PERIYAR UNIVERSITY

PERIYAR PALKALAI NAGAR

SALEM-636011

DEGREE OF BACHELOR OF SCIENCE

CHOICE BASED CREDIT SYSTEM

Syllabus for

B.Sc., Digital and Cyber Forensic Science

(SEMESTER PATTERN-CBCS)

(For Candidates admitted in the College affiliated to

Periyar University from 2024-2025 onwards)

B.Sc., Digital and Cyber Forensic Science **Syllabus**

REGULATIONS

1. Eligibility for Admission:

Candidate seeking admission to the first year degree of Bachelor of Science in Digital and Cyber Forensic Science shall be required to have passed the Higher Secondary Examination with Mathematics / Statistics /Computer Science Technology/Computer Applications as one of the subjects conducted by the Government of Tamil Nadu or any other examination accepted by the syndicate of Periyar University, subject to such condition as, may be prescribed thereto, are permitted to appear and qualify for B.Sc., Degree of this University after a course of three academic years.

2. Eligibility for award of degree:

A Candidate shall be eligible for the award of degree only if he/she has undergone, the prescribed course of study in a college affiliated to the University for a period not less than three academic years, comprising six Semesters and passed the examination.

3. COURSE OF STUDY AND SCHEME OFEXAMINATION

The course of study shall comprise instruction in the following subjects according to the syllabus and books prescribed from time to time. The scheme of examination of the different semesters shall be as follows;

Total Marks:	4300
Part I:	400
Part II:	400
Part III:	2300
Part IV:	1200
Total Credits:	140
Total Credits: Part I:	140 12
Part I:	12

mme Outcomes (POs)
cessful completion of the B.Sc.,Digital and Cyber Forensic Science.
Exhibit good domain knowledge and completes the assigned responsibilities
effectively and efficiently in par with the expected quality standards.
Apply analytical and critical thinking to identify, formulate, analyze, and solve
complex problems in order to reach authenticated conclusions
Design and develop research-based solutions for complex problems with
specified needs through appropriate consideration for the public health, safety,
cultural, societal, and environmental concerns.
Establish the ability to Listen, read, proficiently communicate and articulate
complex ideas with respect to the needs and abilities of diverse audiences.
Deliver innovative ideas to instigate new business ventures and possess the
qualities of a good entrepreneur
Acquire the qualities of a good leader and engage in efficient decision-making.
Graduates will be able to undertake any responsibility as an individual/member of
multidisciplinary teams and have an understanding of team leadership
Function as socially responsible individual with ethical values and accountable to
ethically validate any actions or decisions before proceeding and actively contribute
to the societal concerns.
Identify and address own educational needs in a changing world in ways
sufficient to maintain the competence and to allow them to contribute to the
advancement of knowledge
Demonstrate knowledge and understanding of management principles and
apply these to one own work to manage projects and in multidisciplinary
environment.

- > To emphasize the importance of scientific methods in crime detection.
- > To disseminate information on the advancements in the field of cyber forensic science.
- > To highlight the importance of forensic science for perseverance of the society.
- > To generate talented human resource, commensurate with latest requirements of digital and cyber forensic science.
- > To review the steps necessary for achieving highest excellence in cyber forensic science.

> To provide a platform for students and forensic scientists to exchange views, chalkout collaborative programs and work in a holistic manner for the advancement of forensic science.

Programme Educational Objectives (PEOs)								
, 0	The B.Sc., Digital and Cyber Forensic Science program describe accomplishments that graduates are expected to attain within five to seven years after graduation.							
PEO1	PEO1 Expertise with the knowledge of investigation of cyber offenses and online frauds							
PEO2	Handle cyber forensic laboratory methodologies with respect to the examination and analysis of evidence.							
PEO3	Develop oral communication skills for discussing the scientific methods in a laboratory setting and effectively testifying in a court of law.							
PEO4	To analytically educate the necessity to understand the impact of cybercrimes and threats with solutions in a global context.							

Program	Programme Specific Outcomes (PSOs)								
	successful completion of B.Sc. Digital and Cyber forensic Science program the re expected to								
PSO1	Impart education with domain knowledge effectively and efficiently in par wit the expected quality standards for digital and cyber forensic science professional								
PSO2	Ability to apply the mathematical, technical and critical thinking skills in the forensic investigations.								
PSO3	Ability to involve in life-long learning and adopt fast changing technology to prepare for professional development.								
PSO4	Expose the students to learn the important of forensic science and criminology such as basic of cyber forensic science psychology, forensic chemistry, forensic toxicology, and cyber forensic anthropology.								
PSO5	Inculcate effective communication skills combined with professional & ethical attitude.

	23UEX01	Extension Activity	-	1	-	-	-
		Total	30	23			600

Note:

- 1. Skill enhancer: Internship 1 and 2 Student will be complete the internship in the summer vacation. The report should be submitted as per format and review will be conducted the end of the third and fifth semester respectively.
- **2. Field visit:** Students to visit the crime investigation department and have to collect the investigation procedure and submit the report.

Core Elective: I (any one)

- 1. DNA Typing in Forensic
- 2. Essential of Cyber Security
- 3. Criminal procedure and evidence

Core Elective: II (any one)

- 1. Wildlife Forensic
- 2. Contemporary Crimes
- 3. Technological methods in Forensic science

Core Elective: III (any one)

- 1. Forensic ballistics
- 2. Forensic Toxicology
- 3. Web Application Security

Course Code	24UDCF01	INTRODUCTION TO CYBER SECURITY	L	Т	P	С
Core/Elective		Core: 1	5	1	•	5
		Basic knowledge in Cyber Security				

Course Objectives

- 1. Exhibit knowledge to secure corrupted systems, protect personal data, and secure computer networks in an organization
- 2. Understand principles of web security and to guarantee a secure network by monitoring and analyzing the nature of attacks through cyber computer forensics software/tools.
- 3. Understand the performance and troubleshoot cyber security systems.
- 4. Understand key terms and concepts in Cryptography
- 5. Develop cyber security strategies and policies

Expected Course OutcomesCO1Understand the need and nature of Cyber SecurityCO2Implement mechanism for access control cryptography and authenticationCO3Analyze and evaluate the cyber security needs of an organization.K1CO4Describe risk management concept and cyber security lawToCO5Understand principles of web security and to guarantee a secure networkK6

K1 – Remember K2– Understand K3 – Apply K4- Analyze K5 – Evaluate k6-Create

UNIT – I INTRODUCTION TO CYBER SECURITY 15 Hours

Introduction to Cyber Security. Confidentiality, Integrity and Availability – Triad. Attacks: Threats, Vulnerabilities and Risk. Risk Management, Risk Assessment and Analysis. Information Classification, Policies, Standards, Procedure and Guidelines. Controls: Physical, Logical and Administrative; Security Frameworks, Defense in-depth: Layers of Security. Identification and Authentication Factors. Authorization and Access Controls- Models, Methods and Types of Access Control.

UNIT II BASICS OF CRYPTOGRAPHY 15 Hours

Definitions and Concepts, Symmetric and Asymmetric Cryptosystems, Classical Encryption Techniques – Substitution Techniques, Transposition Techniques, Block Ciphers and Stream Ciphers, Hybrid Encryption Techniques, One-Time Pad. E-mail security, Internet and Web Security. Steganography and its detection, Data Encryption Standard (DES), Principles of public key cryptosystems-The RSA algorithm-Key management - Diffie Hellman Key exchange.

UNIT-III NETWORK AND WIRELESS ATTACKS 15 Hours

Network Sniffing, Wire shark, packet analysis, display and capture filters, Etter cap, DNS Poisoning, ARP Poisoning, Denial of services, Vulnerability scanning, Setup network IDS/IPS, Router attacks, Man-in-the-middle Attack, N map, open ports, filtered ports, service detection, network vulnerability assessment, Evade anti-viruses and firewalls, Protocols, MAC Filtering, Packet Encryption, Packet Sniffing, Types of authentication, Attacks on WEP, WPA and WPA-M Encryption, fake hotspots.

UNIT -IV	NETWORK SECURITY	15 Hours
----------	------------------	----------

IP security architecture, Security protocols, IPSec, Web Security – Firewalls, IDS, IDPS – Types and Technologies. Trusted systems – Electronic payment protocols. Network Security Applications, Authentication Mechanisms: Passwords, Cryptographic authentication protocol, Kerberos, X.509 LDAP Directory. Digital Signatures.

