO3	Creates tools for viewing and controlling simulations and their results.										
LO4	Understands the concept of Entity modelling, Path planning										
LO5	To learn about the Algorithms and Modelling.										
LO1	<b>Details</b>							<b>No.ofHours</b>			
I	Introduction To Modeling & Simulation – What is Modeling and Simulation – Complexity Types – Model Types – Simulation Types – M&S Terms and Definitions Input Data Analysis – Simulation Input Modeling – Input Data Collection – Data Collection Problems - - - Input Modeling Strategy – Histograms – Probability Distributions – Selecting a Probability Distribution.							6			

II	RandomVariateGeneration–RandomNumbers– RandomNumberGenerators–Generalprinciples– InverseTransformMethod–AcceptanceRejectionMethod– CompositionMethod–RelocateandRescaleMethod Specific distributions-Output Data Analysis - Introduction-TypesofSimulationWithRespecttoOutput Analysis - Stochastic Process and Sample Path - SamplingandSystematicErrors-Mean,StandardDeviation and Confidence Interval - Analysis of Finite-Horizon Simulations - Single Run - Independent Replications-SequentialEstimation–Analysisisof	-	-	6
----	---	---	---	---

	Steady-StateSimulations-RemovalofInitializationBias (Warm-upInterval)-Replication-DeletionApproach-Batch-MeansMethod.	
III	ComparingSystemsviaSimulation–Introduction–ComparisonProblems-ComparingTwoSystems-ScreeningProblems - Selecting the Best - Comparisonwith a Standard - Comparison with a Fixed PerformanceDiscrete Event Simulations – Introduction - Next-EventTime Advance - Arithmetic and Logical Relationships -Discrete-EventModelingApproaches-Event-SchedulingApproach–ProcessInteractionApproach.	6

	<b>OrganizationalBehaviour</b>	Specific Elective	2	-	-	-	2	2	25	75	100
<b>Learning Objectives</b>											
LO1	To have extensive knowledge on OB and the scope of OB.										
LO2	To create awareness of Individual Behaviour.										
LO3	To enhance the understanding of Group Behaviour										
LO4	To know the basics of Organisational Culture and Organisational Structure										
LO5	To understand Organisational Change, Conflict and Power										
UNIT	Details								No. of Hours		
I	<b>INTRODUCTION:</b> Concept of Organizational Behavior (OB): Nature, Scope and Role of OB: Disciplines that contribute to OB; Opportunities for OB (Globalization, Indian workforce diversity, customer service, innovation and change, networked organizations, work-life balance, people skills, positive work environment, ethics)								6		
II	<b>INDIVIDUAL BEHAVIOUR:</b> 1. Learning, attitude and Job satisfaction: Concept of learning, conditioning, shaping and reinforcement. Concept of attitude, components, behavior and attitude. Job satisfaction: causation; impact of satisfied employees on workplace. 2. Motivation : Concept; Theories (Hierarchy of needs, X and Y, Two factor, McClelland, Goal setting, Self-efficacy, Equity theory); Job characteristics model; Redesigning jobs, 3. Personality and Values : Concept of personality; Myers-Briggs Type Indicator (MBTI); Big Five model. Relevance of values; Linking personality and values to the workplace (person-job fit, person-organization fit) 4. Perception, Decision Making: Perception and Judgements; Factors; Linking perception to individual decision making;								6		
III	<b>GROUP BEHAVIOUR:</b> 1. Groups and Work Teams: Concept: Five Stage model of group development; Group norms, cohesiveness ; Group think and shift ; Teams; types of teams; Creating team players from individuals and team based work (TBW) 2. Leadership : Concept; Trait theories; Behavioral theories (Ohio and Michigan studies); Contingency								6		

	theories(Fiedler,HerseyandBlanchard,Path-Goal);	
IV	ORGANISATIONALCULTURE AND STRUCTURE : Concept of culture; Impact (functions and liability); Creatingandsustainingculture:Conceptofstructure,Prevalent organizationaldesigns:Newdesignoptions	6
V	ORGANISATIONALCHANGE,CONFLICTANDPOWER: Forcesofchange;Plannedchange;Resistance;Approaches(Lewin's model,Organisationaldevelopment);Conceptofconflict,Conflictprocess;Types,Functional/Dysfunctional. Introductiontopowerandpolitics.	6
		30