UNIT-	V WEB SECURITY 15 Hours
Web Se	curity: SSL Encryption, TLS, SET. Intrusion detection. Securing online payments (OTP).
	Total Lecture Hours 75 Hours

	SECURITY LAB									

Learning Objectives:

- 1. To Understand the fundamental concepts of cryptography and the different types of encryption techniques
- 2. To develop an understanding of the different security algorithms and their implementation in open-source tools like GnuPG and Snort.
- 3. To Gain practical experience in using various network security tools
- 4. To Understand the importance of secured data storage and transmission
- 5. To understand about intrusion detection system

	Course Outcomes	
CO1	Implement the cipher techniques.	
CO2	Develop the various security Algorithms	K1
CO3	Use different open-source tools for network security and analysis	TO K6
CO4	Demonstrate Secured data transmission	
CO5	Installation of root kits	
I/1 D.	omember V2 Understand V2 Apply V4 Applyge V5 Evaluate V4 Creets	

K1 – Remember K2 – Understand K3– Apply K4- Analyze K5 – Evaluate K6-Create

	Lab Programs	Hour
1.	Implement the following Substitution & Transposition Techniques concepts: a) Caesar Cipher b) Railfan cerow & Column Transformation	
2.	Implement the Diffie-Hellman Key Exchange mechanism using HTML and JavaScript	
3.	•	
4.	Implement the following Attack: a) Dictionary Attack b) Brute Force Attack	
5.	Installation of Wireshark, tcpdump, etc. and observe data transferred in client server communication using UDP/TCP and identify the UDP/TCP datagram.	
6.	Installation of root kits and study about the variety of options.	
7.	Demonstrate intrusion detection system using any tool (snort or any others/w).	
8.	Demonstrate how to provide secure data storage, secure data transmission and for creating digital signatures	60
9.	Setup a honey pot and monitor the honeypot on network (KF Sensor)	
10). Perform wireless audit on an access point or a router and decrypt WEP and WPA (Net Stumbler)	
<u>Softwo</u>	are Requirements	
	C, C++, Java or equivalent compiler Gnu PG,Snort.

Course Code	24UDCFSE01	CYBER CRIME AND CYBER LAW	L	T	P	С
Core/elective		Skill Enhancement Course	2	1	0	2
Pre - requisite		Basic knowledge in crime happening in real life				

#### **Course Objectives**

- 1. To learn about various types of computer system used in the cybercrime
- **2.** To know about computer forensic tools
- **3.** To Develop the Understanding of Relationship Between commerce And Cyberspace.
- **4.** To have in Depth Knowledge of Information Technology Act and Legal Frame Work Of Right to Privacy, Data Security and Data Protection.
- 5. Make Study on Various Case Studies on Real Time Crimes

#### **Expected Course Outcomes**

CO1	Understand the different theoretical and cross-disciplinary approaches	
CO2	Examine the assumptions about the behavior and role of offenders and victims in cyberspace, and use basic web-tools to explore behavior on-line	17.1
CO3	Analyze and assess the impact of cybercrime on government, businesses, individuals and society	K1 to K6
CO4	Evaluate the effectiveness of cyber-security, cyber-laws	
CO5	To learn about IT acts and law	

#### K1 – Remember K2 – Understand K3– apply K4- Analyze K5 – evaluate K6- Create

#### UNIT – I CYBER CRIMES 15 Hours

Cyber Crimes, Types of Cybercrime and Financial Crimes, Hacking, Cyberspace, A Brief History of the Internet, Recognizing and Defining CO2puter Crime, Contemporary Crimes, Cyber Laws and Ethics, Law Enforcement Roles and Responses, Incident response, First Responder.

#### UNIT II DIGITAL INVESTIGATION 15 Hours

Digital investigation, Digital crime scene evaluation process, Search & Seizure, Digital Forensic Lab Setup, Dead v/s Live Forensics, Types of Digital Evidences, Chain of Custody, Standard Operating Procedures of cyberForensics, Investigation Guidelines, overview of tools, Slack Space, Virtual paging

UNIT-III	EVIDENCE	15 Hours

Evidence collection form different devices, Write Protect, Write Blockers, Disk Imaging, Data

Recovery, Volatile and Non-Volatile Data Acquisition and Analysis, File Systems and Signatures, Registry Forensics, Email analysis and IP, Stenography, Cryptography, Card crimes.

#### UNIT -IV META DATA ANALYSIS 15 Hours

Metadata Analysis, Browser Forensics, History Extraction, Integrity, Hash Value, Data tampering, File Signature Analysis, Overview of Mobile Forensics, Network Forensics, Cloud Forensics and Malware Analysis.

UNIT- V IT ACT AND LAW 15 Hours

Introduction to IT Act M000, Basic terms and elements of the act. Amendments made in IT Act. Electronic Governance, Certifying Authorities, Digital Signature and Electronic Signature Certificates, Case Study. Legal Procedure to gather information from Outside India.

#### **Learning Objectives**

- 1. To Familiarize with writing of algorithms, fundamentals of C and philosophy of problem solving.
- 2. To Implement different programming constructs and decomposition of problems into functions.
- 3. To Use data flow diagram, Pseudo code to implement solutions.
- 4. To Define and use of arrays with simple applications
- 5. To Understand about operating system and their uses

	Course Outcomes							
	On completion of this course, students will							
CO1	Learn the basic knowledge of computers and analyze the programming languages.							
CO2	acquire the knowledge of the data types and arithmetic operations algorithms and Develop the program by using flowchart and pseudo code.	K1						
CO3	Be able to explain about the various operators.  Explain about the structures. Illustrate the of concept Loops	k6						
CO4	To be able to use Numeric data and character-based data. Analyze about Arrays.							
CO5	Be able to Explain about DFD and Program modules. Creating and reading Files							

## K1 – Remember K2 – Understand K3 – apply K4- Analyze K5 – evaluate K6- Create

UNIT	Contents	No. Of. Hours
I	<b>Introduction:</b> History, characteristics and limitations of Computer. Hardware/ Anatomy of Computer: CPU, Memory, Secondary storage devices, Input Devices and Output devices. Types of Computers: PC, Workstation, Mini computer, Mainframe and Super computer. Software: System software and Application software.	
	<b>Programming Languages:</b> Machine language, Assembly language, Highlevel language, 4GL and 5GL-Features of good programming language. Translators: Interpreters and Compilers.	

II	Data: Data types, Input, Processing of data, Arithmetic Operators, Hierarchy of operations and Output. Different phases in Program Development Cycle (PDC).  Structured Programming: Algorithm: Features of good algorithm, Benefits and drawbacks of algorithm. Flowcharts: Advantages and limitations of flowcharts, when to use flowcharts, flowchart symbols and types of flowcharts. Pseudocode: Writing a pseudocode. Coding, documenting and testing a program: Comment lines and types of errors.  Program design: Modular Programming.	6
Ш	Selection Structures: Relational and Logical Operators-Selecting from Several Alternatives—Applications of Selection Structures. Repetition Structures: Counter—Nested Loops—Applications of Repetition Structures.	
IV	<b>Data:</b> Numeric data and character-based data. <b>arrays:</b> one dimensional array-two dimensional arrays—strings as arrays of characters.	6

V	<b>Data Flow Diagrams:</b> Definition, DFD symbols and types of DFDs. <b>Program Modules:</b> Subprograms-Value and Reference parameters-Scope of a variable-Functions—Recursion. <b>Files:</b> File Basics-Creating and reading a sequential file-Modifying Sequential Files.	6

## SEMESTER – II

Subject	Subject Name	ľy	L	T	P	S	Š	N N		Marks	
Code		Categor					Credits	CIA	<b>Exter</b> nal	Total	
24UDCF02	PYTHON PROGRAMMI NG		5	1	1	IV	4	25	75	100	

#### **Learning Objectives**

- 1. To make students understand the concepts of Python programming.
- 2. To apply the OOP concept in PYTHON programming.
- 3. To impart knowledge on string function about lists
- 4. To make the students learn best practices in PYTHON programming
- 5. To know how to handle files in python

	Course Outcomes	
	On completion of this course, students will	
CO1	To Learn the basics of python, Do simple programs on python, Learn how to use an array.	
CO2	To Develop program using selection statement, Work with Looping and jump statements, Do programs on Loops and jump statements.	K1
CO3	To learn the concept of function, function arguments, Implementing the concept strings in various application, Significance of Modules,	to k6
CO4	To Work with List, tuples and dictionary and Write program using list, Tuples and dictionary.	
CO5	To implement file concept in python, Concept of reading and writing files.	

K1 – Remember K2– Understand K3 – apply K4- Analyze K5 – evaluate K6- Create

UNIT	Contents	No.of Hours
I	Basics of Python Programming: History of Python-Features of Python - Literal-Constants-Variables-Identifiers—Keywords-Built-inDataTypes-OutputStatements—Input Statements-comments—Indentation-Operators-Expressions-Typeconversions. Python Arrays: Defining and Processing Arrays—Array methods.	15
II	Control Statements: Selection/Conditional Branching statements: if, if-else, nested if and if-else statements. Iterative Statements: while loop, for loop, else suite in loop and nested loops. Jump Statements: Break, continue and pass statements.	15
III	Functions: Function Definition – Function Call – Variable Scope and its Lifetime-Return Statement. Function Arguments: Required Arguments, Keyword Arguments, Default Arguments and Variable Length Arguments-Recursion. Python Strings: String Operations-Immutable Strings -Built-in String Methods and Functions-String comparison. Modules: import statement- The Python module—dir() function—Modules and Name space—Defining our own modules.	15
IV	<b>Lists:</b> Creating a list -Access values in List-Updating values in Lists-Nested Lists-Basic list operations-List Methods. Tuples: Creating, Accessing, Updating and Deleting Elements in a tuple – Nested tuples–Difference between lists and tuples <b>Dictionaries:</b> Creating, Accessing, Updating and Deleting Elements in a Dictionary – Dictionary Functions and Methods-Difference between Lists and Dictionaries.	4 =
V	<b>Python File Handling:</b> Types of files in Python - Opening and Closing files-Reading and Writing files: write () and write lines () methods- append () method-read () and read lines () methods-with keyword-Splitting words-File Methods-File Positions-Renaming and deleting files.

#### **Course Objectives:**

- 1. Be able to design the basic Python applications.
- 2. Be able to create loops and decision statements in Python.
- 3. Be able to work with functions and pass arguments in Python.
- 4. Be able to build and package Python modules for reusability.
- 5. Be able to read and write files in Python.

Course Outcomes								
	On completion of this course, students will							
CO1	To implement basic of oops concept in python							
CO2	To apply recursion concepts in python using function.							
CO3	To implement various looping statement conditional statement in python	K1						
CO4	To use various data structure such as list, tuples and dictionaries	to k6						
CO5	To apply various file operation in python.							

## K1 – Remember K2– Understand K3 – apply K4- Analyze K5 – evaluate K6- Create

LAB EXERCISES	Required Hours
1. Program using variables, constants, I/O statements in Python.	
<ul><li>2. Program using Operators in Python.</li><li>3. Program using Conditional Statements.</li></ul>	
4. Program using Loops.	
5. Program using Jump Statements.	
6. Program using Functions.	
7. Program using Recursion.	60
8. Program using Arrays.	00
9. Program using Strings.	
10. Program using Modules.	
11. Program using Lists.	
12. Program using Tuples.	
13. Program using Dictionaries.	
14. Program for File Handling.

Core/Ele	ective	Core	6	1	0	4
Pre - requisite						

#### **Course Objectives**

- 1. Identify and describe different audio technology including different types of circuits, recording and playback devices and multiple video technologies
- **2.** Apply scientific methodology in the investigation of cases where forensic analysis of audio and video evidence is required.
- **3.** Articulate the fundamentals of voice, the physics behind the production of sound, forensic linguistics and phonetics.
- **4.** Demonstrate competency to employ different methods and techniques in the identification and recognition of speakers in forensic cases using multiple methods.
- **5.** To learn the concept of testing and error in speaker identification.

	Course Outcomes	
CO1	On completion of this course, students will Understand the victimology and justice for victim of crime.	
CO2	Analyze the criminological perspectives and its types.	
CO3	Understand the victims of various crime activities	K1
CO4	Analyze the victim services of the various crime and understand the National victim Assistance(NOVA)	to k6
CO5	Understand the importance of audio video evidence in interpretation of a crime	

K1 – Remember K2 – Understand K3 – apply K4- Analyze K5 – evaluate K6- Create

UNIT – I	14 Hours						
Introduction to Forensic Video & Audio Analysis, A basic understanding of forensic video technology,							
Legal concepts regarding Digital Multi-Media Evidence.							
UNIT II	17 Hours						
Digitizing, playback and analysis of video, Application of video evidence in the legal setting, Recovery of							
digital video / Deleted Video & Audio Files recovery, Scientific methodology of forensic video analysis.							
UNIT III							
Exporting evidence as video or still image files, Video and Audio Evidence handling proced	ures, Digital						
image processing.

Course Code	24UDCFSE 03	VICTIMOLOGY	L	Т	P	С
Core/Elective			6	1	0	4
Pre - requisite						

#### **Course Objectives**

- **1.** To familiarize the students of Criminology with the functioning of the various institutions of the criminal justice system and juvenile justice system.
- 2. To increase familiarity with basic terms, concepts, and ideas in Victimology in Spanish and English.
- **3.** To Gain a thorough knowledge of the core literature and debates that make up the discipline of Victimology.
- **4.** To understand methods to measure victimization.
- **5.** To develop an understanding of the interactions between victims and offenders.

Expected Course Outcomes							
CO1	Understand the victimology and justice for victim of crime.						
CO2	Analyze the criminological perspectives and its types.	K1					
CO3	Understand the victims of various crime activities						
CO4	Analyze the victim services of the various crime and understand the National victim						
CO5	To understand criminal Justice System						

K1 – Remember K2 – Understand K3 – apply K4- Analyze K5 – evaluate K6- Create

UNIT – I VICTIMOLOGY 14 Hours

Basics Victimology: Basic Concepts - Historical development of Victimology. Meaning and Definition of victim. National and International concern for victims of crime – UN Amnesty International - UN Declaration of Basic Principles of Justice for Victims of Crime and Abuse of Power, 1985. Handbook of Justice for Victims, 1998. Guide for Policy Makers, 1998. USA - Patterns of Criminal Victimization - Role of victims in Criminal Occurrence, Victim – Offender relationship. Impact of Victimization – Physical and financial impact.

#### UNIT II PERSPECTIVES ON VICTIMIZATION 17 Hours

Criminological perspectives: repeat victimization, routine activities, lifestyle exposure, fear of crime, victimization surveys including cost of crime. Psychological perspectives: Effects of crime on victims and the way victims are viewed. Legal perspectives: Rights of the Crime Victims – Victim in the criminal Justice System, Need and Significance of Victim oriented Justice System. Sociological perspectives: analysis of social reaction to crime and victimization over the Ages, the importance of feminist and critical theory and the development of the victim Movement and victim advocacy.

#### UNIT-III INDIVIDUAL AND MASS VICTIMIZATION 16 Hours

Victims of traditional crime. Women victims - Dowry, battered women, Rape and other kinds of Sexual harassment - Child abuse. Cyber Crime Victimization of Women and Children. Trafficking in women and children. Victims of abuse of power, Genocide, Crimes against humanity, Internally Displaced persons, Victims of War - Child Soldiers, Refugees

#### UNIT -IV CRIMINAL JUSTICE SYSTEM AND VICTIMS 14 Hours

CJS and victim relationship: Collaborator or evidence - Victim & Police: Lodging of FIR & recording of statement - Deposition & cross-examination in courts. – Secondary Victimization by the criminal justice system and the society– Role of judiciary in Justice for victims. Creating awareness among the

criminal justice professionals and the public on victim issues.

UNIT- V VICTIM ASSISTANCE 14 Hours

Alternative services for crime victims – victims support Services in the developed countries – Victim support services in India. Types of assistance. Offender Restitution Programs – Victim Witness Programs – Crisis Intervention – Victim Advocacy – Introduction to Restorative Justice and Principles of Restorative Justice – Victim compensation and restitution. Compensation for victims of crime: Indian Scenario. Advantages and disadvantages of Criminal Justice – based victim support schemes-All Women Police Stations- .Role of NGOs and Professional associations, ISV, WSV, Child Line, One Stop Shop and National Organization for Victim Assistance (NOVA).

#### **SEMESTER-III**

Course Code	23UDCF03	FORENSIC BIOLOGY AND SEROLOGY	L	Т	P	С
Core/elective/S	Supportive		5	1	0	4
Pre - req	uisite					

#### **Course Objectives**

- 1. To understand of biological and serological evidence.
- **2.** To understand the Blood sampling evidence in accidents, murder cases, and violent crime investigations
- 3. To equip with skills and knowledge about various techniques used to perform biological evidence analysis,
- 4. To learn how to analyze blood, semen, and other biological samples and understand the principles of DNA analysis,
- 5. To open doors to several career opportunities, from forensic labs to crime scene investigations.

#### **Expected Course Outcomes** Understand the general concepts and definitions used in Forensic Biology and **CO1** serology. Understand the role of Forensic biologists in crime scene investigation CO₂ **K**1 Examine the biological evidence with laboratory handling procedures **CO3** to k6 Analyze the Importance of Forensic Entomology and Wildlife Forensics **CO4** Work with public and private sector forensic labs, as an instructor with forensic institutes, or CO₅ set up your own lab.

#### K1 – Remember K2 – Understand K3 – apply K4- Analyze K5 – evaluate K6- Create

Nature and importance of biological evidence. Collection and preservation of common biological evidences. Significance and origin of hair evidence. Transfer, persistence and recovery of hair evidence. Structure of human hair. Comparison of hair samples. Morphology and biochemistry of human hair. Comparison of human and animal hair. Importance of pollen grains, wood and diatoms in

Forensic science.

Composition and functions of blood. Collection and preservation of blood evidence. Distinction between human and non-human blood- Origin determination. Determination of blood groups. Forensic characterization of bloodstains. Typing of dried stains. Blood enzymes and proteins. Semen. Forensic significance of semen. Composition, functions and morphology of spermatozoa. Collection, evaluation and tests for identification of semen. Individualization on the basis of semen examination.

Composition, functions and Forensic significance of saliva, sweat, urine, fecal stains, milk and vomit. Tests for their identifications.

UNIT-III BLOODSTAIN 16 Hours

Bloodstain characteristics. Impact bloodstain patterns. Cast -off bloodstain patterns. Projected bloodstain patterns. Contact bloodstain patterns. Blood trails. Bloodstain drying times. Documentation of bloodstain pattern evidence. Crime scene reconstruction with the aid of bloodstain pattern analysis.

UNIT - IV ENTOMOLOGY 14 Hours

Basics of Forensic entomology. Insects of Forensic importance. Collection of entomological evidence during death investigations.

 UNIT-V
 SIGNIFICANCE OF WILDLIFE FORENSICS
 14 Hours

 Significance of Wildlife Forensics. Organizations involved. IUCN Red ListConservation Status

Extinct, Extinct in Wild, Critically Endangered, Endangered, Vulnerable, Near Threatened, Least Concern. List of protected species in India. Illegal trading of wildlife items. Identification of Physical evidences pertaining to wildlife crime

23UDCFE03	CRIMINOLOGY AND JUSTICE	Elect	5	-	1	1	3	25	75	100				

#### **Learning Objectives**

- 1. Explain the history, origin, scope and definition of crime, its relevance in the present scenario and its relation to other social sciences.
- 2. Understand the interdisciplinary nature of Criminology and the role of criminologists in the criminal justice system.
- 3. Describe the different schools of Criminology and critically identify the contribution of each school of thought for the growth and development of Criminology.
- 4. Describe the typologies of crime including crimes against body, crimes against property, contemporary crimes like cybercrime, white collar crime, etc.
- 5. Apply the concept of crime and criminal behaviour to understand juvenile delinquency.
- 6. Describe typologies of criminal behaviour like dossier criminal, habitual offenders, professional criminals, etc.

Course Outcomes					
	On completion of this course, students will				
CO1	Keep pace with emerging developments in criminal justice;				
CO2	Create well-informed citizens and professionals in the area of criminal justice; and	K1 To			
CO3	Enhance the competencies of the professionals already working in the area of criminal justice system.	K6			
CO4	Apply the various Authentication schemes to simulate different applications.				
CO5	Understand standards of various Security practices and System security				

#### K1 – Remember K2 – Understand K3 – apply K4- Analyze K5 – evaluate K6- Create

UNIT	Contents	No. Of. Hours
I	Introduction to Crime	15
	Crime – Definitions – Historical perspectives – Nature and origin – Elements of crime –Deviance, social context of deviance and delinquency – Typologies of crime and criminal behaviour	

II	Unit II: Introduction to Criminology	15
	Criminology and its definition – Development of Criminology – Nature and scope – Criminology and its relations with other social sciences – Criminology"s interdisciplinary nature	13
III	Unit III: Schools of Criminology	15
	Pre-classical school – Classical school – Neo-classical school – Positive school – Biological positivism – Cartographic school	
IV	Sociological Explanation of Criminal Behaviour	
	Differential association theory (Edwin Sutherland) – Social bond theory (Travis Hirschi) –Subculture of violence (Wolfgang and Ferracuti) – Sub-cultural theory (Albert Cohen) – Law of imitation (Tarde) – Techniques of neutralization (Matza and Sykes) – Feminist criminology	15
V	Critical Explanation of Criminal Behaviour	
	Historical materialism, mode of production, alienation and class struggle (Karl Marx) – Early Marxist views of crime (William Bonger) – Lower proletariat, class, state and crime (Richard Quinney) – Analysis of Criminal Justice System (William Chambliss) – Multiple factor approach to crime causation	15
	TOTAL HOURS	75

### **Learning Objectives**

- 1. To understand the fundamentals of Cryptography
- 2. To acquire knowledge on standard algorithms used to provide confidentiality, integrity and authenticity.
- 3. To understand the various key distribution and management schemes.
- 4. To understand how to deploy encryption techniques to secure data in transit across data networks
- 5. To design security applications in the field of Information technology

Course Outcomes						
On comple	tion of this course, students will					
CO1	Analyze the vulnerabilities in any computing system and hence be able to design a security solution.					
CO2	Apply the different cryptographic cryptographic algorithms Operations of symmetric	<b>K</b> 1				
CO3	Apply the different cryptographic cryptography Operations of public key	To K6				
CO4	Apply the various Authentication schemes to simulate different applications.					
CO5	Understand standards various Security practices and System security

### **Learning Objectives**

- Understand basic concepts and terminology of information technology.
- Have a basic understanding of personal computers and their operation
   Be able to identify data storage and its usage
   Get great knowledge of software and its functionalities
   Understand about operating system and their uses

Course Outcomes						
	On completion of this course, students will					
CO1	Learn the basics of computer, Construct the structure of the required things in computer, learn how to use it.					
CO2	Develop organizational structure using for the devices present currently under input or output unit.	K1				
CO3	Concept of storing data in computer using two headers namely RAM and ROM with different types of ROM with advancement in storage basis.	To K6				
CO4	Work with different software, Write program in the software and applications of software.					
CO5	Usage of Operating system in information technology which really acts as a interpreter between software and hardware.					

# K1 – Remember K2 – Understand K3 – apply K4- Analyze K5 – evaluate K6- Create

UNIT	Contents	No. Of.Ho urs
I	Introduction to Computers: Introduction, Definition, Characteristics of computer, Evolution of Computer, Block Diagram Of a computer, Generations of Computer, Classification of Computers, Applications of Computer, Capabilities and limitations of computer	6
П	Basic Computer Organization: Role of I/O devices in a computer system. Input Units: Keyboard, Terminals and its types. Pointing Devices, Scanners and its types, Voice Recognition Systems, Vision Input System, Touch Screen, Output Units: Monitors and its types. Printers: Impact Printers and its types. On Impact Printers and its types, Plotters, types of plotters, Sound cards, Speakers.	6

III	Storage Fundamentals: Primary Vs Secondary Storage, Data storage & retrieval methods. Primary Storage: RAM ROM, PROM, EPROM, EEPROM. Secondary Storage: Magnetic Tapes, Magnetic Disks. Cartridge tape, hard disks, Floppy disks Optical Disks, Compact Disks, Zip Drive, Flash Drives	6
IV	Software: Software and its needs, Types of S/W. System Software: Operating System, Utility Programs Programming Language: Machine Language, Assembly Language, High Level Language their Advantages & disadvantages. Application S/W and its types: Word Processing, Spreadsheet"s Presentation, Graphics, DBMS s/w	6
V	Operating System: Functions, Measuring System Performance, Assemblers, Compilers and Interpreters. Batch Processing, Multi programming, Multi-Tasking, Multi processing, Time Sharing, DOS, Windows, Unix/Linux.	6

Core/Elective	/Supportive	Core: 8	5	1	0	5	
Pre - re	quisite	Basic knowledge in the chemistry.					

- 1. To understand and identification of informed Medico-legal responsibility
- 2. To Describe the various legal procedures pertaining to medical practice and pertaining to human body
- 3. To Depose efficiently in court of law for medico legal cases
- 4. To Identify the legal aspects of medical practices
- 5. To List the duties, responsibilities and rights of a registered medical practitioner

#### **Expected Course Outcomes** Understand about the first responding officer roles and responsibilities. CO₁ To analyze about death scenes to ascertaining whether the crime was staged to appear CO₂ as suicide, accident or homicide. Compare of External and internal autopsy findings in determining medico legal aspects **K**1 CO₃ To of death. K6 To construct the report of giving medical legal answers of various modes of deaths CO₄ To Explain the history of Forensic Medicine CO₅

#### K1 – Remember K2 – Understand K3 – apply K4- Analyze K5 – evaluate K6- Create

### UNIT – I DEATH INVESTIGATIONS 14 Hours

Fundamental aspects and scope of forensic medicine. Approaching the crime scene of death. Obtaining first hand information from the caller. Rendering medical assistance to the victim, if alive. Protecting life. Recording dying declaration. Identifying witnesses and, if possible, suspect. Interviewing onlookers and segregating possible witnesses. Suspect in custody – initial interrogation and searching for evidence.

### UNIT II ROLE OF FORENSIC MEDICINE & SUBMISSION PROCEDURE 15 Hours

Role of Forensic Medicine in court — Meaning and Scope Inquest Nature and Powers of Criminal Courts in India Procedure of calling a witness to a court. Procedure in court: Oath Examination — in — chief, Cross Examination and Re-Examination Medical Evidence Medico legal Reports and Dying declaration Doctor as medical/ Expert witness

UNIT-III AUTOPSY 15 Hours

Autopsy Medical Autopsy: Introduction and objectives, rules for medico legal autopsy, external and internal examination of body, collection of Ante-mortem and post-mortem samples, autopsy report

TINITE IX	THANATOLOGY	16
UNIT -IV	THANATOLOGY	Hours

Definition of death. Types of death(somatic and molecular). Medico-legal aspects of death – Causes of death such as asphyxia(strangulation, hanging, drowning etc), electrocution, thermal trauma, heat burns, starvation, natural death, sudden death etc. Changes after death (immediate, early and late changes) and Determination of time since death.

WOUNDS AND INJURIES	15 Hours
	WOUNDS AND INJURIES

Definition of wounds, injuries, and laws governing them. Types and classification of injuries. Ante mortem and post mortem injuries. Aging of injuries. Artificial injuries. Difference between suicidal, homicidal and accidental injuries.

Course Code	23UDCFP0 4	FORENSIC MEDICINE LAB	L	Т	P	С
Core/elective/	Supportive	Elective 4: Generic/ Discipline	-	-	3	3
Pre - rec	quisite	Basic knowledge in the crime scene and marks in death				

- 1. To learn about the examination and assessment of individuals who have suspected, injured, or killed by external influence.
- 2. To Perform and explain crime scene security, approaching a scene, searches and documentation of evidence
- 3. To Perform basic photography as it is related to crime scenes
- 4. To Perform latent print recovery using different processing methodology and documentation
- 5. To Perform tasks related to trace evidence identification and recovery

	Expected Course Outcomes						
CO1	nderstand the cause of death						
CO2	Create a checklist in the crime scene						
CO3	Analyze the marks in the death scene						
CO4	Create a questionnaire for first responder in the crime spot	K6					
CO5	Explain Growth of Forensic Medicine & Toxicology						

#### K1 – Remember K2 – Understand K3 – apply K4- Analyze K5 – evaluate K6- Create

- 1. To design a questionnaire for the first responder to the death scene.
- 2. To design a protocol to deal with the media at the crime scene.
- 3. To design a checklist for the forensic scientists at the death scene.
- 4. To design a canvass form giving description of an unidentified victim.
- 5. To analyze and preserve bite marks.
- 6. To study different stages of changes after death
- 7. To identify shooter on the basis of firearm injuries
- 8. To identify different causes of death
- 9. To study post-mortem findings of a cadaver

### **SEMESTER-V**

Course Code	23UDCF05	LINUX SYSTEM ADMINISTRATION	L	T	P	С
Core/Elective/	Supportive Supportive	Core:	5	1	0	5
Pre - requisite						

### **Course Objectives**

- 1. To introduce the concepts of Linux operating system
- 2. To explain the various constructs associated with Linux
- 3. To create and managing users, creating and maintaining file systems,
- 4. To know about various security measures and performing software installation and package management.
- 5. To learn about Configuring file sharing with NFS

Expected Course Outcomes				
CO1	Illustrate the various directories and file commands in Linux			
CO2	Explain the methods of securing files in Linux	K1		
CO3	Apply the various commands of Linux	TO		
CO4	Performing maintenance on file systems	K6		
CO5	Identifying and managing Linux processes			
K1 – Remember K2 – Understand K3 – apply K4- Analyze K5 – evaluate K6- Create				

UNIT – I		INTRODUCTION TO LINUX	15 Hours		
Introduction	to LINUX	Operating System: Introduction - The LINUX Operating System - Bas	sic		
commands i	n Linux				
UNIT II		MANAGING FILES AND DIRECTORIES	15 Hours		
Managing Files and Directories: Introduction – Directory Commands in LINUX – File Commands in LINUX. Creating files using the vi editor: Text editors – The vi editor. Managing Documents: Locating files in LINUX – Standard files – Redirection – Filters – Pipes.					
<b>UNIT-III</b>		SHELL SCRIPT	15 Hours		
access perm	issions. Aut	K: File access permissions – viewing File access permissions – Changi comating Tasks using Shell Scripts: Introduction – Variables- Local and Substitution.	•		
		and Substitution.			
UNIT -IV	7	CONDITIONAL & LOOPING STATEMENTS	15 Hours		
Using Cond Managing re	itional Exec		ruct. astruct –		

Linux Kernel- Kernel Components- compiling a kernel- Customizing a kernel – system startup-	
Customizing the boot process-System Recovery

- 2. To evaluate the concept of shell scripting programs by using an AWK and SED commands
- 3. To demonstrate the basic knowledge of Linux commands and file handling utilities by using Linux shell environment
- 4. To Understanding the components for setting up a LAMP server
- 5. To Implementing basic security measures

	Expected Course Outcomes	
CO1	Study all the Basic commands.	
CO2	Practice the usage of shell script for system configuration.	
CO3	Apply various effects piping and redirection process.	K1 TO
CO4	Performing backups and restoration of files	K6
CO5	Working with system log files	
	K1 – Remember K2 – Understand K3 – apply K4- Analyze K5 – evaluate K6- Create	
	TITLE	
1	Write a shell script to stimulate the file commands: rm, cp, cat, mv, cmp, wc, split, diff	
2	Write a shell script to show the following system configuration: i) Currently logged user and his log name. ii) Current shell, home directory, Operating System type, current Path setting, current working directory. iii) Show currently logged number of users, show all available shells iv) Show CPU information like processor type, speed v) Show memory information	5
3	Write a Shell Script to implement the following: pipes, Redirection and tee commands.	
4	Write a Shell script for displaying current date, user name, file listing and directories be getting user choice	у
5	Write a Shell script to implement the filter commands.	
6	Write a Shell script to remove the files which has file size as zero bytes.	
7	Write a Shell script to find the sum of the individual digits of a given number	
8	Write a Shell script to find the greatest among the given set of numbers using command line arguments.	
9	Write a Shell script for palindrome checking.

Course Code	23UDCF06	TOOLS AND TECHNIQUES FOR DIGITAL AND CYBER FORENSIC	L	Т	P	С
Core/elective/Supportive		Elective - I	5	1	0	4
Pre - requisite		Basic knowledge about the crime and law.				

- 1. To Explain the origins of forensic science
- 2. To Explain the difference between scientific conclusions and legal decision-making
- 3. To Explain the role of digital forensics and the relationship of digital forensics to traditional forensic science, traditional science and the appropriate use of scientific methods
- 4. To Outline a range of situations where digital forensics may be applicable
- 5. To Identify and explain at least three current issues in the practice of digital forensic investigations.

Expected Course Outcomes					
CO1	Acquire knowledge of various digital forensic tools				
CO2	Interpret security issues in Information communication Technology (ICT) world, and apply digital forensic tools for security and investigations.	K1			
CO3	Achieve adequate perspectives of digital forensic investigation in various applications devices like Windows/Unix system, mobile, email etc	TO K6			
CO4	Generate legal evidences and supporting investigation reports.				
CO5	Outline a range of situations where digital forensics may be applicable				
	K1 – Remember K2 – Understand K3 – apply K4- Analyze K5 – evaluate K6- Create	2			

UNIT – I Digital Investigation 14 Hours

Introduction 1.1 Objectives 1.2 Why Investigate?-Internet Usage Exceeds Norms -Inappropriate E-mail -Theft of Infonnation-Violation of Security Parameters -Intellectual Property Infraction - Electronic Tampering -Establishing a Basis or Justification to Investigate- Determine the Impact of Incident -Whom to Call/Contact- If You are the Auditor Investigator - Understanding Digital Forensics -Applying Scientific Methods to Digital Forensics - Digital Investigation and Evidence - Digital Crime Scene Investigation Process -General Guidelines-Data Analysis - Overview of Toolkits

UNIT II Data Acquisition and Information Gathering 14 Hours

Data Acquisition - Why Collect Evidence? - Collection Options -Obstacles -Types of Evidence -The Rules of Evidence -Volatile Evidence -General Procedure -Collecting and Archiving -Methods of Collection -Artifacts-Collection Steps

UNIT-III Forensic Examination of Systems 15 Hours

Search Techniques - Manual Browsing - Keyword Search - Regular Expression Search - Approximate Matching Search - Custom Search - Search Modifications - Reconstruction of Events - Log File Analysis - Determining Temporal Order with Timestamps - File System Analysis - Detection of Deleted Files - File Attributes Analysis - Restoration of a Directory from a Backup - Exploit

compilation, Running and Deletion - Moving a File - Reconstruction of Deleted Files - Keyword Search - Preparation - Creating Your Master List - Preliminary Evaluation and Client Input - Competitive Analysis - Recursive Term Expansion - Keyword Research Tools - Keyword Analysis: Interpreting the Results

UNIT -	Data Recovery	16 Hours
IV	Data Recovery	10 110015

Salvaging Deleted Data - Deleted Files and Folders - File Carving - Handling Special Files - Extracting Embedded Metadata - Using Data From Data Files - File Storage Media - File Systems - Other Data on Media - Collecting Files - Copying Files from Media - Data File Integrity - File Modification, Access and Creation Times - Examining Data Files - Locating the Files - Extracting the Data Encryption and Steganography

UNIT- V	Forensic Examination of Network Devices	16 Hours
---------	-----------------------------------------	----------

Intrusion Detection Systems - Definition of Intrusion Detection - Vulnerability Assessment - Network Security Management - Trust and Intrusion Detection - System Security Management: A Process view - Intrusion Detection Systems and Related Technologies - Firewall Security Systems - Firewall - Reasons for Firewalls - Need for Firewalls - Benefits of Firewalls-Why Firewalls aren't Enough? - Controlled Access to Site Systems - Concentrated Security - Routers - Initial Steps - Common Router Attacks - Procedure for Collecting Volatile and Non-volatile Data - Switches - Switch Concepts - Advantages over Hubs - Volatile and Non-volatile Data Collection Procedures - Wireless Access Points.

Course Code	23UDCFE06	DNA TYPING IN FORENSIC	L	Т	P	С
Core/electiv	e/Supportive	Elective - I	5	1	0	4
Pre - requisite		Basic knowledge about the crime and law.				
	•	Course Objectives	•		•	

- 1. After studying this paper, the students will know.
- 2. The basic principle of DNA analysis.
- 3. The forensic significance of DNA typing.
- 4. The importance of short tandem repeats and restriction fragment length polymorphism in DNA technique.
- 5. Role of DNA typing in parentage testing.

	<b>Expected Course Outcomes</b>	
CO1	Understand about the code of criminal procedure with hierarchy of judiciary	
CO2	Remember the constitution of India and perspectives	K1
CO3	To understand the concept of bail and Fair trial	То
CO4	Analyze the evidence of the criminal cases with cross examination	K6
CO5	Point out the evidence and ask punished based the evidence	

#### K1 – Remember K2 – Understand K3 – apply K4- Analyze K5 – evaluate K6- Create

UNIT – I 15 Hours

DNA as biological blueprint of life - Extraction of DNA for analysis - Quantitation of BNA – yield gel quantitation and slot blot quantitation. Mitochondrial DNA – sequence analysis.

UNIT II 15 Hours

Collection of specimens. Polymerase chain reaction – historical perspective, sequence polymorphisms, individualization of evidence. Short tandem repeats (STR) – role of fluorescent dyes, nature of STR loci. Restriction fragment length polymorphism (RFLP) – genetic markers used in RFLP, typing procedure and interpretation of results. Touch DNA.

UNIT-III 15 Hours

Principles of heredity. Genetics of paternity. DNA testing in disputed paternity. Mendelian laws of parentage testing. Mathematical basis of parentage identification. Missing body cases. Reference populations and databases.

UNIT -IV 15 Hours

Allele frequency determination. Hardy-Weinberg law. Probability determination in a population database

UNIT- V 15 Hours

To carry out the separation of amino acids by thin layer chromatography. To carry out extraction of DNA from body fluids. To preparation of gel plates for electrophoresis. To carry out electrophoresis for separation of enzymes. To prepare a report on the role of DNA typing in solving paternity disputes.

Core/elective	e/Supportive	Elective - I	5	1	0	4
Pre - requisite		Basic knowledge about the crime and law.				

- 1. To under the Phenomenon knowledge about crime with several disciplines from several perspectives and methodologies.
- 2. To Understand about the code of criminal procedure with hierarchy of judiciary
- 3. To Remember the constitution of India and perspectives
- 4. To understand the concept of bail and Fair trial
- 5. To Analyze the evidence of the criminal cases with cross examination

### **Expected Course Outcomes**

CO1	Understand about the code of criminal procedure with hierarchy of judiciary	
CO2	Remember the constitution of India and perspectives	K1
CO3	To understand the concept of bail and Fair trial	То
CO4	Analyze the evidence of the criminal cases with cross examination	K6
CO5	Point out the evidence and ask punished based the evidence	

### K1 – Remember K2 – Understand K3 – apply K4- Analyze K5 – evaluate K6- Create

### UNIT – I ORIGIN 14 Hours

Origin of Criminal Procedure, definitions under Code of Criminal Procedure, 1973 – Hierarchical organization of judiciary in India – Constitution of criminal courts and officers – Jurisdiction and powers of criminal courts –Court of Sessions – Judicial magistrates – Executive magistrates – Public Prosecutors – Informal courts (NyayaPanchayat and LokAdalats)

### UNIT II PRE-TRIAL PROCESSES 13 Hours

Constitutional perspectives: Organization of police, prosecutor and defense counsel – Arrest: Distinction between cognizable and non-cognizable offences – Warrant and summons – Absconder status – Rights of arrested persons under Cr.P.C and Article 22 (2) of the Constitution of India – Search: General principles of search, search with and without warrant and police search during investigation – Seizure – Constitutional aspects of validity of search and seizure proceedings – Security: Nature and procedures

#### UNIT-III TRIAL PROCESSES 14 Hours

Commencement of proceedings: Complaint, inquiry, framing of charges, form and content of charge – Bail: General principles and cancellation of bails – Anticipatory bail – Preliminary pleas to bar trial – Remand – Jurisdiction – Time limitations – Pleas of autrefois acquit and autrefois convict – Fair trial – Concept of fair trial – Presumption of innocence – Venue of trial – Constitutional interpretation of Article 21 as a right to speedy trial – Trial before a Court of Session: Procedural steps and substantiate rights – Accusatorial and inquisitorial systems – Summary trial

# UNIT - EVIDENCE IN CRIMINAL CASES 16 Hours

Definitions – Concepts – Fact in issue – Relevant fact – Evidence: Proved, disproved, 35 admissibility and relevancy – Relevant evidence in statement form: Admission confessions, dying declarations and expert opinions – Conspiracy evidence – Approver evidence – Presumptions of law – Presumptions of fact – Burden of proof Examination in-chief – Cross-examination, Andre-examination – Impeaching the credit of the witness.

#### UNIT- V JUDGEMENTS 15 Hours

Judgements post-conviction orders in lieu of punishment – Appeals – Reference and revisions— Transfer of criminal cases – Suspension of sentence – Execution – Remission – Commutation of

senter	nce – Disposal of property – Acquittal – Bonds – Fine – Imprisonment

23UDCFE09	BIOMETRICS		2	-	-	-	2	2	25	75	100

- Identify the various biometric technologies.
   Design of biometric recognition.
   Develop simple applications for privacy
   Understand the need of biometric in the society
   Understand the scope of biometric techniques

	Course Outcomes	
	On completion of this course, students will;	
CO1	To understand the basic concepts and the functionality of The Bio metrics, Face Bio metrics, Types, Architecture and Applications.	
CO2	To know the concepts Retina and Iris Bio metrics and Vein and Fingerprint Bio metrics.	K1 TC
CO3	To analyses the Privacy Enhancement and Multi modal Bio metrics.	Ke
CO4	To get analytical idea on Watermarking Techniques	
CO5	To Gain knowledge on Future scope of Biometrics, and Study of various Biometric Techniques.	

	contents	
UNITI	Introduction: What is Biometrics, History Types of biometric Traits, General architecture of biometric systems, Basic working of biometric matching, Biometric system error and performance measures, Design of biometric system, Applications of biometrics, Biometrics versus traditional authentication methods.  Face Biometrics: Introduction, Background of Face Recognition, Design of Face Recognition System Neural Network for Face Recognition, Face Detection Video Sequences, Challenges in Face Biometrics, .7 Face Recognition Methods, Advantages and Disadvantages	

UNITII	Retina and Iris Biometrics: Introduction, Performance of Biometrics, Design of Retina Biometrics, Design of Iris Recognition System, Iris Segmentation Method, Determination of Iris Region, Determination of Iris Region, Applications of Iris Biometrics, Advantages and Disadvantages. Vein and Fingerprint Biometrics: Introduction, Biometrics Using Vein Pattern of Palm, Fingerprint Biometrics, Fingerprint Recognition System, Minutiae Extraction, Fingerprint Indexing, Experimental Results, Advantages and Disadvantages.	6
UNITIII	Privacy Enhancement Using Biometrics: Introduction, Privacy Concerns Associated with Biometric Deployments, Identity and Privacy, Privacy Concerns, Biometrics with Privacy Enhancement, Comparison of Various Biometrics in Terms of Privacy, Soft Biometrics. Multimodal Biometrics: Introduction to Multimodal Biometrics, Basic Architecture of Multimodal Biometrics, Multimodal Biometrics Using Face and Ear, Characteristics and Advantages of Multimodal Biometrics, Characteristics and Advantages of Multimodal Biometrics.	6
UNITIV	Watermarking Techniques: Introduction, Data Hiding Methods, Basic Framework of Watermarking, Classification of Watermarking, Applications of Watermarking, Attacks on Watermarks, Performance Evaluation, Characteristics of Watermarks, General Watermarking Process, Image Watermarking Techniques, Watermarking Algorithm, Experimental Results, Effect of Attacks on Watermarking Techniques, Attacks on Spatial Domain Watermarking.	6
UNITV	Scope and Future: Scope and Future Market of Biometrics, Biometric Technologies, Applications of Biometrics, Biometrics and Information Technology Infrastructure, Role of Biometrics in Enterprise Security, Role of Biometrics in Border Security, Smart Card Technology and Biometrics, Radio Frequency Identification (RFID) Biometrics, DNA Biometrics, Comparative Study of Various Biometric Techniques.  Biometric Standards: Introduction Standard Development Organizations, Application Programming Interface (API), Information Security and Biometric Standards, Biometric Template Interoperability	6

Course Code	23UDCFSE0 7	FIELD VISIT: - CRIME INVESTIGATION WITH POLICE DEPARTMENT	L	T	P	С
Core/elective	/Supportive	Supportive	-	-	•	2
Pre – re	quisite	Basic skills about the crime scene				

- 1. To understand real scenario of the crime.
- 2. To know the investigation procedure.
- 3. To beginning of the course covers the basic issues of criminal investigation which involves organization, effectiveness, history, and design.
- 4. To cover issues that is unique to the investigation of particular types of crimes.
- 5. To focusing on the documentation of evidence, presentation and outcomes of evidence in court, and the future of criminal investigations.

Expected Course Outcomes							
CO1	Understand the crime scene procedure to collect the evidence.						
CO2	Evaluate the evidence found from the crime spot.						
CO3							
CO4	Create a questionnaire as per the crime and evidence	ТО					
CO5	Understand the threats to not properly effectively, efficiently, and legally conducting criminal	K6					
003	investigations						

#### K1 – Remember K2 – Understand K3 – apply K4- Analyze K5 – evaluate K6- Create

#### **AIM OF THE COURSE**

The purpose of this field visit (core paper) is to bridge the theoretical fundamentals with that of actual practice and to inculcate a spirit of inquiry & research rigor to investigate the shades that go into the working place. Apart from adapting as team investigation, students are expected to gather, filter the required information and prepare the report in a standardized format of the case.

#### **PROCESS**

Colleges are encouraged to institute MoU/ collaborative initiative with firms organization/ government agencies in their juristic / state to get the consent and to make the crime spot visit more purposeful. Every student should do the file visit in a group manner not exceeding five, shall undergo a 2 hours per a week in any police station [city, location to be specified by the respective college] of his/her choice during 6th semester. In case of insufficient hours, college level adjustments can be made to facilitate the student's on training. Prior permission may be obtained from the organization in advance by the students concerned and information shall be passed onto the colleges thus enabling the training supervision by the concerned faculties authorized by the college. Monthly electronic reporting should be obtained to ensure coherent and comprehensive in the progression of the field visit.

A final report [Field Visit Record – FVR] contains the following things.

- 1. Crime basic details [person details, location mention in xxxxx, yyyy format]
- 2. Evidence [which found in the crime spot]
- 3. Methodology [procedure adopting to prove the evidence]

4. Questionnaire preparation [for investigation]

The report shall be prepared not exceeding 30 [A4] pages [pre-printed record designed for this purpose].

#### INTERNAL PROCEDURE

- Compliance of the procedure (permission seeking from college and police station, informing in advance, monthly reporting and FVR submission) 15 marks
- Structure and Monthly review of FVR 10 marks

#### **EVALUATION PROCEDURE**

- There shall be a university-approved comprehensive viva-voce examination at the end of fifth semester. Students shall maintain a [Field Visit Record ITR] individually for the purpose of the oral examinations.
- FVR shall also be evaluated jointly internal with an external examiner during the viva-voce examination.
- The total mark of 50 for the skill enhancing field visit (core subjects)shall be divided between internal and external evaluations and it is 25 and 25 marks respectively.

Course Code	23UDCF08	CYBER CRIME INVESTIGATION AND DIGITAL FORENSICS	L	T	P	C		
Core/elective	/Supportive		2	1	0	2		
Pre – re	equisite	Basic knowledge about computer system						
Course Objectives								

- 1. To provide a knowledge about computer system architecture.
- 2. To provide a knowledge about investigation with digital data.
- 3. To Understand the case studies at the beginning of each chapter that can be used to analyze
- 4. How evidence is (or could be) used to establish proof and to evaluate investigative procedures;
- 5. Identify strengths and weaknesses of all major forms of evidence, from DNA to other forms of Physical evidence to eyewitness identifications to confessions to behavioral evidence and everything in between;

#### **Expected Course Outcomes** CO₁ Remember about computer structure **K**1 CO₂ Understand architecture of the file storage in the computer system. TO CO3 Examine the computer crimes and security firewall K6 CO₄ Analyze the seized material data. CO₅ Create a questionnaire as per the crime and evidence

#### K1 – Remember K2 – Understand K3 – apply K4- Analyze K5 – evaluate K6- Create

#### UNIT – I BASIC OF COMPUTER SYSTEM 15 Hours

Fundamentals and Concepts Fundamentals of computers Hardware and accessories – development of hard disk, physical construction, CHS and LBA addressing, encoding methods and formats. Memory and processor, Methods of storing data, Operating system, Software. Introduction to network, LAN, WAN and MAN.

#### UNIT II **COMPUTER CRIMES** 15 Hours

Computer Crimes definition and types of computer crimes, Distinction between computer crimes and conventional crimes, Reasons for commission of computer crimes, Breaching security and operation of digital systems.

<b>UNIT-III</b>	COMPUTER VIRUS, AND COMPUTER WORM	15 Hours
-----------------	-----------------------------------	----------

Trojan horse, trap door, super zapping, logic bombs. Types of computer crimes – computer stalking,

pornography, hacking, crimes related to intellectual property rights, computer terrorism, hate speech, private and national security in cyber space. An overview of hacking, spamming, phishing and stalking.

# UNIT -IV COMPUTER FORENSICS 15 Hours

Computer Forensics Investigations: Seizure of suspected computer, Preparation required prior to seizure, Protocol to be taken at the scene, Extraction of information from the hard disk.

### UNIT- V INVESTIGATION METHODS

15 Hours

Treatment of exhibits. Creating bit stream of the original media, Collection and seizure of magnetic media, Legal and privacy issues, Examining forensically sterile media, Restoration of deleted files, Password cracking and E-mail tracking, Encryption and decryption methods, Tracking users.

-----------------------	-----------------------	---	---	---	---	--

Core/elective/Supportive		-	1	4	3
Pre - requisite	Basic knowledge about computers and hardware				
	Carrage Objections	•	•		

- 1. To provide knowledge about cyber forensic investigation process, incident response process, forensic
- 2. To Discuss the rules, laws, policies, and procedures that affect digital forensics;
- 3. To Perform the steps included in a digital investigation from the initial recognition of an incident through the steps of evidence gathering, preservation and analysis, and the completion of legal proceedings;
- 4. To Write professional quality reports that include both a summary report and a notes section, which describes the technical procedures used in the investigation;
- 5. To Identify important file metadata and apply their use in a forensic investigation;

	Expected Course Outcomes					
CO1	Understand the evidence of computer forensics					
CO2	Demonstrate the various procedure against the collected digital evidence					
CO3	Finding the slack and MBR disk space form small disk	K1 TO				
CO4	Analyze the disk space and type of the formatting the disk	K6				
CO5	Perform a forensic investigation on a forensic image, using various tools to recover evidence, resulting in a report documenting the investigation					
	resulting in a report documenting the investigation					

#### K1 – Remember K2 – Understand K3 – apply K4- Analyze K5 – evaluate K6- Create

- 1. Identification, Seizure, Search of Digital media.
- 2. Evidence Collection and image creation from the evidence.
- 3. Demonstration of various Forensic tools like Partition magic, Encase etc.
- 4. Data Recovery, Deleted File Recovery viewing small Disk.
- 5. Viewing small disk MBR and Slack.
- 6. Demonstration of Concealment Techniques (Cryptography PGP).
- 7. Demonstration of Concealment Techniques (Stenography).
- 8. Demonstration of other Concealment Techniques.
- 9. Formatting NTFS and EX2, EX3.
- 10. Case study of Biometric Techniques.

Microscopy- Types of Microscopes Used in the Forensic Sciences, Stereomicroscope, Compound microscope, Polarizing Light Microscope, Comparison microscope, Electron Microscopy TEM, SEM and their forensic Application

UNIT-III ELECTROPHORESIS TECHNIQUE 15 Hours

Electrophoresis Technique: General principles, Factors affecting electrophoresis, Sodium dodecyl sulphate(SDS) polyacrylamide gel electrophoresis, Agarose gel electrophoresis, Gel immunodiffusion, Immuno- electrophoresis.

UNIT -	BASIC SPECTROSCOPY	15 Hours

IV	

Basic Spectroscopy-- Introduction, electromagnetic radiations, full range, UV-Visible – principal absorbance, transmittance, Beer-Lambert"s laws and its applications of UV-Visible. IR-molecular spectra, electronics, vibrational, rotational spectra. Principles, diagrams, working and construction, uses and applications and IR spectroscopy.

## UNIT- V ATOMIC ABSORPTION SPECTROSCOPY 15 Hours

AAS- Introduction, Basic principles, Instrumentation and Techniques, Optical Considerations, The Cold Vapor Mercury Technique, The Hydride Generation Technique, Forensic applications. MASS Spectroscopy- Principle, Instrumentation and working, Forensic applications.

Course Code	23UDCF08	FORENSIC BALLISTICS	L	Т	P	C
Core/elective/Supportive		ELECTIVE III			0	1
Pre - requisite		Basic knowledge in physics law				

- 1. To understand the role of the forensic firearm examiner, and introduce the fundamental principles in firearm identification, examination and investigation.
- 2. To impart the knowledge of firearms and projectile
- 3. To understand the basics of firearm mechanism
- 4. To analyses and detect gunshot residue, gunshot powder.
- 5. To understand class and individual characteristics of firearms and ammunitions.

#### **Expected Course Outcomes**

	A	
CO1	Understand the classification of firearms and their firing mechanisms.	
CO2	Understand the methods of identifying firearms methods for characterization of	
CO2	gunshot residue.	K1
CO3	Analyze the firearm injuries and identify the ammunition.	TO
CO4	Analyze the firearm evidence	K6
CO5	Identify the range of fire using modern methods and also different wounds caused by firearms.	

#### K1 – Remember K2 – Understand K3 – apply K4- Analyze K5 – evaluate K6- Create

#### UNIT – I FIREARMS

10 Hours

Firearms-History and development of firearms. Classification of firearms. Weapon types and their operation. Firing mechanisms of different firearms.

#### UNIT II

#### INTERNAL AND EXTERNAL BALLISTICS

14 Hours

Internal ballistics – Definition, ignition of propellants, shape and size of propellants, manner of burning, and various factors affecting the internal ballistics: lock time, ignition time, barrel time, erosion, corrosion and gas cutting. External Ballistics – Vacuum trajectory, effect of air resistance on trajectory, base drag, drop, drift, yaw, shape of projectile and stability, trajectory computation, ballistics coefficient and limiting velocity, Measurements of trajectory parameters, introduction to automated system of trajectory computation and automated management of ballistic data.

#### UNIT-III

#### TERMINAL BALLISTICS

11 Hours

Terminal Ballistics – Effect of projectile on hitting the target: function of bullet shape, striking velocity, striking angle and nature of target, tumbling of bullets, effect of instability of bullet, effect of intermediate targets, and influence of range. Ricochet and its effects, stopping power.

#### **IINIT-IV**

#### **AMMUNITION**

12 Hours

Ammunition - Types of ammunition characteristics of different types of cartridges and bullets. Primers and priming compounds. Projectiles. Head stamp markings on ammunitions. Different types of marks produced during firing process on cartridge – firing pin marks, breech face marks, chamber marks, extractor and ejector marks.

#### UNIT- V

#### FIREARM EVIDENCE

13 Hours

Firearm Evidence - Matching of bullets and cartridge cases in regular firearms. Identification of bullets, pellets and wads fired from improvised, country made firearms. Automated method of bullet and cartridge case comparison. Determination of range of fire and time of fire. Mechanisms of formation of gunshot residues. Methods of analysis of gunshot residues from shooting

hands	hands and targets, with special reference to clothings. Identification and nature of firearms injuries

Course Code	23UDCF0 9	FORENSIC TOXICOLOGY	L	T	P	F
Core/elective/Su	pportive	ELECTIVE III	1	1	0	1
Pre - requisite		Basic knowledge in chemistry and forensic medicine				

- 1. To learn the drugs and their implications in a forensic setting.
- **2.** To analysis the drugs level and types of drugs
- **3.** To understand the significance of toxicological studies in forensic science.
- **4.** To know classification of poisons and their modes of actions.
- **5.** To gain knowledge about absorption of poisons in body fluids.

#### **Expected Course Outcomes**

CO1	Understand the significance of toxicological studies in forensic science.	
CO2	Classification of poisons and their modes of actions.	K1
CO3	Understand the concept of absorption of poisons in body fluids.	TO
CO4	Classification and characteristics of the narcotics, drugs and psychotropic substances.	K6
CO5	Understanding of criminal justice systems as they relate to forensic science.	

#### K1 – Remember K2 – Understand K3 – apply K4- Analyze K5 – evaluate K6- Create

#### UNIT – I

#### BASICS OF TOXICOLOGY

10 Hours

Toxicology: Introduction, Classification of Toxicology, Forensic toxicology.significance of toxicological findings. Techniques used in toxicology. Toxicological analysis and chemical intoxication tests. Postmortem Toxicology.

UNIT II POISONS 11 Hours

Classification of poisons. Plant poisons, Animal poisons, Metallic Poisons. Physico-chemical characteristics and mode of action of poisons. Accidental, suicidal and homicidal poisonings. Signs and symptoms of common poisoning and their antidotes. Collection and preservation of viscera, blood and urine for various poison cases. Identification of biocides and metal salts in body fluids. Metabolism and excretion of poisons.

#### UNIT-III IDENTIFICATION OF TOXINS

11 Hours

Application of immunoassays in forensic work. Animal poisons. Snake venom. Mode of action. Carbon monoxide poisoning. Vegetable poisons. Poisonous seeds, fruits, roots and mushrooms. Beverages. Alcoholic and non-alcoholic illicit liquors. Analysis and identification of ethyl alcohol. Estimation of ethyl alcohol in blood and urine. Proof spirit. Crime scene management in illicit liquor cases.

# UNIT -IV NARCOTICS, DRUGS AND PSYCHOTROPIC SUBSTANCES 14 Hours

Narcotics, Drugs and Psychotropic Substances-Definition of narcotics, drugs and psychotropic substances. Broad classification – Narcotics, stimulants, depressants and hallucinogens. General characteristics and common example of each classification. Drugs and psychotropic substances. Designer drugs. Tolerance, addiction and withdrawal symptoms of narcotics, drugs and psychotropic substance.

#### UNIT- V ANALYSIS OF NARCOTICS 14 Hours

Testing of narcotics, drugs and psychotropic substances. Isolation techniques for purifying narcotics, drugs and psychotropic substances – thin layer chromatography, gas-liquid chromatography and high performance liquid chromatography. Presumptive and screening tests for narcotics, drugs and psychotropic substances. Microcrystalline testing of drugs of abuse. Analysis of narcotics, drugs and

psycho	otropic substances in breast milk, saliva, urine, hair and antemortem blood. Drugs an	d driving.

Course Code	23UDCF07	Project Work Lab	L	T	P	C
Core/elective/S	Supportive	Core:12	0	0	5	8
Pre - requ	uisite	Students should have the strong knowledge in forensic evidence data collection, examine procedures.				

- 1. Provide an in-depth exploration of a topic of special interest.
- 2. Acquire knowledge on the chosen topic and apply the knowledge, experience, and skills learned in the Law and Justice programme to the chosen topic.
- 3. Apply various research techniques, find suitable sources of information, and acknowledge them in the research project.
- 4. Develop effective communicative skills to present research on Law and Justice Issues.
- 5. Effectively present and defend your research orally.

#### **Expected Course Outcomes** On the successful completion of the course, student will be able to: Understand the independent research on Law and Justice Topics. Create a various investigation idea to finding the evidence **K**1 Apply the student"s various angle on the crime cases. To K6

Effectively present and defend your research orally. CO4

Produce a thesis of publishable quality.

K1 – Remember K2 – Understand K3 – apply K4- Analyze K5 – evaluate K6- Create

The Project will be based on a research topic in Forensic Science/Criminology. The topic will be assigned in consultation with police and forensic science establishments, giving due consideration to the problem areas faced by these institutions. The students will be expected to undertake extensive fieldwork, in collaboration with mobile police laboratories. The students will undertake certain projects pertaining to Digital and Cyber Forensics and DNA Analysis. The projects will be assigned in consultation with respective departments experts.

#### Aim of the project work

- 1. The aim of the project work is to acquire practical knowledge on the implementation of the forensic concepts studied.
- 2. Examining evidence from a crime scene using strictly scientific knowledge and principles in order to find facts about a criminal case.
- 3. Each student should carry out individually one project work and it may be a work using the cyber forensic software packages or DNA typing or Serology, etc.
- 4. That they have learned, the implementation of concepts from the papers studied, or implementation of any innovative idea focusing on application-oriented concepts.

#### Viva Voce

CO₁

CO₂

CO₃

CO₅

1. Viva-Voce will be conducted at the end of the year by both Internal (Respective Guides) and

External Examiners, after duly verifying the Annexure Report available in the College, for a total of 200 marks at the last day of the practical session.

2. Out of 200 marks, 160 marks for project report and 40 marks for Viva Voce.
